SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q13-Q18):

NEW QUESTION # 13

You want to access data from a table residing in an external database using an SAP HANA SDA remote source. Which other SAP HANA element is required to access its data?

- A. Table Function
- B. Flowgraph
- C. Replication Task
- D. Virtual Table

Answer: D

NEW QUESTION # 14

Which tasks are part of the Business Blueprint phase in an SAP BW/4HANA project? Note: There are 2 correct answers to this question.

- A. Collect central individual information requirements
- B. Analyze key performance indicators of the business processes
- C. Activate SAP business content objects that comply with the layered scalable architecture (LSA++) architecture
- D. Associate an InfoObject to a field in an Open ODS view

Answer: A,B

Explanation:

The Business Blueprint phase in an SAP BW/4HANA project is a critical step in the implementation process. It focuses on understanding and documenting the business requirements, defining key performance indicators (KPIs), and gathering detailed information about the data and reporting needs of the organization. This phase lays the foundation for designing the technical solution in subsequent phases.

* Analyze key performance indicators of the business processes (Option A): During the Business Blueprint phase, it is essential to identify and analyze the key performance indicators (KPIs) that are critical for measuring the success of business processes. KPIs help define the metrics and reporting requirements that will guide the design of the SAP BW/4HANA system.

* This task involves collaborating with business stakeholders to understand their goals and translating them into measurable KPIs.

* For example, KPIs could include sales revenue, customer satisfaction scores, or inventory turnover rates.

* Collect central individual information requirements (Option D): Gathering detailed information requirements from stakeholders is a core activity in the Business Blueprint phase. This includes identifying the specific data elements, reports, and dashboards needed by different users across the organization.

* Centralizing these requirements ensures that the solution design aligns with the needs of all stakeholders and avoids gaps in functionality.

* For example, finance teams may require profitability reports, while supply chain teams may need inventory forecasts.

* Associate an InfoObject to a field in an Open ODS view (Option B): Associating InfoObjects to fields in Open ODS views is a technical modeling task that occurs during the Realization phase, not the Business Blueprint phase. This phase focuses on implementing the solution based on the requirements gathered earlier.

* Activate SAP business content objects that comply with the layered scalable architecture (LSA++) architecture (Option C): Activating SAP business content objects is also part of the Realization phase.

While LSA++ principles guide the overall architecture, the Business Blueprint phase focuses on understanding requirements rather than implementing technical components.

* Purpose: The Business Blueprint phase aims to document the business processes, KPIs, and reporting requirements that will drive the SAP BW/4HANA implementation.

* Deliverables:

* Business process documentation.

* List of KPIs and reporting requirements.

* Information models and data flow diagrams.

* SAP Activate Methodology for SAP BW/4HANA: This methodology provides a structured approach to implementing SAP BW/4HANA, including detailed guidance on the Business Blueprint phase.

* Link: SAP Activate for SAP BW/4HANA

* SAP Best Practices for SAP BW/4HANA Implementation: This resource outlines the tasks and deliverables for each phase of the implementation, including the Business Blueprint phase.

Correct Answers: Why Other Options Are Incorrect: Key Points About the Business Blueprint Phase:

References to SAP Data Engineer - Data Fabric: By focusing on analyzing KPIs and collecting information requirements, you ensure that the SAP BW/4HANA solution is aligned with the business needs and delivers value to stakeholders.
