Exam C-S4EWM-2023 Lab Questions, Best C-S4EWM-2023 Preparation Materials

Are you tired of the lives of ordinary light? Do you want to change yourself? Don't mention it, our DumpStillValid is at your service anytime. SAP C-S4EWM-2023 certification test is very popular in the IT field. A majority of people want to have the SAP C-S4EWM-2023 certification. Through SAP C-S4EWM-2023 test, you will have a better and easier life. IT talent is always respectable. DumpStillValid will give you the opportunity to pass SAP C-S4EWM-2023 Exam. DumpStillValid SAP C-S4EWM-2023 exam dumps fit in with our need. High quality certification training materials is very useful. 100% guarantee to pass SAP C-S4EWM-2023 exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q38-Q43):

NEW QUESTION # 38

To which object do you assign the replenishment method?

- A. Storage type
- B. Document type
- C. Document category
- D. Warehouse process type

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Replenishment in SAP EWM moves stock from reserve to picking areas. Option A ("Storage type") is correct because the replenishment method (e.g., automatic, planned) is assigned to a storage type in SPRO: SCM Extended Warehouse Management > Goods Issue Process > Replenishment > Define Replenishment Control per Storage Type. This determines how replenishment is triggered for that area. Options B, C, and D (document-related or process type) are not directly linked to replenishment method assignment.

NEW QUESTION # 39

How are warehouse orders sorted for automatic assignment to a resource? Note: There are 2 correct answers to this question.

- A. By execution priority
- B. By mode
- C. By resource utilization
- D. By latest starting date

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Warehouse order sorting for resource assignment in SAP EWM uses priority criteria. Option A ("By latest starting date") is correct as it ensures timely execution, and option D ("By execution priority") is correct because priority levels (e.g., high, low) influence assignment, both set in SPRO: SCM Extended Warehouse Management > Resource Management > Define Sort Rules. Option B (utilization) and option C (mode) are not standard sorting parameters.

NEW QUESTION # 40

Your customer needs a new warehouse order creation rule. Which criteria can you use to create a filter at item level? Note: There are 3 correct answers to this question.

- A. Time
- B. Weight
- C. Number of handling units
- D. Volume
- E. Number of items

Answer: A,B,D

Explanation:

Warehouse order creation rules can filter items at the item level based on the following criteria:

* A. Time:

* Items can be filtered by the time parameter to align with time-sensitive processes.

* C. Volume:

* The volume of items is used to group or limit tasks based on space considerations.

* D. Weight:

* Weight is an important criterion for creating manageable warehouse orders, especially for heavy items.

Incorrect Options:

* B: Number of items is used at the warehouse task level, not for item-level filtering.

* E: Handling units pertain to task execution and not item-level filtering.

References:

* SAP Help Portal: Warehouse Order Creation Rules

* SAP EWM Documentation: Filters for Item-Level Rules

NEW QUESTION # 41

In a decentralized EWM, what can be elements of an inspection rule? Note: There are 2 correct answers to this question.

- A. Sample drawing procedure
- B. Work center
- C. EWM stock type
- D. Properties

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In decentralized EWM with QM integration, inspection rules define quality checks. Option A ("Sample drawing procedure") is correct as it specifies sampling logic, and option B ("EWM stock type") is correct because it determines the stock to inspect (e.g., unrestricted), both configured in SPRO: SCM Extended Warehouse Management > Quality Management > Define Inspection Rules. Option C (work center) is production-related, and option D (properties) is too vague and not a standard element.

NEW QUESTION # 42

Which assignment do you make to create external process steps in process-oriented storage control?

- A. External process step to a warehouse storage type
- B. External process step to a storage process
- C. External process step to a warehouse process type
- D. External process step to an internal process step

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Process-oriented storage control (POSC) in SAP EWM manages complex processes with internal and external steps (e.g., deconsolidation, VAS). Option B ("External process step to a storage process") is correct because external steps (e.g., quality check) are assigned to a storage process in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Process-Oriented Storage Control > Define Storage Process, linking them to the overall flow. Options A, C, and D are incorrect as they don't align with POSC configuration logic.

NEW QUESTION # 43

.....

We are proud that we have engaged in this career for over ten years and helped tens of thousands of the candidates achieve their C-S4EWM-2023 certifications, and our C-S4EWM-2023 exam questions are becoming increasingly obvious degree of helping the exam candidates with passing rate up to 98 to 100 percent.
