Moreover, we have a professional team to compile and verify the C-SEC-2405 Exam Torrent, therefore the quality can

be guaranteed. We offer you free demo to have a try before buying, and you know the content of the complete version through the free demo. We have professional service staff for C-SEC-2405 exam dumps, and if you have any questions, you can have a conversation with us.

SAP Certified Associate - Security Administrator Sample Questions (Q27-Q32):

NEW QUESTION # 27

Under which of the following conditions can you merge authorizations for the same object during role maintenance? Note: There are 2 correct answers to this question.

- A. The activation status and the maintenance status of the authorizations must match.
- B. The activation status of a manual authorization must match the status of the changed authorizations.
- C. The maintenance status of the changed authorizations must match the status of a manual authorization.
- D. The activation status and the maintenance status of the authorizations must NOT match.

Answer: A,B

Explanation:

During role maintenance in SAP systems, merging authorizations for the same object is possible under specific conditions to streamline role management. The activation status of a manual authorization must match the status of the changed authorizations, ensuring consistency in how authorizations are applied within the role. Additionally, both the activation status and the maintenance status of the authorizations must align, meaning that the authorizations being merged should be in the same state (e.g., active or inactive) and maintenance phase (e.g., standard or changed). These conditions prevent conflicts and ensure that merged authorizations function correctly within the role, maintaining security and compliance. Mismatches in status or non-alignment of maintenance states can lead to errors or unintended access restrictions.

NEW QUESTION # 28

How does Rapid Activation support customers during the SAP S/4HANA on-premise implementation process? Note: There are 3 correct answers to this question.

- A. By allowing customers to select and activate SAP Fiori apps one by one, independent of dependencies needed for app-to-app navigation.
- B. By supporting content activation at the business role level, including SAP Fiori apps and all associated Web Dynpro for ABAP applications.
- C. By reducing the SAP Fiori activation effort during the Explore phase of SAP Activate.
- D. By allowing customers to select individual SAP Fiori apps for their end-to-end business processes.
- E. By helping customers to start exploring SAP Fiori in SAP S/4HANA on premises as quickly as possible.

Answer: B,C,E

Explanation:

Rapid Activation is a feature designed to streamline the implementation of SAP Fiori in SAP S/4HANA on-premise by:

* Quick Exploration (A):

* Provides preconfigured activation to allow customers to explore SAP Fiori apps and capabilities without lengthy setup.

* Business Role-Level Activation (B):

* Activates SAP Fiori content at the business role level, including associated Web Dynpro for ABAP applications, ensuring that users have a functional end-to-end experience.

* Reduced Effort (E):

* Minimizes the activation workload during the Explore phase of the SAP Activate methodology, allowing quicker alignment with business needs.

NEW QUESTION # 29

Which solution analyzes an SAP system's administrative areas to safeguard against potential threats?

- A. SAP Enterprise Threat Detection
- B. SAP EarlyWatch Alert
- C. SAP Code Vulnerability Analyzer
- **D. SAP Security Optimization Services**

Answer: D

NEW QUESTION # 30

SAP BTP distinguishes between which of the following users? Note: There are 2 correct answers to this question.

- A. Key users
- **B. Platform users**
- C. Business users
- **D. Technical users**

Answer: B,D

Explanation:

* Context: SAP BTP categorizes users based on their roles and functionalities within the system.

* Solution Descriptions:

* Technical users: System-to-system interaction and automation.

* Platform users: Direct interaction with SAP BTP services for development, management, or operational purposes.

SAP Security References:

* SAP BTP User Management Guide

* SAP Help Portal for BTP User Roles and Permissions

NEW QUESTION # 31

If you want to evaluate catalog menu entries and authorization default values of IWSG and IWSV applications, which SUIM reports would you use? Note: There are 2 correct answers to this question.

- A. By Transaction Assignment in Menu
- B. Search Applications in Roles
- **C. By Authorization Object**
- **D. Search Startable Applications in Roles**

Answer: C,D

Explanation:

To evaluate catalog menu entries and authorization default values for IWSG (SAP Gateway Service Groups Metadata) and IWSV (SAP Gateway Business Suite Enablement-Service) applications, the SUIM (System User Information System) reports "Search Startable Applications in Roles" and "By Authorization Object" are used. The "Search Startable Applications in Roles" report identifies roles that include startable applications, such as IWSG and IWSV, by analyzing menu entries in PFCG roles, providing insight into which applications users can access. The "By Authorization Object" report allows administrators to review authorization objects, including those associated with IWSG and IWSV, and their default values, ensuring that the correct permissions are assigned. These reports are critical for auditing and maintaining secure access to SAP Fiori and Gateway applications. The "Search Applications in Roles" report is less specific, and "By Transaction Assignment in Menu" focuses on transaction codes, not IWSG/IWSV applications, making them unsuitable for this purpose. These tools enhance transparency and control over application access in SAP systems.

NEW QUESTION # 32

.....

As the talent competition increases in the labor market, it has become an accepted fact that the C-SEC-2405 certification has become an essential part for a lot of people, especial these people who are looking for a good job, because the certification can help more and more people receive the renewed attention from the leader of many big companies.
