## Latest Braindumps C-S4CPB-2508 Ppt | Valid C-S4CPB-2508 Test Guide

Many customers may doubt the quality of our C-S4CPB-2508 learning quiz since they haven't tried them. But our C-S4CPB-2508 training engine is reliable. What you have learnt on our C-S4CPB-2508 exam materials are going through special selection. The core knowledge of the real exam is significant. With our guidance, you will be confident to take part in the C-S4CPB-2508 Exam. Our C-S4CPB-2508 study materials will be your good assistant. Put your ideas into practice.

## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q41-Q46):

**NEW QUESTION # 41**
How does an implementation consultant support customer experts during Fit-to-Standard workshops? Note: There are 2 correct answers to this question

- A. Conduct end-user training on active scope items.

- B. Determine set up instructions for customer-driven integrations.
- C. Demonstrate SAP Best Practice business processes in the starter system.
- D. Highlight areas that require configuration or customization decisions.

**Answer: C,D**

Explanation:
During the Fit-to-Standard workshops, an implementation consultant supports customer experts by doing the following:
* Demonstrate SAP Best Practice business processes in the starter system. The consultant shows the customer experts how the standard processes work in SAP S/4HANA Cloud Public Edition and how they fit their business needs1.
* Highlight areas that require configuration or customization decisions. The consultant identifies and documents the gaps between the standard processes and the customer requirements, and proposes solutions that are aligned with the cloud mindset1.
The other options are not the correct ways to support customer experts during the Fit-to-Standard workshops. Determining set up instructions for customer-driven integrations is done in the integration phase, after the Fit-to-Standard workshops are completed2.
Conducting end-user training on active scope items is done in the deploy phase, before the go-live of the system3. References = Conducting Fit-to-Standard Workshops - SAP Learning, SAP S/4HANA Cloud Public Edition - Integration, Deploying SAP S/4HANA Cloud Public Edition.

## NEW QUESTION # 42

What defines the organizational entities that are required in SAP Central Business Configuration?
Note:
There are 2 correct answers to this question

- A. Added partner content
- B. The selected scope
- C. System consistency checks
- D. The selected deployment target

**Answer: B,D**

Explanation:
The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.
These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S
/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S
/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

## NEW QUESTION # 43

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.
How would you troubleshoot? Note: There are 3 correct answers to this question

- A. Check the Role Maintenance app.
- B. Check the restrictions for the role.
- C. Check the business role template.
- D. Check the business catalogues assigned to the role.
- E. Check the space and page(s) assigned to the role.

**Answer: B,D,E**

Explanation:
When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:
* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.
* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.
* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.

## NEW QUESTION # 44
Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Responsible Design and Production
- B. SAP Sustainability Footprint Management
- C. SAP Green Token
- D. SAP Sustainability Control Tower

**Answer: D**

Explanation:
SAP Sustainability Control Tower is a cloud-based solution that enables customers to record, report, and act on their ESG data. It provides a comprehensive and consistent view of the ESG performance across the enterprise and the value chain. It also supports automated, auditable, and compliant reporting based on global standards and frameworks. SAP Sustainability Control Tower helps customers to embed sustainability into their core business processes and make balanced decisions that support their sustainability goals. References = SAP S/4HANA Cloud, Public Edition - All Learning Journeys > Implementing SAP S
/4HANA Cloud Public Edition > Unit 3: Sustainability and ESG Reporting > Topic 3.1: Introduction to SAP Sustainability Control Tower. SAP Cloud for Sustainable Enterprises: Taking Action Together. SAP Sustainability Control Tower: Data Foundation for ESG.

## NEW QUESTION # 45
What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. SAP Signavio Process Collaboration Hub
- B. Digital Discovery Assessment
- C. SAP Signavio Journey Modeler
- D. Business Driven Configuration Questionnaire

**Answer: B**
