#### NEW QUESTION # 84

What does SAP recommend you do when you transport a custom leading business role in SAP S/4HANA Cloud Public Edition?

- A. Add the pre-delivered business role that was used as a template to create the custom leading business role to the Software Collection.
- B. Add all other leading business roles from the same Line of Business as dependencies to the Software Collection.
- C. Add all derived business roles as dependencies to the Software Collection.

Answer: A

#### NEW QUESTION # 85

Under which of the following conditions can you merge authorizations for the same object during role maintenance? Note: There are 2 correct answers to this question.

- A. The maintenance status of the changed authorizations must match the status of a manual authorization.
- B. The activation status and the maintenance status of the authorizations must NOT match.
- C. The activation status of a manual authorization must match the status of the changed authorizations.
- D. The activation status and the maintenance status of the authorizations must match.

Answer: C,D

Explanation:

During role maintenance in SAP systems, merging authorizations for the same object is possible under specific conditions to streamline role management. The activation status of a manual authorization must match the status of the changed authorizations, ensuring consistency in how authorizations are applied within the role. Additionally, both the activation status and the maintenance status of the authorizations must align, meaning that the authorizations being merged should be in the same state (e.g., active or inactive) and maintenance phase (e.g., standard or changed). These conditions prevent conflicts and ensure that merged authorizations function correctly within the role, maintaining security and compliance. Mismatches in status or non-alignment of maintenance states can lead to errors or unintended access restrictions.
