SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management practice exam guide & C-S4EWM-2023 actual test

cram

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, our C-S4EWM-2023 study materials have been designed to serve most of the office workers who aim at getting a C-S4EWM-2023 certification. Our C-S4EWM-2023 Test Guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our C-S4EWM-2023 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

SAP C-S4EWM-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	Warehouse Structure, Resource Management and SAP EWM Master Data: This topic encompasses defining the warehouse structure and setting up resource management, along with creating SAP EWM master data like storage bins and products, packaging specifications, supply chain units, and business partners.
Topic 2	Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 3	Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 4	Inbound Processes (Value Added Services, Cross-docking, Quality Management): This topic includes executing inbound processes with value added services (VAS) or deconsolidation, and setting up deliveries for cross-docking (CD) or quality inspection (QIE).
Topic 5	System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 6	Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.
Topic 7	Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.
Topic 8	Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 9	Managing Clean Core: It covers evaluating and applying clean core principles to ERP to maximize business process agility, reduce adaptation efforts, and accelerate innovation.
Topic 10	Outbound Processes (Wave Management, Cross-docking, Production Integration): This topic covers combining outbound deliveries using wave management, packing and kitting in outbound processes, and staging products for production.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q57-Q62):

NEW QUESTION # 57

What can you control with an activity area? Note: There are 2 correct answers to this question.

- A. The warehouse order creation rules to be used
- B. The interim bin for layout-oriented storage control
- C. The doors that can be connected to a staging area
- D. The area in which a resource will work in the warehouse

Answer: A,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Activity areas in SAP EWM manage warehouse operations. Option A ("The warehouse order creation rules to be used") is correct as WOCRs can be linked to activity areas, and option D ("The area in which a resource will work in the warehouse") is correct because resources are assigned tasks within specific activity areas, both configured in SPRO: SCM Extended Warehouse Management > Cross-Process Settings > Warehouse Order > Define Creation Rules. Option B (doors) is yard-related, and option C (interim bin) is POSC-specific.

NEW QUESTION # 58

What is the purpose of a business system in the system integration? Note: There are 2 correct answers to this question.

- A. It is connected to a logical system, as in warehouse requests only the business system is stored.
- B. It can be used to separate materials coming from two different systems.
- C. It defines the RFC parameters for the integration.
- D. It allows the mapping of document type and item type depending on the source system.

Answer: A,B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The business system in EWM integration represents the source or target system (e.g., ERP) in the landscape. Option A ("It is connected to a logical system...") is correct because it links to a logical system via RFC, and warehouse requests store the business system for tracking, configured in SPRO: SCM Extended Warehouse Management > Interfaces > Define Business System. Option C ("It can be used to separate materials...") is correct as it differentiates stock origins in multi-system scenarios. Option B is incorrect because RFC parameters are defined separately, and option D is handled by document type mapping, not the business system itself.

NEW QUESTION # 59

Which of the following can you include in a storage type search sequence for stock removal? Note: There are 2 correct answers to this question.

- A. A list of storage type groups
- B. A list of storage types
- C. A list of storage bin types
- D. A list of storage sections

Answer: C,D

Explanation:

Storage Type Search Sequence for Stock Removal

* Storage Sections (B): Subdivisions within a storage type, allowing finer control over stock search.

* Storage Bin Types (C): Defines specific bin characteristics, aiding precise stock location.

Excluded Options

* Storage Type Groups (A): Relevant for search sequence during putaway, not removal.

* Storage Types (D): Included indirectly through sections and bins but not directly in search sequences.

SAP S/4HANA Cloud Private Edition Reference

* Refer to Storage Type Search Sequence Setup in SAP EWM Help for detailed steps.

NEW QUESTION # 60

Which option do you have in the assignment of storage bin to an activity area?

- A. An activity area must be created automatically for a storage type.
- B. A storage bin can be assigned to only one activity area.
- C. Storage bins from different storage types can be assigned to the same activity area.
- D. Storage bins must be manually assigned to an activity area.

Answer: C

NEW QUESTION # 61

Which option do you have in the assignment of storage bin to an activity area?

- A. Storage bins must be manually assigned to an activity area
- B. A storage bin can be assigned to only one activity area
- **C. Storage bins from different storage types can be assigned to the same activity area**
- D. An activity area must be created automatically for a storage type

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Activity areas in SAP EWM group bins for specific activities (e.g., picking). Option B ("Storage bins from different storage types can be assigned to the same activity area") is correct because bins from multiple storage types (e.g., high rack, bulk) can share an activity area, configured in SPRO: SCM Extended Warehouse Management > Master Data > Activity Areas > Assign Storage Bins. Option C is incorrect as bins can belong to multiple activity areas for different activities. Options A and D are not mandatory requirements.

NEW QUESTION # 62

.....

Using the C-S4EWM-2023 Study Materials, you will find that you can grasp the knowledge what you need in the exam in a short time. Because users only need to spend little hours on the C-S4EWM-2023 study materials, our learning materials will help users to learn all the difficulties of the test site, to help users pass the qualifying examination and obtain the qualification certificate. If you think that time is important to you, try our learning materials and it will save you a lot of time.
