Latest C-S4TM-2023 Dumps Pdf | Exam Dumps C-S4TM-2023 Provider

When your life is filled with enriching yourself, you will feel satisfied with your good change. Our C-S4TM-2023 exam questions are designed to stimulate your interest in learning so that you learn in happiness. And our C-S4TM-2023 preparation materials are

applied with the latest technologies so that you can learn with the IPAD, phone, laptop and so on. Try to believe in yourself. You also can become social elite under the guidance of our C-S4TM-2023 Study Guide.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Transportation Management Sample Questions (Q11-Q16):

NEW QUESTION # 11

What business documents (objects) can be used as a base for track and trace functionality in transportation management? Note: There are 2 correct answers to this question.

- A. Service order
- **B. Forwarding order**
- C. Resource
- **D. Freight order**

Answer: B,D

Explanation:

In SAP S/4HANA Transportation Management, track and trace functionality is supported by documents that represent the transportation process and contain relevant tracking information. According to the SAP documentation:

* Freight order (A) is a key document used for road or rail transport, containing details about the transportation process, including stages, carriers, and tracking events, making it suitable for track and trace.

* Forwarding order (D) is used in logistics service provider scenarios and represents the customer's transportation requirements, including tracking information across multiple stages.

The other options are incorrect:

* Resource (B) refers to vehicles, drivers, or other assets used in transportation, not a document for tracking goods.

* Service order (C) is used for internal service-related activities and does not support track and trace functionality for goods transportation.

NEW QUESTION # 12

You want to use advanced shipping and receiving.

What must you define? Note: There are 2 correct answers to this question.

- **A. Location with type 1011 (vendor)**
- B. Location with type 1200 (loading point)
- **C. Location with type 1003 (shipping point)**
- D. Location with type 1001 (production plant)

Answer: A,C

Explanation:

Freight Order Management

NEW QUESTION # 13

You want to set up charge calculation for freight orders. Valid charges should consist of a base charge based on the distance and gross weight of the freight order, and a supplemental charge per container that is included in the freight order. Multiple containers are allowed for each freight order, and the charge is based on the container type. The container type can be small, medium, or large.

What is the minimum number of charge lines with instruction type "standard" that you must set up?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

To set up charge calculation for freight orders in SAP S/4HANA Transportation Management, you need to define charge lines in the calculation sheet with the instruction type "standard" to represent the different types of charges. According to the SAP documentation:

* A base charge based on distance and gross weight requires one charge line with instruction type "standard" to calculate the cost using a rate table that considers these parameters.

* A supplemental charge per container based on container type (small, medium, large) requires a second charge line with instruction type "standard" to apply the container-specific charge, which can be defined in a rate table with scales for container types. Since the requirement involves two distinct charge calculations (base charge and container charge), the minimum number of charge lines with instruction type "standard" is 2.

The other options are incorrect:

* A (0) is not possible, as charges require at least one charge line.

* C (1) is insufficient, as it cannot cover both the base charge and container charge.

* D (3) is unnecessary, as the container types can be handled within a single charge line using a rate table with scales.

NEW QUESTION # 14

Which of the following are master data elements in SAP TM? Note: There are 2 correct answers to this question.

- A. Means of transport
- B. Carrier profile
- C. Calculation profile
- D. Calculation sheet

Answer: A,B

NEW QUESTION # 15

What is used as the source location of the OTR? Please choose the correct answer.

- A. Delivery-based transportation requirements
- B. Order-based transportation requirements
- C. The shipping point determined in ERR
- D. Forwarding orders

Answer: C

NEW QUESTION # 16
