

# C-BW4H-2505 Download, Latest C-BW4H-2505 Test Guide

BTW, DOWNLOAD part of GuideTorrent C-BW4H-2505 dumps from Cloud Storage: <https://drive.google.com/open?id=1CupcXhOuDMXd9RAidmDfAgo5T84B2I7I>

The three versions of our C-BW4H-2505 training materials each have its own advantage, now I would like to introduce the advantage of the software version for your reference. On the one hand, the software version can simulate the real C-BW4H-2505 examination for all of the users in windows operation system. By actually simulating the real test environment, you will have the opportunity to learn and correct your weakness in the course of study. So that you can get your best pass percentage by our C-BW4H-2505 Exam Questions.

## SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data Acquisition into SAP BW</li><li>• 4HANA: This section tests how Data Engineers manage data integration into SAP BW</li><li>• 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• SAP BW</li><li>• 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW</li><li>• 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• SAP Analytics Tools and SAP Analytics Cloud: This section evaluates the skills of SAP Consultants in using tools like SAP Analytics Cloud, Lumira, and Analysis for Office to visualize and interpret data. It focuses on the consultant's ability to apply business intelligence tools within the SAP ecosystem.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW</li> <li>• 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.</li> </ul>

## Latest C-BW4H-2505 Test Guide, C-BW4H-2505 Certification Questions

The "GuideTorrent" is one of the top-rated and reliable platforms that offer real, valid, and updated SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) exam questions in three different formats. The names of these formats are GuideTorrent C-BW4H-2505 PDF dumps file, desktop practice test software, and web-based practice test software. All these three GuideTorrent C-BW4H-2505 Exam Questions formats are easy to use and perfectly work with desktop computers, laptops, tabs, or even on your smartphone devices.

## SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q51-Q56):

### NEW QUESTION # 51

You want to create a restricted column in an SAP HANA HDI calculation view. What do you need to define?

Note: There are 2 correct answers to this question.

- A. A condition criterion
- B. An aggregation method
- C. An SAP HANA data type
- D. A reference to an existing measure

Answer: A,D

### NEW QUESTION # 52

Which types of values can be protected by analysis authorizations? Note: There are 2 correct answers to this question.

- A. Characteristic values
- B. Display attribute values
- C. Key figure values
- D. Hierarchy node values

Answer: A,D

Explanation:

Analysis authorizations in SAP BW/4HANA are used to restrict access to specific data based on user roles and permissions. Let's analyze each option:

\* Option A: Characteristic values This is correct. Analysis authorizations can protect characteristic values by restricting access to specific values of a characteristic (e.g., limiting access to certain regions, products, or customers). This is one of the primary use

cases for analysis authorizations.

\* Option B: Display attribute values This is incorrect. Display attributes are descriptive fields associated with characteristics and are not directly protected by analysis authorizations. Instead, analysis authorizations focus on restricting access to the main characteristic values themselves.

\* Option C: Key figure values This is incorrect. Key figures represent numeric data (e.g., sales amounts, quantities) and cannot be directly restricted using analysis authorizations. Instead, restrictions on key figure values are typically achieved indirectly by controlling access to the associated characteristic values.

\* Option D: Hierarchy node values This is correct. Analysis authorizations can protect hierarchy node values by restricting access to specific nodes within a hierarchy. For example, users can be granted access only to certain levels or branches of an organizational hierarchy.

References: SAP BW/4HANA Security Guide: Explains how analysis authorizations work and their application to characteristic values and hierarchy nodes.

SAP Help Portal: Provides detailed documentation on configuring analysis authorizations and their impact on data access.

SAP Community Blogs: Experts often discuss practical examples of using analysis authorizations to secure data.

In summary, analysis authorizations can protect characteristic values and hierarchy node values, making options A and D the correct answers.

### NEW QUESTION # 53

What is the maximum number of reference characteristics that can be used for one key figure with a multi-dimensional exception aggregation in a BW query?

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

### NEW QUESTION # 54

Which source types are available to create a generic DataSource in SAP ERP? Note: There are 3 correct answers to this question.

- **A. ABAP function module**
- **B. SAP query**
- C. ABAP managed database procedure
- D. Database view
- **E. ABAP class method**

**Answer: A,B,E**

Explanation:

In SAP ERP, a Generic DataSource is used to extract data from various source types and make it available for consumption in SAP BW/4HANA or other systems. The source type defines the origin of the data and how it is extracted. Below is an explanation of the correct answers and why they are valid.

\* A. ABAP class method

\* An ABAP class method can be used as a source type for a Generic DataSource. This approach allows developers to encapsulate complex logic within an ABAP class and expose the data extraction logic through a specific method.

\* The method is called during the data extraction process, and its output is used as the data source.

This is particularly useful for scenarios where custom logic or calculations are required to prepare the data.

1: SAP provides support for ABAP class methods as part of its Generic DataSource framework, enabling flexible and reusable data extraction.

B). SAP query

An SAP query can also serve as a source type for a Generic DataSource. SAP queries are predefined reports created using the SAP Query tool, which allows users to extract data from logical databases or user-defined views.

By leveraging SAP queries, non-technical users can create data sources without requiring extensive programming knowledge. The query output is then used as the basis for the Generic DataSource.

Reference: SAP Query is a widely used tool in SAP ERP for creating ad-hoc reports and data extracts, making it a convenient option for Generic DataSources.

D). ABAP function module

An ABAP function module is one of the most common source types for Generic DataSources. Function modules are reusable ABAP

routines that encapsulate specific business logic or data extraction processes.

During the extraction process, the function module is executed, and its output is passed to the Generic DataSource. This approach is highly flexible and supports complex data transformations and filtering.

Reference: SAP BW/4HANA extensively uses ABAP function modules for data extraction, as they provide a robust and scalable way to retrieve data from SAP ERP systems.

Incorrect Options: C. ABAP managed database procedure

ABAP Managed Database Procedures (AMDPs) are used to execute database-specific logic directly on the database layer. While AMDPs are powerful for performance optimization, they are not supported as a source type for Generic DataSources.

Generic DataSources rely on higher-level ABAP constructs like function modules or class methods rather than low-level database procedures.

Reference: AMDPs are primarily used for advanced SQLScript-based processing and are not integrated into the Generic DataSource framework.

E). Database view

While database views are commonly used to structure and organize data in SAP ERP, they cannot be directly used as a source type for Generic DataSources. Instead, database views are typically accessed indirectly through ABAP function modules or class methods.

Reference: SAP recommends using higher-level ABAP constructs (e.g., function modules) to encapsulate the logic for accessing database views, ensuring better flexibility and maintainability.

Conclusion: The correct answers are A. ABAP class method, B. SAP query, and D. ABAP function module, as these are the supported source types for creating Generic DataSources in SAP ERP. These options provide flexibility, reusability, and ease of use for extracting data from SAP ERP systems.

### NEW QUESTION # 55

How can the delta merge process be initiated in SAP BW/4HANA? Note: There are 2 correct answers to this question.

- A. By setting a specific flag in the transformation
- **B. By using a specific process type in a process chain**
- **C. By setting a specific flag in the data transfer process**
- D. By using the SAP BW/4HANA data load monitor

**Answer: B,C**

### NEW QUESTION # 56

.....

For candidates who are going to choose the C-BW4H-2505 practice materials, it's maybe difficult for them to choose the exam dumps they need. If you choose us, C-BW4H-2505 learning materials of us will help you a lot. With skilled experts to verify C-BW4H-2505 questions and answers, the quality and accuracy can be ensured. In addition, we provide you with free demo to have a try before purchasing, so that we can have a try before purchasing. C-BW4H-2505 Learning Materials also have high pass rate, and we can ensure you to pass the exam successfully.
