

# C-BW4H-2505 Latest Test Discount - C-BW4H-2505 Valid Exam Vce

BTW, DOWNLOAD part of Itcertkey C-BW4H-2505 dumps from Cloud Storage: <https://drive.google.com/open?id=1PXEN9v8Fqw05d5UeMKBk7tI7IU3p9i7m>

You can use this C-BW4H-2505 practice exam software to test and enhance your SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) exam preparation. Your practice will be made easier by having the option to customize the C-BW4H-2505 Exam Dumps. The fact that it runs without an active internet connection is an incredible comfort for users who don't have access to the internet all the time.

Our C-BW4H-2505 test braindumps are by no means limited to only one group of people. Whether you are trying this exam for the first time or have extensive experience in taking exams, our C-BW4H-2505 latest exam torrent can satisfy you. This is due to the fact that our C-BW4H-2505 test braindumps are humanized designed and express complex information in an easy-to-understand language. You will never have language barriers, and the learning process is very easy for you. What are you waiting for? As long as you decide to choose our C-BW4H-2505 Exam Questions, you will have an opportunity to prove your abilities, so you can own more opportunities to embrace a better life.

>> C-BW4H-2505 Latest Test Discount <<

**Trustable C-BW4H-2505 Latest Test Discount bring you Authorized C-BW4H-2505 Valid Exam Vce for SAP SAP Certified Associate - Data Engineer - SAP BW/4HANA**

SAP PDF Questions format, web-based practice test, and desktop-based C-BW4H-2505 practice test formats. All these three C-

BW4H-2505 exam dumps formats features surely will help you in preparation and boost your confidence to pass the challenging SAP C-BW4H-2505 Exam with good scores.

## SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q50-Q55):

### NEW QUESTION # 50

Which objects values can be affected by the key date in a BW query? Note: There are 3 correct answers to this question.

- A. Basic key figures
- B. Display attributes
- C. Navigation attributes
- D. Time characteristics
- E. Hierarchies

**Answer: A,C,E**

### NEW QUESTION # 51

What are the possible ways to fill a pre-calculated value set (bucket)? Note: There are 3 correct answers to this question.

- A. By referencing a table
- B. By using a BW query (update value set by query)
- C. By accessing an SAP HANA HDI Calculation View of data category Dimension
- D. By entering the values manually
- E. By using a transformation data transfer process (DTP)

**Answer: A,B,D**

### NEW QUESTION # 52

What are some of the prerequisites for using SAP S/4HANA ABAP CDS views for extraction into SAP BW/4HANA in an ODP context? Note: There are 2 correct answers to this question.

- A. An ODP source system with context ODP\_CDS must be created in SAP BW/4HANA.
- B. The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.
- C. The ABAP CDS views must be released through the program RODPS\_OS\_EXPOSE for BW extraction.
- D. The ABAP CDS views must be defined with the appropriate data extraction annotations.

**Answer: A,C**

Explanation:

Extracting data from SAP S/4HANA ABAP CDS (Core Data Services) views into SAP BW/4HANA using the Operational Data Provisioning (ODP) framework requires specific prerequisites. These ensure that the CDS views are properly exposed and accessible for extraction. Below is a detailed explanation of why the verified answers are correct.

\* ABAP CDS Views: ABAP CDS views are reusable data models defined in SAP S/4HANA. They provide a semantic layer for querying data and can be used for reporting and analytics.

\* Operational Data Provisioning (ODP): ODP is a framework in SAP BW/4HANA that enables real-time or near-real-time data extraction from various source systems, including SAP S/4HANA.

\* ODP Contexts: ODP contexts define the type of source system and data extraction method. For CDS views, the context ODP\_CDS is used.

\* Data Extraction Annotations: Annotations in CDS views specify metadata for extraction purposes, such as field properties and extraction behavior.

Key Concepts:

\* Option A: The ABAP CDS views must be released through the program RODPS\_OS\_EXPOSE for BW extraction.

\* Why Correct? To make an ABAP CDS view available for extraction via ODP, it must be explicitly released using the program RODPS\_OS\_EXPOSE. This step registers the view in the ODP framework and makes it accessible to SAP BW/4HANA.

\* Option B: The Operational Data Provisioning Framework must be configured in SAP BW/4HANA.

\* Why Incorrect? While configuring the ODP framework is a general prerequisite for any ODP-based extraction, it is not specific to extracting ABAP CDS views. This option is too broad to be considered a direct prerequisite.

\* Option C: An ODP source system with context ODP\_CDS must be created in SAP BW/4HANA.

\* Why Correct? To extract data from ABAP CDS views, you must create an ODP source system in SAP BW/4HANA with the context ODP\_CDS. This context specifies that the source system provides data from CDS views.

\* Option D: The ABAP CDS views must be defined with the appropriate data extraction annotations.

\* Why Incorrect? While annotations are important for defining metadata in CDS views, they are not mandatory for ODP-based extraction. The primary requirement is releasing the view using RODPS\_OS\_EXPOSE.

Verified Answer Explanation:

\* SAP BW/4HANA Extraction Guide: The guide outlines the steps for extracting data from ABAP CDS views using the ODP framework, including the use of RODPS\_OS\_EXPOSE and the creation of an ODP source system.

\* SAP Note 2700850: This note provides detailed instructions on releasing CDS views for BW extraction and configuring the ODP framework.

\* SAP Best Practices for ODP Extraction: SAP recommends using the ODP\_CDS context for extracting data from ABAP CDS views and emphasizes the importance of releasing views using RODPS\_OS\_EXPOSE.

SAP Documentation and References:

### NEW QUESTION # 53

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Position of child nodes
- B. Exp to level
- C. Display text nodes
- D. Sort direction
- E. Time dependency

**Answer: B,C,D**

Explanation:

In SAP Data Engineer - Data Fabric, particularly when working with hierarchies in query definitions, external hierarchies are used to organize and structure data in a meaningful way for reporting and analysis. External hierarchies are predefined hierarchies that can be integrated into queries, and certain properties of these hierarchies can be adjusted within the query definition to meet specific reporting requirements.

\* B. Sort direction

\* The sort direction determines the order in which the hierarchy nodes are displayed in the query results. You can choose to sort the hierarchy in ascending or descending order based on node names, key values, or other attributes. This property is adjustable in the query definition to allow flexibility in how the data is presented to end users.

\* In SAP BW (Business Warehouse) and SAP Data Engineer - Data Fabric, sorting options for hierarchies are available in the query designer under the hierarchy settings.

C). Exp to level

The "Exp to level" property allows you to specify the depth to which the hierarchy should be expanded when displayed in the query results. For example, if you set "Exp to level" to 3, the hierarchy will automatically expand to show all nodes up to the third level. This is useful for controlling the granularity of data displayed without requiring manual expansion by the user.

Reference: In SAP BW Query Designer, this property is part of the hierarchy display settings and can be configured during query design.

D). Display text nodes

The "Display text nodes" property controls whether text nodes (descriptive labels) are shown alongside the hierarchy nodes in the query output. Text nodes provide additional context or descriptions for each node, making the hierarchy easier to interpret for end users.

Reference: This property is commonly used in SAP BW and SAP Data Engineer - Data Fabric to enhance the readability of hierarchical data in reports.

Incorrect Options: A. Position of child nodes

The position of child nodes within a hierarchy is determined by the hierarchy's structure and cannot be altered in the query definition. It is a fixed property defined during the creation of the hierarchy in the backend system.

Reference: SAP documentation specifies that structural properties like node positions are not modifiable at the query level.

E). Time dependency

Time dependency is a characteristic of the hierarchy itself, indicating whether the hierarchy changes over time (e.g., organizational structures that evolve). This property is defined during the creation of the hierarchy and cannot be changed in the query definition. Reference: SAP BW and SAP Data Engineer - Data Fabric treat time-dependent hierarchies as static entities in the query context, meaning their time dependency cannot be altered dynamically.

Conclusion: The three correct answers—Sort direction, Exp to level, and Display text nodes—are properties that can be modified in the query definition to customize the presentation of external hierarchies. These adjustments provide flexibility in how hierarchical data is

displayed and analyzed, enhancing the usability of reports and dashboards in SAP Data Engineer - Data Fabric environments.

#### NEW QUESTION # 54

What is the request handling default setting for error handling in a data transfer process (DTP) in SAP BW /4HANA?

- A. Request is canceled, records are not tracked, and target is not updated.
- B. Request is canceled, first incorrect record is tracked, and target is not updated.
- C. Request is set to success, error stack is written, and valid records are updated.
- **D. Request is set to failed, error stack is written, and valid records are updated.**

**Answer: D**

#### NEW QUESTION # 55

.....

The SAP C-BW4H-2505 is so flexible that you can easily change the timings, types of questions, and topics for each mock exam. SAP C-BW4H-2505 practice test contains all the important questions that will appear in the actual C-BW4H-2505 Exam. Itcertkey offers updates for SAP C-BW4H-2505 Exam questions up to 365 days after purchase, to match the changes in the latest C-BW4H-2505 exam syllabus.
