Our company has been working on the preparation of C-SEC-2405 study materials, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the C-SEC-2405 Exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our C-SEC-2405 study materials.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 2	• Authorization and Role Maintenance: This section of the exam measures the skills of SAP administrators and covers the management of user authorizations and roles within SAP systems. It emphasizes the processes involved in defining, maintaining, and approving roles to ensure secure access. A key skill assessed is managing role authorizations effectively to mitigate access risks.

Topic 3	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 4	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 5	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

New C-SEC-2405 Exam Duration | Valid C-SEC-2405 Study Materials

With our C-SEC-2405 learning materials, what you receive will never be only the content of the material, but also our full-time companionship and meticulous help. After you have successfully paid, we will send all the C-SEC-2405 information to your email within 10 minutes. During your installation, our C-SEC-2405 study guide is equipped with a dedicated staff to provide you with free remote online guidance.

SAP Certified Associate - Security Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

What must you do before you can use transaction PFCG? Note: There are 2 correct answers to this question.

- A. Set the system profile parameter `auth/no_check_in_some_cases` to Y.
- B. Fill tables `USOBT_C` and `USOBX_C` with the SAP-delivered authorization default values.
- C. Fill tables `USOBT` and `USOBX` with the SAP-delivered authorization default values.
- D. Set the system profile parameter `auth/no_check_in_some_cases` to N.

Answer: A,C

Explanation:

Before using transaction PFCG (Role Maintenance) in SAP systems, two prerequisites must be met. First, tables `USOBT` (Authorization Object Defaults) and `USOBX` (Check Indicators) must be filled with SAP- delivered authorization default values, which provide the standard authorization objects and check indicators for transactions. These tables, maintained via transaction `SU25`, ensure that PFCG can propose appropriate authorizations when building roles. Second, the system profile parameter `auth/no_check_in_some_cases` must be set to Y, enabling the system to bypass authorization checks for certain transactions, which is necessary for PFCG to function correctly during role creation and maintenance. Setting this parameter to N would enforce stricter checks, potentially restricting PFCG functionality. Tables `USOBT_C` and `USOBX_C` are customer- specific and not required for initial PFCG setup, as they store customized values rather than SAP defaults.

These steps ensure that PFCG operates effectively, supporting secure and efficient role management in SAP environments.

NEW QUESTION # 18

Which application in SAP S/4HANA Cloud Public Edition allows you to upload employee information independent of the customers' HR system?

- A. Maintain Business User app
- B. Display Technical Users app
- C. Identity and Access Management app

- **D. Manage Workforce app**

Answer: D

Explanation:

The Manage Workforce app in SAP S/4HANA Cloud Public Edition enables administrators to upload employee information independently of the customer's HR system. This app provides a user-friendly interface for managing workforce data, such as employee profiles, roles, and organizational assignments, without requiring integration with an external HR system like SAP SuccessFactors. It supports manual uploads or imports of employee data, making it ideal for scenarios where HR system integration is not available or desired. The Maintain Business User app is focused on managing user authorizations and roles, not employee data. The Identity and Access Management app deals with authentication and access policies, and the Display Technical Users app is limited to viewing technical user accounts. The Manage Workforce app's functionality ensures flexibility in workforce management, allowing organizations to maintain employee information efficiently while adhering to security and compliance requirements in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 19

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Launchpad roles
- B. Catalogs
- C. Spaces
- **D. Role collections**

Answer: D

Explanation:

In the SAP Launchpad service within SAP Business Technology Platform (BTP), Role collections can be assigned directly to a user. Role collections are groups of roles that define access to specific applications, services, or functionalities within the Launchpad, allowing administrators to grant users the necessary permissions to access content, such as Fiori apps or custom applications. By assigning role collections directly to users in the SAP BTP subaccount, administrators ensure that users have the appropriate access rights tailored to their responsibilities. Spaces, which organize apps in the Launchpad, and Catalogs, which group apps and tiles, are assigned to roles or role collections, not directly to users. Launchpad roles are not a distinct entity in SAP BTP; roles are part of role collections. This direct assignment of role collections simplifies access management, ensuring secure and efficient user access to the SAP Launchpad service while aligning with SAP BTP's security and authorization framework.

NEW QUESTION # 20

In SAP S/4HANA Cloud Public Edition, what does the ID of an SAP-predefined Space refer to?

- **A. The business area it was designed for**
- B. The software release it was created for
- C. The SAP Fiori applications it was defined for
- D. The business roles it is to be assigned to

Answer: A

Explanation:

In SAP S/4HANA Cloud Public Edition, the ID of an SAP-predefined Space refers to the business area it was designed for. Spaces in the SAP Fiori launchpad are organizational units that group Fiori apps and tiles relevant to specific business functions, such as finance, procurement, or human resources. The ID of a predefined Space reflects this business area, providing a clear and intuitive way to organize applications for users based on their functional roles. This design enhances user experience by ensuring that relevant apps are easily accessible within a business context. The ID does not refer to the software release, as Spaces are release-independent, nor to specific Fiori applications or business roles, which are assigned separately via catalogs and roles. By tying the Space ID to the business area, SAP ensures that the Fiori launchpad aligns with organizational processes, supporting efficient navigation and access control while maintaining a user-centric and business-focused interface.

NEW QUESTION # 21

In SAP HANA Cloud, what can you configure in user groups? Note: There are 2 correct answers to this question.

- A. Identity providers
- **B. Client connect restrictions**
- C. Password policy settings
- **D. Authorization privileges**

Answer: B,D
