

# C-BW4H-2404 Valid Exam Camp Pdf & C-BW4H-2404 Guaranteed Passing

BONUS!!! Download part of TorrentVCE C-BW4H-2404 dumps for free: <https://drive.google.com/open?id=1za5fPVQuFpqOCRJaMApJIHfrefDm0M106>

Our C-BW4H-2404 exam questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our C-BW4H-2404 simulating exam for we have money back guarantee to all of our exam materials. I hope we have enough sincerity to impress you. And our pass rate of the C-BW4H-2404 training engine is high as 98% to 100%, it is the data that proved and tested by our loyal customers. As long as you study with our C-BW4H-2404 learning guide, you will pass the exam easily.

TorrentVCE also provides easy to use C-BW4H-2404 practice test brain dump preparation software for C-BW4H-2404. Moreover, after the date of purchase of the C-BW4H-2404 testing engine, you will receive free updates for 90 days. The C-BW4H-2404 dumps practice test software is easy to install and has a simple interface. The practice test software for C-BW4H-2404 Exam provides a real feel of an exam and allows you to test your skills for the exam. The C-BW4H-2404 software comes with multiple features including the self-assessment feature. You will get free updates for 90 days after the purchase date that will allow you to get latest and well-curated questions for the C-BW4H-2404 exam.

**C-BW4H-2404 Guaranteed Passing & C-BW4H-2404 Exam Overview**

Three versions of C-BW4H-2404 exam guide are available on our test platform, including PDF version, PC version and APP online version. As a consequence, you are able to study the online test engine of C-BW4H-2404 study materials by your cellphone or computer, and you can even study C-BW4H-2404 Actual Exam at your home, company or on the subway whether you are a rookie or a veteran, you can make full use of your fragmentation time in a highly-efficient way to study with our C-BW4H-2404 exam questions and pass the C-BW4H-2404 exam.

## SAP C-BW4H-2404 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                    |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"> <li>• SAP BW4HANA Project and Modeling Process: In this topic, candidates learn about how to design and implement efficient data models within environment of the SAP BW</li> <li>• 4HANA.</li> </ul>   |
| Topic 2 | <ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Project and the Modeling Process: This segment offers direction on orchestrating SAP BW</li> <li>• 4HANA initiatives.</li> </ul>                                          |
| Topic 3 | <ul style="list-style-type: none"> <li>• Data Acquisition into SAP BW</li> <li>• 4HANA: This section addresses the incorporation of diverse data origins into SAP BW</li> <li>• 4HANA and the methodologies for data ingestion.</li> </ul> |
| Topic 4 | <ul style="list-style-type: none"> <li>• Performance Optimization: This section scrutinizes elements associated with enhancing system efficiency.</li> </ul>                                                                               |

## SAP Certified Associate - Data Engineer - Data Fabric Sample Questions (Q23-Q28):

### NEW QUESTION # 23

What are the prerequisites for deleting master data (for example, cost centers) in SAP BW/4HANA? Note: There are 2 correct answers to this question.

- A. There must be no BW analysis authorizations defined that use any of the cost centers
- B. There must be no transaction data referring to the cost centers
- C. There must be no hierarchy for the cost centers
- D. There must be no BW query that uses cost center as a free characteristics.

**Answer: B,C**

### NEW QUESTION # 24

What are some of the benefits of using an InfoSource in a data flow? Note: There are 2 correct answers to this question.

- A. Realizing direct access to source data without storing them
- B. Splitting a complex transformation into simple parts without storing intermediate data
- C. Enabling a data transfer process (DTP) to process multiple sequential transformations
- D. Providing the delta extraction information of the source data

**Answer: B,C**

Explanation:

An InfoSource in SAP BW/4HANA is a logical object used in data flows to facilitate the movement and transformation of data between source systems and target objects (e.g., DataStore Objects, InfoCubes). Let's analyze each option to determine why A and C are correct:

\* Explanation: An InfoSource allows you to break down a complex transformation into smaller, manageable steps. This modular approach simplifies the design and maintenance of data flows.

Importantly, the intermediate results are not stored permanently, which optimizes storage usage and improves performance.

### NEW QUESTION # 25

What are some of the variable types in a BW query that can use the processing type SAP HANA Exit.

Note: There are 2 correct answers to this question.

- A. Characteristic value
- B. Formula
- C. Hierarchy node
- D. Text

**Answer: A,C**

Explanation:

\* C. Characteristic value: This type of variable can use the SAP HANA Exit processing type to determine default values for variables using an AMDP class implementation. This can improve the performance and flexibility of queries that are generated as external SAP HANA views<sup>12</sup>.

\* D. Hierarchy node: This type of variable can use the SAP HANA Exit processing type to determine default values for variables using an AMDP class implementation. This can improve the performance and flexibility of queries that are generated as external SAP HANA views<sup>12</sup>.

### NEW QUESTION # 26

You created an Open ODS View on an SAP HANA database table to virtually consume the data in SAP BW/4HANA. Real-time reporting requirements have now changed you are asked to persist the data in SAP BW/4HANA.

Which objects are created when using the "Generate Data Flow" function in the Open ODS View editor?

Note: There are 3 correct answers to this question.

- A. SAP HANA calculation view
- B. Transformation
- C. DataStore object (advanced)
- D. CompositeProvider
- E. Data source

**Answer: B,C,E**

Explanation:

\* Open ODS View: An Open ODS View in SAP BW/4HANA allows virtual consumption of data from external sources (e.g., SAP HANA tables). It does not persist data but provides real-time access to the underlying source.

\* Generate Data Flow Function: When using the "Generate Data Flow" function in the Open ODS View editor, SAP BW/4HANA creates objects to persist the data for reporting purposes. This involves transforming the virtual data into a persistent format within the BW system.

\* Generated Objects:

\* DataStore Object (Advanced): Used to persist the data extracted from the Open ODS View.

\* Transformation: Defines how data is transformed and loaded into the DataStore Object (Advanced).

\* Data Source: Represents the source of the data being persisted.

Key Concepts: Objects Created by "Generate Data Flow": When you use the "Generate Data Flow" function in the Open ODS View editor, the following objects are created:

\* DataStore Object (Advanced): This is the primary object where the data is persisted. It serves as the storage layer for the data extracted from the Open ODS View.

\* Transformation: A transformation is automatically generated to map the fields from the Open ODS View to the DataStore Object (Advanced). This ensures that the data is correctly structured and transformed during the loading process.

\* Data Source: A data source is created to represent the Open ODS View as the source of the data. This allows the BW system to extract data from the virtual view and load it into the DataStore Object (Advanced).

\* B. SAP HANA Calculation View: While Open ODS Views may be based on SAP HANA calculation views, the "Generate Data Flow" function does not create additional calculation views. It focuses on persisting data within the BW system.

\* E. CompositeProvider: A CompositeProvider is used to combine data from multiple sources for reporting. It is not automatically created by the "Generate Data Flow" function.

\* SAP BW/4HANA Documentation on Open ODS Views: The official documentation explains the

"Generate Data Flow" function and its role in persisting data.

\* SAP Note on Open ODS Views: Notes such as 2608998 provide details on how Open ODS Views interact with persistent storage objects.

\* SAP BW/4HANA Best Practices for Data Modeling: These guidelines recommend using transformations and DataStore Objects (Advanced) for persisting data from virtual sources.

Why Other Options Are Incorrect:References:By using the "Generate Data Flow" function, you can seamlessly transition from virtual data consumption to persistent storage, ensuring compliance with real-time reporting requirements.

### NEW QUESTION # 27

"What are benefits of separating master data from transactional data in SAP BW/4HANA? Note: There are 3 correct answer to this question."

- A. Reducing the number of data transfer processes
- B. Allowing different data load frequency
- C. Ensuring referential integrity on your transactional data
- D. Avoiding generation of SID values.
- E. Providing language dependent master data texts.

**Answer: B,C,E**

Explanation:

Separating master data from transactional data in SAP BW/4HANA has the following benefits:

It allows different data load frequency for master data and transactional data, which can improve the performance and flexibility of data loading processes. For example, master data can be loaded daily or weekly, while transactional data can be loaded hourly or near real-time.

It ensures referential integrity on your transactional data by using SID values that link the transactional data to the master data. This way, the transactional data can be consistent and accurate across different InfoProviders and queries.

It provides language dependent master data texts that can be displayed in different languages according to the user's preference. This way, the master data can be more user-friendly and understandable for different audiences.

### NEW QUESTION # 28

.....

You can install and use TorrentVCE SAP C-BW4H-2404 exam dumps formats easily and start SAP Certified Associate - Data Engineer - Data Fabric exam preparation right now. The TorrentVCE C-BW4H-2404 desktop practice test software and web-based practice test software both are the mock C-BW4H-2404 exam that stimulates the actual exam format and content. With the TorrentVCE C-BW4H-2404 Exam Questions you will get to understand C-BW4H-2404 exam structure, difficulty level, and time constraints. Get any TorrentVCE SAP Certified Associate - Data Engineer - Data Fabric exam questions format and start SAP C-BW4H-2404 exam preparation today.
