### C-S4CPB-2502 Latest Exam Pattern | C-S4CPB-2502 Real Testing Environment

With the advent of the era of knowledge-based economy, a man without a sound academic background can hardly accomplish anything. But it is not an uncommon phenomenon that many people become successful without a good education. People can achieve great success without an outstanding education and that the C-S4CPB-2502 qualifications a successful person needs can be acquired through the study to get some professional certifications. So it cannot be denied that suitable C-S4CPB-2502 study materials do help you a lot; thus we strongly recommend our C-S4CPB-2502 study materials for several following reasons.

### SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Prepare
- B. Deploy
- C. Explore
- **D. Realize**

**Answer: D**

Explanation:

The SAP Activate methodology outlines the phases for implementing SAP S/4HANA Cloud Public Edition.

One crucial phase is the 'Explore' phase. During this phase, consultants work closely with the business to understand its processes and requirements through Fit-to-Standard workshops. These workshops are designed to identify the best fit of the standard SAP S/4HANA processes with the business's needs. It's a collaborative effort to explore the capabilities of SAP S/4HANA Cloud and configure the business processes accordingly.

This phase is fundamental in ensuring that the solution is tailored to meet the specific needs of the business, setting the foundation for a successful implementation.

#### NEW QUESTION # 58

Which tasks are mandatory before you can migrate data for a specific object? Note: There are 2 correct answers to this question.

- **A. Predecessor objects have been migrated**
- **B. Permission to migrate the data has been assigned**
- C. All previous migration projects are in the "Finished" status
- D. You select the same migration method previously used for other objects

**Answer: A,B**

Explanation:

Before you can migrate data for a specific object, you need to ensure that the following tasks are completed:

\* Predecessor objects have been migrated: Some migration objects depend on other migration objects that need to be migrated first. For example, before you can migrate sales orders, you need to migrate customers, products, and pricing conditions. You can check the dependencies of migration objects in the Migration Cockpit or in the Migration Object Modeler<sup>12</sup>.

\* Permission to migrate the data has been assigned: In addition to having permission to access the Migrate Your Data app, you need permission to migrate each type of data. This is because the Migration Cockpit tool uses the same APIs and technical checks that would be done if you were to create a new data value through the respective application. For example, if you need to create a new bank record in your system, you would use the application, Manage Banks - Master Data. The app would present you with several fields capturing information about the new bank to create the record in your system. Now if you need to create 1,000 banks, it wouldn't be feasible to create each through the Manage Banks - Master Data app one-by-one. Therefore, you need to have the permission to use the Manage Banks - Master Data app in order to migrate bank data using the Migration Cockpit<sup>3</sup>.

The other tasks are not mandatory before you can migrate data for a specific object. You can select different migration methods for different objects, depending on your source system and data format. You can also have multiple migration projects in progress at the same time, as long as they do not contain the same migration objects<sup>4</sup>. /4HANA Cloud, Public Edition

### NEW QUESTION # 59

What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question

- A. Fiscal year variant
- B. Configuration activities
- C. Group currency
- D. Scoping

Answer: A,C

### NEW QUESTION # 60

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create business processes with a high number of people involved in a pre-defined sequence
- B. To create very simple release or approval procedures
- C. To create cross-product workflow procedures
- D. To create standard procedures from SAP Signavio Process Navigator
- E. To create complex, repeated work processes with iterative cycles

Answer: A,C,E

### NEW QUESTION # 61

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Change approval thresholds.
- B. Add new sales organizations.
- C. Modify building blocks.
- D. Add blocking reasons for billing.
- E. Create new scope items.

Answer: A,B,D

Explanation:

In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:

\* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.
