So if you do want to achieve your dream, buy our C-SEC-2405 practice materials.

SAP Certified Associate - Security Administrator Sample Questions (Q18-Q23):

NEW QUESTION # 18

Where do you configure the Social Media identity providers?

- A. In the SAP BTP Cockpit Account Explorer
- B. In the code editor of the SAP Business Application Studio
- C. In the administration console for SAP Cloud Identity Services

Answer: C

Explanation:

Social Media identity providers, such as Google or Facebook, are configured in the administration console for SAP Cloud Identity Services. This console provides a centralized interface for managing identity providers, allowing administrators to set up and configure external authentication sources for single sign-on (SSO). By integrating social media identity providers, organizations can enable users to authenticate using their social media credentials, streamlining access to SAP applications while maintaining security. The administration console supports configuring trust relationships, mapping attributes, and defining authentication policies for these providers. In contrast, the SAP Business Application Studio is used for application development, not identity provider configuration, and the SAP BTP Cockpit Account Explorer is focused on account and subaccount management, not specific identity provider settings. The administration console's role in SAP Cloud Identity Services ensures a secure and user-friendly authentication experience, aligning with SAP's identity management strategy for cloud-based solutions.

NEW QUESTION # 19

When creating PFCG roles for SAP Fiori access, what is included automatically when adding a catalog to the menu of a back-end PFCG role? Note: There are 2 correct answers to this question.

- A. The IWSG TADIR service definitions from the catalog.
- B. The start authorizations and the authorization default values for each IWSG TADIR service definitions in the catalog.
- C. The IWSV TADIR service definitions from the catalog.
- D. The start authorizations and the authorization default values for each IWSV TADIR service definitions in the catalog.

Answer: B,C

Explanation:

* Context: When creating PFCG roles for Fiori apps, adding a catalog to the menu ensures automatic inclusion of related services and their authorizations.

* Solution Descriptions:

* A: IWSG TADIR service definitions' start authorizations and defaults are automatically included.

* D: IWSV TADIR service definitions are also included for OData services.

SAP Security References:

* SAP Fiori PFCG Role Creation Guide

* SAP Backend Service Authorization Documentation

NEW QUESTION # 20

To connect to data sources that are NOT all based on OData, which of the following options does SAP recommend you use?

- A. Cloud connector
- **B. SAP Integration Suite**
- C. SAP Process Integration
- D. OData Provisioning service

Answer: B

Explanation:

The SAP Integration Suite is recommended for connecting to data sources that are not solely based on OData.

It provides:

- * Support for Multiple Protocols:
- * Integrates with SOAP, REST, OData, and non-OData-based services.
- * Prebuilt Content:
- * Includes prebuilt integration flows to connect with a variety of systems and applications.
- * Scalability and Flexibility:
- * Designed for hybrid landscapes, supporting both cloud and on-premise systems.

SAP Security References:

- * SAP Integration Suite Overview
- * SAP Help Portal: Multi-Protocol Integration with SAP Integration Suite

NEW QUESTION # 21

For which of the following can transformation variables be used?

- A. To save data permanently
- **B. To save data temporarily**
- C. To save data to the output JSON file

Answer: B
