What can the user do?

- A. Use the search function to find the app.
- B. Assign a launchpad space to the business role.
- C. Create a page and assign it to the launchpad space.
- D. Assign a different business role that provides access.

Answer: A

NEW QUESTION # 39
In which application can you see the available business context capacity remaining for extension items?

- A. Custom Reusable Elements app
- B. Extensibility Cockpit app
- C. Extensibility Inventory app
- D. Extensibility Explorer app

Answer: B

Explanation:
The Extensibility Cockpit app within SAP S/4HANA Cloud Public Edition is a central tool for managing and monitoring the extensibility aspects of the system. It provides an overview of the extension items created, including custom fields, custom business objects, and other extension elements. Importantly, it also shows the available business context capacity remaining for these extension items, which is crucial for ensuring that the system's extensibility is managed within the provided limits. This helps in planning and managing customizations effectively, ensuring that the system remains scalable and performant.

NEW QUESTION # 40
What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create standard procedures from SAP Signavio Process Navigator
- B. To create cross-product workflow procedures
- C. To create very simple release or approval procedures

- D. To create complex, repeated work processes with iterative cycles
- E. To create business processes with a high number of people involved in a pre-defined sequence

Answer: B,D,E

Explanation:
SAP S/4HANA Cloud Business Workflows are designed to enhance and automate business processes within the organization. They serve multiple purposes:
* To create complex, repeated work processes with iterative cycles: These workflows are designed to handle intricate processes that occur regularly within the business environment, allowing for automation and efficiency in tasks that require repetition and involve multiple steps or conditions.
* To create cross-product workflow procedures: This capability allows for the integration of various SAP products and services into a cohesive workflow, ensuring smooth and interconnected operations across different aspects of the business. It enables workflows that span across different SAP applications and solutions, providing a unified approach to managing business processes.
* To create business processes with a high number of people involved in a pre-defined sequence: SAP S
/4HANA Cloud Business Workflows are capable of handling processes that involve many participants, orchestrating the sequence of tasks to be completed by different individuals or departments. This ensures that each step of the process is executed in the right order by the right person, enhancing collaboration and efficiency.
