- C. Delivery proposal
- D. Freight unit building
- E. Tendering

**Answer: A,C,D**

Explanation:

In SAP S/4HANA Transportation Management, incompatibilities are used to enforce restrictions in various processes to prevent incompatible combinations. According to the SAP documentation, incompatibilities can be applied in:

- \* Delivery proposal (A): Incompatibilities ensure that certain products or freight units are not combined in delivery proposals (e.g., due to hazardous material restrictions).
- \* Freight unit building (D): Incompatibilities prevent specific products or requirements from being combined into the same freight unit (e.g., incompatible goods).
- \* Carrier selection (E): Incompatibilities restrict certain carriers from being assigned to specific freight orders based on criteria like equipment or service capabilities.

The other options are incorrect:

- \* Tendering (B) uses tendering profiles and rules but does not typically involve incompatibilities.
- \* Charge calculation (C) relies on freight agreements and rate tables, not incompatibilities.
