SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition C-S4CPB-2502 Prüfungsfragen mit Lösungen (Q60-Q65):

60. Frage

To which partner role does the IT Contact first assign access permission for SAP Cloud ALM?

- **A. Project manager**
- B. Communication contact
- C. Lead configuration expert
- D. LoB configuration expert

Antwort: A

Begründung:

The IT Contact is the person who receives the welcome email from SAP and is responsible for setting up the initial access to SAP Cloud ALM. The IT Contact needs to eventually provide all project team members access to SAP Cloud ALM, but it's most important the partner and customer project managers are given access first, because they are responsible for setting up the implementation project and assigning tasks to the other project team members¹. The project manager is a partner role that has the authorization to create and manage projects in SAP Cloud ALM². References = Setting up the Implementation Project in SAP Cloud ALM, Teams, Roles, and Access Restrictions | SAP Help Portal In the context of SAP Cloud ALM (Application Lifecycle Management), the IT Contact is typically responsible for the initial setup and assignment of roles within the project. The first role to which the IT Contact often assigns access permission is:

* Project manager: The project manager plays a crucial role in overseeing the SAP project's planning, execution, and completion. By assigning access permission to the project manager first, the IT Contact ensures that the project manager has the necessary tools and insights to manage the project effectively within SAP Cloud ALM. This access allows the project manager to monitor project progress, manage resources, and make informed decisions, facilitating successful project execution and alignment with business goals.

Granting the project manager access to SAP Cloud ALM is a strategic decision that empowers them to lead the project efficiently, leveraging the platform's capabilities for project management, monitoring, and collaboration.

61. Frage

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- **A. Multidimensional Reports**
- **B. SAC Stories**
- **C. Review Booklets**
- D. Object Views
- E. Lumira Dashboards

Antwort: A,B,C

Begründung:

The Manage KPIs and Reports app is a single platform for creating all analytical applications using KPIs, reports, multidimensional reports, and stories. You can create applications that can be launched directly from SAP Fiori launchpad. The app is integrated with SAP Analytics Cloud, which allows you to create and view stories. A story is a presentation-style document that uses charts, tables, and other visualizations to display data insights. A review booklet is a collection of stories that can be used to share information with stakeholders. A multidimensional report is a type of report that allows you to analyze data from multiple dimensions and measures. You can create and view multidimensional reports from the app. An object view is a type of report that displays data for a single object, such as a customer or a product. You cannot create or view object views from the app. A Lumira dashboard is a type of dashboard that uses SAP Lumira to create and display data visualizations. You cannot create or view Lumira dashboards from the app. References = Manage KPIs and Reports, Stories, Review Booklets, [Multidimensional Reports]

62. Frage

You have assigned a deployment target in SAP Central Business Configuration, but have not yet completed the Confirm Scoping milestone.

Which of the following tasks can you complete? Note: There are 2 correct answers to this question.

- A. Define the group currency.
- **B. Rename the deployment target.**
- **C. Assign a different deployment target.**
- D. Create a company code.

Antwort: B,C

63. Frage

Which type of testing should be done after a release upgrade has occurred?

- A. String tests
- **B. Regression tests**
- C. Integration tests
- D. User Acceptance tests

Antwort: B

64. Frage

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. Digital Discovery Assessment
- B. SAP Signavio Journey Modeler
- C. Business Driven Configuration Questionnaire
- **D. SAP Signavio Process Collaboration Hub**

Antwort: D

Begründung:

A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:

* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps, variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.
