

C-BW4H-2505 Exam Torrent - C-BW4H-2505 Reliable Study Materials

NOTE: Each correct selection is worth one point.

Required secrets:

- Certificate
- Personal access token
- Shared Access Authorization token
- Username and password

Storage location:

- Azure Data Lake
- Azure Key Vault
- Azure Storage with HTTP access
- Azure Storage with HTTPS access

Answer:

Required secrets:

- Certificate
- Personal access token
- Shared Access Authorization token
- Username and password

Storage location:

- Azure Data Lake
- Azure Key Vault
- Azure Storage with HTTP access
- Azure Storage with HTTPS access

Explanation:

Every request made against a storage service must be authorized, unless the request is for a blob or container resource that has been made available for public or signed access. One option for authorizing a request is by using Shared Key.

Scenario: The mobile applications must be able to call the share pricing service of the existing retirement fund management system. Until the system is upgraded, the service will only support basic authentication over HTTPS.

The investment planning applications suite will include one multi-tier web application and two iOS mobile application. One mobile application will be used by employees; the other will be used by customers.

P.S. Free & New C-BW4H-2505 dumps are available on Google Drive shared by Pass4training: <https://drive.google.com/open?id=1mwdZcGFq8HqjmVSXPDr9WOypaUacA8tC>

We provide you with free update for 365 days for C-BW4H-2505 study guide after purchasing, and the update version will be sent to your email automatically, you just need to check your email for the update version. In addition, we have a professional team to compile and review C-BW4H-2505 exam materials, therefore the quality can be guaranteed, and you can use them at ease. C-BW4H-2505 Exam Materials cover most of the knowledge points for the exam, and you can master the major knowledge points for the exam as well as improve your professional ability in the process of learning.

SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	- InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.
Topic 2	- SAP BW 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW 4HANA. It focuses on designing scalable, high-performing data models.

Topic 3	• Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW • 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.
Topic 4	• Data Acquisition into SAP BW • 4HANA: This section tests how Data Engineers manage data integration into SAP BW • 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.
Topic 5	• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.
Topic 6	• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform.
Topic 7	• SAP BW • 4HANA Project and the Modeling Process: This section of the exam assesses how Data Engineers guide and contribute to SAP BW • 4HANA projects. It includes knowledge of modeling workflows, project lifecycle stages, and collaboration strategies within project teams.

C-BW4H-2505 Reliable Study Materials & C-BW4H-2505 Printable PDF

This skill set brings multiple benefits to you. You get well-paid jobs and promotions because firms prefer SAP Certified Associate - Data Engineer - SAP BW/4HANA C-BW4H-2505 certification holders. Although all professionals desire to earn certifications, many never find enough time to go beyond their graduation degree. Any area of accreditation is in high demand, and if you have a SAP Certified Associate - Data Engineer - SAP BW/4HANA C-BW4H-2505 Certification, you will grow in the information technology industry with ease.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which are purposes of the Open Operational Data Store layer in the layered scalable architecture (LSA++) of SAP BW/4HANA?

Note: There are 2 correct answers to this question.

- A. Real-time reporting on source system data without staging
- B. Transformations of data based on business logic
- C. Harmonization of data from several source systems
- D. Initial staging of source system data

Answer: B,C

NEW QUESTION # 67

Which features does SAP Analysis for Microsoft Office provide? Note: There are 3 correct answers to this question,

- A. Displaying data simultaneously in a table and a chart
- B. Including more than one data source
- C. Creating bookmarks for a navigation state
- D. Dragging measures in and out of the report

- E. Changing context menu entries

Answer: B,C,D

NEW QUESTION # 68

For a report, you would like to highlight the deviation from predefined threshold values for a key figure.
Which BW query feature do you use?

- A. Exception
- B. Condition
- C. Key figure property
- D. Formula cell

Answer: A

NEW QUESTION # 69

Which objects values can be affected by the key date in a BW query? Note: There are 3 correct answers to this question.

- A. Display attributes
- B. Navigation attributes
- C. Time characteristics
- D. Basic key figures
- E. Hierarchies

Answer: A,C,E

NEW QUESTION # 70

What are the benefits of separating master data from transactional data in SAP BW/4HANA? Note: There are 3 correct answers to this question.

- A. Allowing different data load frequency
- B. Reducing the number of database tables
- C. Providing language-dependent master data texts
- D. Avoiding generation of SID values
- E. Ensuring referential integrity of your transactional data

Answer: A,C,E

Explanation:

In SAP BW/4HANA, separating master data from transactional data is a fundamental design principle that provides numerous benefits for data management, reporting, and system performance. Below is an explanation of the correct answers and why they are valid.

* B. Allowing different data load frequency

* Master data (e.g., customer names, product descriptions) typically changes less frequently than transactional data (e.g., sales orders, invoices). By separating these two types of data, you can schedule independent data loads for each.

* For example, master data might be updated weekly or monthly, while transactional data could be loaded daily or even in real-time. This separation ensures efficient data management and reduces unnecessary processing overhead.

* In SAP BW/4HANA, this separation is supported by the use of InfoObjects for master data and DataStore Objects (DSOs) or Advanced DSOs for transactional data, allowing flexible scheduling and processing.

C). Ensuring referential integrity of your transactional data

Separating master data from transactional data helps maintain referential integrity by ensuring that transactional records always reference valid master data entries.

For instance, if a transaction references a product ID, the corresponding product master record must exist in the master data table. This separation simplifies data validation and prevents orphaned or inconsistent data.

Reference: SAP BW/4HANA enforces referential integrity through the use of Surrogate IDs (SIDs) and master data tables, which link transactional data to their corresponding master data attributes.

D). Providing language-dependent master data texts

Master data often includes descriptive texts (e.g., product names, customer addresses) that may need to be displayed in multiple

languages for global organizations. By separating master data, SAP BW/4HANA can store language-dependent texts in dedicated tables and retrieve them based on the user's language preference.

For example, a product name can be stored in English, German, and French, and the system will display the appropriate text based on the user's locale.

Reference: SAP BW/4HANA supports multilingual master data through its text tables, which are linked to master data objects and enable language-dependent reporting.

Incorrect Options: A. Reducing the number of database tables

Separating master data from transactional data actually increases the number of database tables because each type of data is stored in its own set of tables.

For example, master data is stored in attribute tables, text tables, and hierarchy tables, while transactional data is stored in fact tables. This separation improves data organization but does not reduce the number of tables.

Reference: The architecture of SAP BW/4HANA explicitly separates master and transactional data into distinct tables to optimize performance and manageability.

E). Avoiding generation of SID values

SID (Surrogate ID) values are essential for linking transactional data to master data in SAP BW/4HANA.

Separating master data from transactional data does not avoid the generation of SIDs; rather, it relies on SIDs to establish relationships between the two.

For example, when a transaction references a customer, the system uses the customer's SID to link the transaction to the corresponding master data record.

Reference: SIDs are a core component of SAP BW/4HANA's data model and are generated automatically when master data is loaded.

Conclusion: The separation of master data from transactional data in SAP BW/4HANA provides significant benefits, including allowing different data load frequencies, ensuring referential integrity, and supporting language-dependent texts. These advantages contribute to better data management, improved reporting capabilities, and enhanced system performance. The correct answers are therefore B, C, and D.

NEW QUESTION # 71

.....

Moreover, C-BW4H-2505 exam questions have been expanded capabilities through partnership with a network of reliable local companies in distribution, software and product referencing for a better development. That helping you pass the C-BW4H-2505 exam with our C-BW4H-2505 latest question successfully has been given priority to our agenda. The C-BW4H-2505 Test Guide offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. We sincere hope that our C-BW4H-2505 exam questions can live up to your expectation.
