In general Prep4sureGuide C-SAC-2501 exam simulator questions are practical, knowledge points are clear. According to candidates' replying, our exam questions contain most of real original test questions. You will not need to waste too much time on useless learning. C-SAC-2501 Exam Simulator questions can help you understand key knowledge points and prepare easily and accordingly. Candidates should grasp this good opportunity to run into success clearly.

SAP Certified Associate - Data Analyst - SAP Analytics Cloud Sample

Questions (Q19-Q24):

NEW QUESTION # 19

What can you use to perform cell-based calculations in a story?

- A. Table formulas
- B. Dimension formulas
- C. Restricted measures
- D. Calculated measures

Answer: A

Explanation:

Table formulas in SAP Analytics Cloud are used to perform cell-based calculations within a story. These formulas can be applied directly to table cells, allowing for customized calculations that are specific to the data presented in the table. This feature is particularly useful for ad-hoc analysis and when specific calculations are needed that are not covered by predefined measures or dimensions.

Reference:

SAP Analytics Cloud Help Documentation: Using Table Formulas

SAP Analytics Cloud User Guide: Cell-Based Calculations in Stories

NEW QUESTION # 20

For which activities must you enable Advanced Mode in story design? Note: There are 2 correct answers to this question.

- A. Add a layer to a geo map
- B. Add a custom widget
- C. Add JavaScript to a button
- D. Add a popup

Answer: C,D

NEW QUESTION # 21

Where can you create a blank planning version?

- A. In the planning model
- B. In a data cell
- C. In the version dimension
- D. In version management

Answer: D

Explanation:

A blank planning version in SAP Analytics Cloud can be created within the Version Management feature. This area of the platform allows users to manage different versions of their data, such as budgets, forecasts, and what-if scenarios. Creating a blank version provides a clean slate for planning activities, without pre-existing data, enabling users to start fresh with their assumptions and inputs.

NEW QUESTION # 22

What must a data model contain in SAP Analytics Cloud? Note: There are 2 correct answers to this question.

- A. Dimensions
- B. Hierarchies
- C. Calculations
- D. Measures

Answer: A,D

Explanation:

In SAP Analytics Cloud, a data model must contain at least "Dimensions" and "Measures" to be functional. Dimensions are the qualitative aspects of the data (e.g., time, geography, product categories) that provide the context for analysis. Measures, on the other hand, are the quantitative data points (e.g., sales, costs, quantities) that are analyzed within the context provided by dimensions. Both are fundamental components of a data model, enabling structured data analysis and reporting.

SAP Analytics Cloud User Guide: Understanding Dimensions and Measures in Models

NEW QUESTION # 23

Which dimension type can you use like a measure?

- A. Organization
- **B. Account**
- C. Date
- D. Entity

Answer: B

Explanation:

In SAP Analytics Cloud, the Account dimension can be used similarly to a measure. This dimension is specifically designed for financial data and can hold various types of financial metrics, such as revenues, expenses, assets, and liabilities. It allows for the application of financial calculations and aggregations, which is why it can function similarly to measures in the context of financial reporting and analysis.
