C-S4TM-2023 PDF Dumps Files - Valid C-S4TM-2023 Test Book

With all of these C-S4TM-2023 study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our C-S4TM-2023 practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our C-S4TM-2023 training prep thoroughly. They are great help to pass the C-S4TM-2023 exam and give you an unforgettable experience.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition -

Transportation Management Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which of the following are functions of a consignment order? Note: There are 2 correct answers to this question.

- A. Subcontracting
- B. Tendering
- C. Charge calculation
- D. Load planning

Answer: A,C

Explanation:

In SAP S/4HANA Transportation Management, a consignment order is a logical grouping document used primarily in logistics service provider (LSP) scenarios to manage communication between shippers and consignees. According to the SAP documentation, its functions include:

* Subcontracting (B): Consignment orders can trigger subcontracting processes by assigning transportation tasks to carriers, often through freight orders or bookings.

* Charge calculation (D): Consignment orders support charge calculation for customer-facing services, determining the costs to be charged to the consignee or ordering party.

The other options are incorrect:

* Tendering (A) is performed at the freight order or freight booking level, not directly by consignment orders.

* Load planning (C) is managed in freight orders or the transportation cockpit, not consignment orders.

Reference:

SAP S/4HANA Cloud Private Edition, Transportation Management Study Guide: Unit 1 - Transportation Management Overview and Fundamentals, Section on Consignment Order Functions.

SAP Help Portal: Transportation Management - Consignment Orders ().

NEW QUESTION # 18

You want to make sure that a particular forwarding house is entered as the ordering party in a freight order based on the ID of the consignee. What do you have to define in Customizing for the freight order type?

- A. Creation strategy
- B. Shipper/consignee determination
- C. Organizational unit determination condition
- D. Partner determination profile

Answer: D

Explanation:

Freight Order Management

NEW QUESTION # 19

You have created an air forwarding order using shipping type 'ULD'. What is the correct item hierarchy for this forwarding order? Please choose the correct answer.

- A. Package --> Product --> Service
- B. Container -> Package -> Package
- C. Container -> Service -> Package
- D. Container -> Product -> Package

Answer: B

NEW QUESTION # 20

You want to print a road waybill document, a loading list, and labels for your freight orders with freight order type FOT1. You also want to send emails and XML messages to the carriers of freight orders of this type.

What is the MINIMUM number of PPF (Post-Processing Framework) action profiles that you need to define for this purpose?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

In SAP S/4HANA Transportation Management, the Post-Processing Framework (PPF) is used to automate actions such as printing documents, sending emails, and generating XML messages. According to the SAP documentation, a single PPF action profile can be assigned to a freight order type (e.g., FOT1) and can include multiple actions, such as printing a road waybill, printing a loading list, printing labels, sending emails, and sending XML messages. Each action is defined within the action profile, and the profile is then linked to the freight order type in Customizing. Since all the required actions (printing documents and sending messages) can be configured within one action profile, the minimum number of PPF action profiles needed is 1.

The other options are incorrect:

* A (4), C (2), and D (3) suggest multiple action profiles, which are unnecessary since a single profile can handle all actions.

NEW QUESTION # 21

Which of the following can you use to determine a stage sequence in a forwarding order? Note: There are 2 correct answers to this question.

- A. Shipping type
- **B. Stage profile**
- C. Stage type
- **D. Movement type**

Answer: B,D

Explanation:

In SAP S/4HANA Transportation Management for LSPs, the stage sequence in a forwarding order defines the transportation legs (e.g., pre-carriage, main carriage). According to the SAP documentation, the stage sequence can be determined using:

* Stage profile (A): A stage profile defines the sequence of stages for a forwarding order based on predefined rules, ensuring consistency across similar orders.

* Movement type (C): Movement types specify the type of transport (e.g., road, rail) for each stage and are used to determine the stage sequence in forwarding orders.

The other options are incorrect:

* Stage type (B) defines attributes of individual stages but does not determine the sequence.

* Shipping type (D) categorizes the overall transport mode but does not control stage sequencing.
