* Option B: The business readiness assessment is usually conducted in the discover phase. Incorrect.

The business readiness assessment occurs in the Deploy phase to ensure the organization is prepared for go-live. The SAP Activate Methodology Guide notes, "Business readiness assessments are conducted in the Deploy phase to confirm the organization's preparedness for system activation."

* Option C: The user adoption analysis is usually conducted in the run phase. Correct. User adoption analysis, which measures how users engage with the system, is performed in the Run phase post-go-live.
