

# C-BW4H-2505 Valid Test Vce Free, Preparation C-BW4H-2505 Store

BONUS!!! Download part of FreePdfDump C-BW4H-2505 dumps for free: <https://drive.google.com/open?id=1lu48K7xMIZewB53dhEWkcFsGJDQ9dvqo>

These questions will familiarize you with the C-BW4H-2505 exam format and the content that will be covered in the actual test. You will not get a passing score if you rely on outdated practice questions. FreePdfDump has assembled a brief yet concise study material that will aid you in acing the SAP Certified Associate - Data Engineer - SAP BW/4HANA (C-BW4H-2505) exam on the first attempt. This prep material has been compiled under the expert guidance of 90,000 experienced SAP professionals from around the globe.

## SAP C-BW4H-2505 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW</li><li>4HANA: It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Data Acquisition into SAP BW</li><li>4HANA: This section tests how Data Engineers manage data integration into SAP BW</li><li>4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW</li><li>4HANA: It involves handling data structures used for organizing, storing, and accessing analytical data.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW</li> <li>• 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW</li> <li>• 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Native SAP HANA Modeling: This section evaluates the ability of SAP Consultants to describe and apply native modeling options in SAP HANA. It emphasizes understanding how to build optimized data structures directly within the HANA platform</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• SAP BW</li> <li>• 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW</li> <li>• 4HANA. It focuses on designing scalable, high-performing data models.</li> </ul>

## Preparation C-BW4H-2505 Store, Test C-BW4H-2505 Objectives Pdf

Are you still feeling stressful to the increasing difficulty of the C-BW4H-2505 exam? If the answer is yes, you may wish to spend a little time learning our C-BW4H-2505 study materials. You will think this is the most correct thing you did for preparing for the C-BW4H-2505 Exam. Our C-BW4H-2505 exam guide can help you pass the exam more efficiently. Just click to the free demos and you will get the exam questions to have a check!

### SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q75-Q80):

#### NEW QUESTION # 75

What does a Composite Provider allow you to do in SAP BW/4HANA? Note: There are 3 correct answers to this question.

- A. Join two ABAP CDS views.
- B. Integrate SAP HANA calculation views.
- C. Create new calculated fields.
- D. Define new restricted key figures.
- E. Combine InfoProviders using Joins Unions.

**Answer: C,D,E**

Explanation:

A Composite Provider in SAP BW/4HANA is a powerful modeling object that allows you to combine multiple InfoProviders (such as DataStore Objects, InfoCubes, and others) into a single logical entity for reporting and analytics purposes. It provides flexibility in integrating data from various sources within the SAP BW

/4HANA environment. Below is a detailed explanation of why the correct answers are B, C, and E:

\* Incorrect: While ABAP CDS (Core Data Services) views are a part of the SAP HANA ecosystem, Composite Providers in SAP BW/4HANA do not directly support joining ABAP CDS views. Instead, Composite Providers focus on combining InfoProviders like ADSOs (Advanced DataStore Objects), InfoCubes, or other Composite Providers. If you need to integrate ABAP CDS views, you would typically use SAP HANA calculation views or expose them via external tools.

Option A: Join two ABAP CDS views

\* Correct: One of the key capabilities of a Composite Provider is the ability to create calculated fields.

These fields allow you to define new metrics or attributes based on existing fields from the underlying InfoProviders. For example, you can calculate a profit margin by dividing revenue by cost. This functionality enhances the analytical capabilities of the Composite Provider.

Option B: Create new calculated fields

\* Correct: Composite Providers also allow you to define restricted key figures. Restricted key figures are used to filter data based on specific criteria, such as restricting sales figures to a particular region or product category. This feature is essential for creating focused and meaningful reports.

Option C: Define new restricted key figures

\* Incorrect: While SAP HANA calculation views are widely used for modeling in the SAP HANA environment, Composite Providers in SAP BW/4HANA do not natively integrate these views. Instead, SAP BW/4HANA focuses on its own modeling objects like ADSOs and InfoCubes. However, you can use Open ODS views to integrate SAP HANA calculation views into the BW/4HANA environment.

Option D: Integrate SAP HANA calculation views

\* Correct: Composite Providers are specifically designed to combine multiple InfoProviders using joins and unions. Joins allow you to merge data based on common keys, while unions enable you to append data from different sources. This flexibility makes Composite Providers a central tool for integrating data across various InfoProviders in SAP BW/4HANA.

Option E: Combine InfoProviders using Joins Unions

\* SAP BW/4HANA Modeling Guide: The official documentation highlights the role of Composite Providers in combining InfoProviders and enabling advanced calculations and restrictions.

\* SAP Help Portal: The portal provides detailed information on the differences between Composite Providers and other modeling objects, emphasizing their integration capabilities.

\* SAP Data Fabric Architecture: In the context of SAP Data Fabric, Composite Providers align with the goal of providing unified access to data across diverse sources, ensuring seamless integration and analysis.

References to SAP Data Engineer - Data Fabric Concepts By understanding the functionalities and limitations of Composite Providers, you can effectively leverage them in SAP BW/4HANA to meet complex business requirements.

## NEW QUESTION # 76

Which request-based deletion is possible in a DataMart DataStore object?

- A. Any request in the active data table
- B. Only the most recent request in the active data table
- C. Only the most recent non-activated request in the inbound table
- D. Any non-activated request in the inbound table

**Answer: B**

Explanation:

In SAP BW/4HANA, a DataMart DataStore Object (DSO) is used to store detailed data for reporting and analysis. Request-based deletion allows you to remove specific data requests from the DSO. However, there are restrictions on which requests can be deleted, depending on whether they are in the inbound table or the active data table. Below is an explanation of the correct answer:

A). Only the most recent request in the active data table In a DataMart DSO, request-based deletion is possible only for the most recent request in the active data table. Once a request is activated, it moves from the inbound table to the active data table. To maintain data consistency, SAP BW/4HANA enforces the rule that only the most recent request in the active data table can be deleted. Deleting older requests would disrupt the integrity of the data.

\* Steps to Delete a Request:

\* Navigate to the DataStore Object in the SAP BW/4HANA environment.

\* Identify the most recent request in the active data table.

\* Use the request deletion functionality to remove the request.

\* The SAP BW/4HANA Data Modeling Guide explicitly states that request-based deletion in the active data table is restricted to the most recent request to ensure data consistency.

Incorrect Options B. Any non-activated request in the inbound table Non-activated requests reside in the inbound table and can be deleted individually without restriction. However, this option is incorrect because the question specifically refers to the active data table, not the inbound table.

Reference: The SAP BW/4HANA documentation confirms that non-activated requests in the inbound table can be deleted freely, but this is outside the scope of the question.

C). Only the most recent non-activated request in the inbound table This statement is incorrect because there is no restriction on deleting non-activated requests in the inbound table. All non-activated requests in the inbound table can be deleted individually, regardless of their order.

Reference: The SAP BW/4HANA Data Modeling Guide clarifies that non-activated requests in the inbound table do not have the

same restrictions as those in the active data table.

D). Any request in the active data table  
This option is incorrect because SAP BW/4HANA does not allow the deletion of any request in the active data table. Only the most recent request can be deleted to maintain data integrity.

Reference: The SAP BW/4HANA Administration Guide explicitly prohibits the deletion of arbitrary requests in the active data table, as it could lead to inconsistencies.

ConclusionThe correct answer regarding request-based deletion in a DataMart DataStore Object is:Only the most recent request in the active data table.

This restriction ensures that data consistency is maintained while still allowing users to remove the latest data if needed.

### NEW QUESTION # 77

You notice that an SAP ERP ODP\_SAP DataSource is delivering incorrect values into the first persistent data layer in SAP BW/4HANA  
Which options do you have to analyze a potential extractor issue? Note: There are 2 correct answers to this question.

- A. Use the program RODPS\_REPL\_TEST in SAP ERP.
- B. Use the transaction ODQMON (Monitor Delta Queues) in SAP BW/4HANA.
- C. Use the transaction RSA3 (Extractor checker) in SAP ERP.
- D. Check entries in the table RSDDSTATEXTRACT in SAP ERP.

**Answer: A,C**

Explanation:

SAP BW/4HANA Project and Modeling Process

### NEW QUESTION # 78

For a report, you would like to highlight the deviation from predefined threshold values for a key figure.

Which BW query feature do you use?

- A. Key figure property
- B. Formula cell
- C. Condition
- D. Exception

**Answer: D**

### NEW QUESTION # 79

You define a remote subscription of type UPSERT in an SAP HANA Smart Data Integration (SDI) real-time update scenario. Which fields are added to the DataSource automatically? Note: There are 3 correct answers to this question.

- A. SDILCHANGE\_TIME
- B. SDILRECORD\_MODE
- C. SDI\_LENTITY\_COUNTER
- D. SDILCHANGE\_TYPE
- E. SDILCHANGE\_SEQUENCE

**Answer: A,D,E**

### NEW QUESTION # 80

.....

SAP Certified Associate - Data Engineer - SAP BW/4HANA C-BW4H-2505 exam dumps is a surefire way to get success. FreePdfDump has assisted a lot of professionals in passing their C-BW4H-2505 test. In case you don't pass the SAP Certified Associate - Data Engineer - SAP BW/4HANA C-BW4H-2505 exam after using C-BW4H-2505 pdf questions and practice tests, you have the full right to claim your full refund. You can download and test any C-BW4H-2505 Exam Questions format before purchase. So don't get worried, start C-BW4H-2505 exam preparation and get successful.
