SAP Certified Associate - Database Administrator - SAP HANA Sample Questions (Q35-Q40):

NEW QUESTION # 35

How do you initiate a recovery of your SAP HANA Cloud, SAP HANA database instance?

- A. In SAP HANA Cloud Central, select the Start Recovery option and set the timestamp.
- B. In an SAP BTP CLI, execute the RECOVER DATABASE command with the timestamp.
- C. In the SAP HANA cockpit, select the Start Recovery option and set the timestamp.
- D. In an SQL Console, execute the RECOVER DATABASE statement with the timestamp.

Answer: C

Explanation:

To initiate a recovery of your SAP HANA Cloud, SAP HANA database instance, you use:

* In the SAP HANA cockpit, select the Start Recovery option and set the timestamp: This method provides a user-friendly interface through the SAP HANA cockpit for administrators to precisely control the recovery process, including the selection of specific recovery points based on timestamps.

References=The process for initiating database recovery through the SAP HANA cockpit is detailed in SAP HANA Cloud administration and recovery documentation, which includes step-by-step instructions for performing recoveries.

Backup and Recovery

NEW QUESTION # 36

Which storage tier is used to manage rarely changing, persistent data?

- A. Native storage extension
- B. Replica
- C. Data lake
- D. WORM device

Answer: A

NEW QUESTION # 37

Which user is assigned by default when you provision a data lake in SAP HANA Cloud?

- A. HDLADMIN
- B. COCKPIT MONITOR
- C. DBADMIN
- D. SYSTEM

Answer: A

Explanation:

In the context of provisioning a data lake in SAP HANA Cloud, the default user assigned is HDLADMIN. This user is specifically designed to manage and operate within the data lake environment, providing administrative privileges necessary for managing the data lake's database objects and configurations.

References=The role and capabilities of the HDLADMIN user are typically outlined in SAP HANA Cloud data lake documentation and provisioning guides, which specify default users and their roles within different SAP HANA Cloud scenarios.

Database Administration

NEW QUESTION # 38

Which services can you stop in the SAP HANA cockpit from the SYSTEMDB Manage Services app?

Note: There are 2 correct answers to this question.

- A. Index server
- B. XS engine
- C. Compile server

- Answer: C,D**

Which audit trail target is used by default in the SAP HANA Cloud, SAP HANA database?

- Answer: D**
