Knowledge SAP C-S4CPR-2502 Points | Real C-S4CPR-2502 Question

As the leader in the market for over ten years, our SAP C-S4CPR-2502 practice engine owns a lot of the advantages. Our C-S4CPR-2502 study guide is featured less time input, high passing rate, three versions, reasonable price, excellent service and so on. All your worries can be wiped out because our SAP C-S4CPR-2502 learning quiz is designed for you. We hope that that you can try our free trials before making decisions.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Sourcing and Procurement Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. SAP Fiori
- B. SAP Business Suite
- C. Core Data Services
- D. SAP HANA

Answer: C

Explanation:

Core Data Services (CDS) in SAP S/4HANA provides a universal language to read and process data consistently across different applications. Below is an explanation of the correct answer:

* Core Data Services (B):CDS enables the creation of semantically rich data models that can be consumed by various applications, regardless of their underlying technologies. It provides a unified way to define and access data, ensuring consistency and reusability.

* SAP Business Suite (A):SAP Business Suite refers to a suite of enterprise applications and is not a layer for universal data access.

* SAP HANA (C):SAP HANA is the underlying database platform that powers SAP S/4HANA. While it supports advanced data processing, it does not provide the abstraction layer offered by CDS.

* SAP Fiori (D):SAP Fiori is a user interface technology for building intuitive apps. It relies on CDS views for data access but does not serve as a universal data language itself.

NEW QUESTION # 63

What does the material type in a material (product) master data control?

- A. Price unit that is used for a material
- B. Procurement type that is allowed for a material

- C. Organizational data that is allowed for a material
- D. Automatic creation of a purchase requisition with a material

Answer: B

Explanation:

The material type in the material (product) master data plays a critical role in controlling various aspects of material management in SAP S/4HANA Cloud Public Edition. Specifically, it determines the procurement type that is allowed for a material.

* Procurement type that is allowed for a material (Option B): The material type defines whether a material can be procured externally (from vendors), internally (produced in-house), or both. For example, raw materials typically allow external procurement, while finished goods may allow internal production. The SAP Material Master Data Guide confirms this functionality.

* A. Price unit that is used for a material: The price unit is controlled by pricing conditions and material valuation settings, not by the material type.

* C. Organizational data that is allowed for a material: Organizational data (e.g., plant-specific or storage location-specific data) is defined during the creation of the material master record, not by the material type.

* D. Automatic creation of a purchase requisition with a material: The automatic creation of purchase requisitions is controlled by MRP (Material Requirements Planning) settings and procurement parameters, not directly by the material type.

* SAP Material Master Data Guide: Describes the role of material types in controlling procurement and other material-related settings. <https://help.sap.com>

* SAP S/4HANA Cloud Procurement Guide: Provides details on how material types influence procurement processes.

Why Option B is Correct: Why the Other Options Are Incorrect: Key References:

NEW QUESTION # 64

What are some characteristics of the SAP S/4HANA Migration Cockpit? Note: There are 2 correct answers to this question.

- A. Extensibility using the Legacy System Migration Workbench
- B. Combining the local and remote schema approaches into one migration project
