SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

Topic 2	<ul style="list-style-type: none"> Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
Topic 3	<ul style="list-style-type: none"> Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

SAP Certified Associate - Security Administrator Sample Questions (Q12-Q17):

NEW QUESTION # 12

What authorization object can be used to restrict which users a security administrator is authorized to maintain?

- A. S_USER_SASO
- B. S_USER_GRP
- C. S_USER_AUTO
- D. S_USER_GRD

Answer: A

Explanation:

The authorization object S_USER_SASO (Security Administrator's Specific Object) is used to restrict the users that a security administrator can maintain. It ensures granular control over user maintenance activities.

SAP Security References:

- * SAP Authorization Object Documentation
- * SAP Note on User Administration and Maintenance

NEW QUESTION # 13

What is the correct configuration setting in table PRGN_CUST for user assignments when transporting roles within a Central User Administration scenario?

- A. SET_IMP_LOCK_USERS = YES
- B. USER_REL_IMPORT = NO
- C. USER_REL_IMPORT = YES
- D. SET_IMP_LOCK_USERS = NO

Answer: B

Explanation:

* Context: When transporting roles in a Central User Administration (CUA) scenario, certain configurations in table PRGN_CUST affect user assignments.

* Solution Explanation:

* Setting USER_REL_IMPORT = NO ensures that user assignments are not transported along with roles, maintaining assignment control in the target system.

SAP Security References:

- * SAP CUA Role Transport Documentation
- * SAP PRGN_CUST Configuration Guide

NEW QUESTION # 14

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Performance logs
- B. Troubleshooting logs
- C. Usage logs

- D. Change logs

Answer: B,D

Explanation:

In the Administration Console of SAP Cloud Identity Services, the available log types are Troubleshooting logs and Change logs. Troubleshooting logs provide detailed information about system errors, authentication failures, or integration issues, enabling administrators to diagnose and resolve technical problems efficiently.

Change logs record modifications to user identities, system configurations, or security settings, offering an audit trail for tracking administrative actions and ensuring compliance with security policies. These logs are critical for maintaining system integrity and supporting forensic analysis in identity management. Usage logs, which might track user activity, and Performance logs, which monitor system performance metrics, are not standard log types in the Cloud Identity Services Administration Console, as its focus is on identity-related diagnostics and auditing. By providing Troubleshooting and Change logs, SAP Cloud Identity Services ensures administrators have the tools needed to monitor and secure identity management processes effectively, aligning with best practices for cloud-based security governance.

NEW QUESTION # 15

In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- A. The business area it was designed for
- B. The software release it was created for
- C. The business roles it is to be assigned to
- D. The SAP Fiori applications it was defined for

Answer: A

Explanation:

In SAP S/4HANA Cloud Public Edition, the ID of an SAP-predefined Space refers to the business area it was designed for.

Spaces in the SAP Fiori launchpad are organizational units that group Fiori apps and tiles relevant to specific business functions, such as finance, procurement, or human resources. The ID of a predefined Space reflects this business area, providing a clear and intuitive way to organize applications for users based on their functional roles. This design enhances user experience by ensuring that relevant apps are easily accessible within a business context. The ID does not refer to the software release, as Spaces are release-independent, nor to specific Fiori applications or business roles, which are assigned separately via catalogs and roles. By tying the Space ID to the business area, SAP ensures that the Fiori launchpad aligns with organizational processes, supporting efficient navigation and access control while maintaining a user-centric and business-focused interface.

NEW QUESTION # 16

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Performance logs
- B. Usage logs
- C. Change logs
- D. Troubleshooting logs

Answer: B,C

NEW QUESTION # 17

.....
