Topic 2	• Plug & Gain: In this topic, you encounter questions about sub-topics of pain and gain.
Topic 3	• Process Mining: Its primary focus is discussing fundamentals of process mining. Furthermore, the topic explores pointing out the basic data requirements in process mining projects.

Topic 4	• SiGNAL: This topic explains how to use SiGNAL as query language. It also discusses how process data and analyze it in more depth.
Topic 5	• SAP Signavio Process Collaboration Hub: By covering this topic, you learn how to navigate through different process information and collaborate with other business users. Lastly, the topic delves into this navigation to share feedback on process content.
Topic 6	• SAP Signavio Process Intelligence: To explore and analyze a data set, this section discusses creating an investigation. It also discusses revealing inefficiencies in the process.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q34-Q39):

NEW QUESTION # 34

What is a core capability of the transaction code analysis?

- A. It can show the average ways processes are executed in a particular company code
- B. It can check the number of transaction codes used on average for one end-to-end process
- **C. It can check the number of transaction codes used on average for each process step and by company code**
- D. It can show the various ways processes are executed in reality across the entire organization

Answer: C

Explanation:

Transaction code analysis in SAP Signavio Process Intelligence examines the usage of transaction codes in SAP systems to understand process execution. The documentation details:

* Exact Extract: "Transaction code analysis provides insights into the number of transaction codes used on average for each process step, segmented by company code, to identify variations in process execution across organizational units." (SAP Signavio Process Intelligence User Guide, section on

"Transaction Code Analysis").

* Explanation:

* Option B (It can check the number of transaction codes used on average for each process step and by company code): This is correct as transaction code analysis breaks down the usage of SAP transaction codes (e.g., VA01 for sales order creation) per process step and company code, highlighting differences in how processes are executed.

* Option A (It can check the number of transaction codes used on average for one end-to-end process) is incorrect as the analysis focuses on individual steps, not the entire process.

* Option C (It can show the various ways processes are executed in reality across the entire organization) is incorrect because this is a function of Process Discovery or Variant Explorer, not transaction code analysis.

* Option D (It can show the average ways processes are executed in a particular company code) is incorrect as it describes process variants, not transaction code usage.

Reference: SAP Signavio Process Intelligence User Guide, section on "Transaction Code Analysis"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Process Analysis Tools.

NEW QUESTION # 35

How can administrator rights be granted to a new user within SAP Signavio Process Manager?

- A. Create a support ticket with SAP to request the full admin rights for a specific user.
- B. Create a user account and assign the access right "administrator".
- C. Create an Administrators user group and assign the respective person to this group.
- **D. Create a user account and assign it to the Administrators user group.**

Answer: D

Explanation:

To grant administrator rights to a new user within SAP Signavio Process Manager, the correct approach is to:

* Option B (Create a user account and assign it to the Administrators user group): Users are granted different levels of access and rights based on their group memberships. By creating a user account and then assigning that account to the Administrators user group, the user inherits the rights and privileges associated with that group, including administrative capabilities.

NEW QUESTION # 36

You are in the SAP Signavio Process Manager and want to get an overview about costs and resources. Which features do you use?

Note: There are 2 correct answers to this question.

- A. Simulation
- B. Value Widget
- C. Analytics
- D. Reporting

Answer: A,D

Explanation:

In SAP Signavio Process Manager, to get an overview of costs and resources, the features primarily used are Simulation and Reporting. Simulation allows users to model and predict how changes in the process will affect costs and resource utilization, enabling decision-makers to experiment with different scenarios and optimize process performance. Reporting, on the other hand, provides detailed analyses and overviews of current process metrics, including costs and resources, through customizable reports. These tools are instrumental in understanding and optimizing the efficiency and cost-effectiveness of business processes. The Value Widget and Analytics are valuable tools as well but are not primarily designed for detailed costs and resources overview. References: SAP Signavio Process Manager User Guide

NEW QUESTION # 37

In the context of a workflow, what is a case?

- A. A specific action to be performed in the workflow
- B. Different variants of the same workflow
- C. A one-time run of a workflow
- D. A process template used as a workflow

Answer: C

Explanation:

In the context of a workflow, a case refers to:

* Option D (A one-time run of a workflow): Each instance where a workflow is executed is considered a case. It represents a single occurrence of the process, with its own unique data and context. This concept is fundamental in differentiating between individual executions of a workflow, allowing for the tracking and analysis of each specific instance.

NEW QUESTION # 38

What most accurately describes the availability of the guided analysis?

- A. Only correction recommendations have a guided analysis.
- B. Only Innovation recommendations have a guided analysis.
- C. Some process flows have a guided analysis.
- D. All process flows have a guided analysis.

Answer: C

NEW QUESTION # 39
