SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q24-Q29):

NEW QUESTION # 24

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Requirements app
- B. Business Driven Configuration Questionnaire
- C. SAP Cloud ALM Processes app
- D. Availability and Dependencies of Solution Processes Excel

Answer: B

Explanation:
The Business Driven Configuration Questionnaire is a tool that helps you collect the values that are entered into the configuration activities in SAP Central Business Configuration. It is a web-based questionnaire that guides you through the configuration settings for each solution process. You can use the questionnaire to enter the values for the configuration activities, review the values, and export them to an Excel file. You can then import the Excel file to SAP Central Business Configuration and apply the values to the configuration activities. NEW QUESTION # 25

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.
- B. Review the integration requirements collected from the Digital Discovery Assessment.
- C. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- D. Upload customer master data in the Starter system using migration templates.

Answer: A,B

Explanation:
Before the first Fit-to-Standard workshop, the consultant should do the following activities:
* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items1.
* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios2.
The consultant should NOT do the following activities before the first Fit-to-Standard workshop:
* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master

data in the Quality system after the Fit-to- Standard workshop, using the SAP S/4HANA Migration Cockpit3.
* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.

NEW QUESTION # 26

How can you define the relationship between business roles and business catalogs?

- A. A business catalog is a collection of one or more business roles.
- B. A business role is a collection of one or more business catalogs.
- C. A business role restricts access to one or more business catalogs.
- D. A business catalog restricts access to one or more business roles.

Answer: B

NEW QUESTION # 27

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. SAP Fiori application extensions
- B. Known integration requirements
- C. Target customer go-live date
- D. Business role requirements

Answer: B,D

Explanation:
A completed Digital Discovery Assessment is a comprehensive evaluation conducted during the planning stages of an SAP S/4HANA Cloud Public Edition implementation. This assessment captures various critical aspects of the project to ensure a tailored and efficient approach. Two key elements captured in this assessment are 'Known integration requirements' and 'Business role requirements'. Understanding the integration requirements is essential for ensuring seamless connectivity and data flow between SAP S
/4HANA Cloud and other systems. Identifying business role requirements is crucial for aligning the system's capabilities with the specific needs and responsibilities of different user groups within the organization. Both elements are pivotal for designing a solution that is both integrated and user-centric.

NEW QUESTION # 28

You want to restrict end user activities for an application.
Where would you look up the business catalog(s) that grant access to the app?

- A. In the SAP Fiori Apps Reference Library
- B. In the Define Your Scope app
- C. In the Configure Your Solution app
- D. In the App Finder app

Answer: A

Explanation:
The SAP Fiori Apps Reference Library is a comprehensive online library of all available SAP Fiori apps. It provides information about the app features, technical data, configuration, and implementation. You can use the SAP Fiori Apps Reference Library to look up the business catalog(s) that grant access to an app by following these steps:
* Go to the SAP Fiori Apps Reference Library website and log in with your SAP credentials.

* In the search bar, enter the name or ID of the app you want to restrict access to, and click the search icon.
* In the search results, click on the app tile to open the app details page.
* On the app details page, scroll down to the Implementation Information section and expand the Configuration tab.
* Under the Configuration tab, you will see the Business Catalog field, which lists the business catalog(s) that contain the app. You can click on the business catalog ID to view more details about it, such as the business roles, business groups, and other apps that are assigned to it.
