SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample Questions (Q21-Q26):

NEW QUESTION # 21

You have a column chart in a story. You notice some of the labels are missing until you mouse over the data point. How can you ensure that the labels are always visible?

- A. Increase the overall size of the chart widget on the page
- **B. Select the Avoid Data Label Overlap checkbox**
- C. Increase the font size of the axis labels

Answer: B

Explanation:

To ensure that labels are always visible on a column chart in a story, you should select the "Avoid Data Label Overlap" checkbox in the chart's settings. This option adjusts the labels' positioning to prevent overlap, making them visible at all times without the need for mouse-over interaction.

NEW QUESTION # 22

You are designing a new story. You want the size and position of widgets to adjust dynamically for viewing on different devices and screen sizes. Which page type must you use?

- A. Canvas
- B. Grid
- C. Composite
- **D. Responsive**

Answer: D

Explanation:

For designing a new story in SAP Analytics Cloud where the size and position of widgets need to adjust dynamically for different devices and screen sizes, the Responsive page type should be used. Responsive pages automatically adapt to the screen size of the device they are viewed on, providing an optimal viewing experience across desktops, tablets, and smartphones.

NEW QUESTION # 23

You are creating a styling rule for a table with a hierarchy of Country, Region, and City. You want to apply the styling rule only to countries. Which level option must you use?

- **A. Self**
- B. Self and Siblings

- C. Self and Children
- D. Self and Descendants

Answer: A

Explanation:

To apply a styling rule only to countries in a table with a hierarchy of Country, Region, and City in SAP Analytics Cloud, you must use the "Self" level option. This option ensures that the styling rule is applied specifically to the level of the hierarchy representing countries, without affecting the styling of regions, cities, or any other hierarchical levels.

NEW QUESTION # 24

You have a story in My Files. You want your colleague to review and comment on the story. What must you do?

- A. Create a Review task for the story
- B. Add a Comment widget to the story
- C. Include the story in a Discussion
- **D. Share with View access**

Answer: D

NEW QUESTION # 25

You input new data for a private version in a story. What must you do to ensure the new data is added to the model?

- **A. Publish**
- B. Nothing
- C. Send
- D. Save

Answer: A

Explanation:

When inputting new data for a private version in a story in SAP Analytics Cloud, it is necessary to "Publish" the data to ensure it is added to the model. Publishing the private version commits the changes to the underlying model, making the new data visible and accessible to other users according to their permissions. This step is crucial for ensuring that the updated data is incorporated into the shared model for further analysis and decision-making.
