SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q80-Q85):

NEW QUESTION # 80

How many times can you execute the task step of an initial sample in a stability study?

- A. Twice
- B. Three times
- C. An infinite number of times
- **D. Once**

Answer: D

NEW QUESTION # 81

Your consumer wants to perform an inspection at the vendor's site instead of performing one during goods receipt..... Where must you change the settings in the system?

- A. Purchase order
- **B. Quality info record in procurement**
- C. Vendor master
- D. Material master

Answer: B

NEW QUESTION # 82

You want to block purchasing of a material from a supplier due to quality reasons. In which business object would you do this?

- A. Business partner
- **B. Quality info record: Procurement**
- C. Purchase order item
- D. Material

Answer: B

Explanation:

Blocking purchasing from a supplier for quality reasons is managed in:

* Quality Info Record: Procurement (C): In the quality info record (transaction QI01), you can set the

"Block" indicator or use a status profile (e.g., "Blocked") to prevent purchasing from a supplier for a specific material. This is the standard QM object for supplier-material quality control (SPRO > QM > Quality Inspection > Quality Info Record > Define Status).

* Material (A): The material master can block overall procurement but not supplier-specific QM issues.

* Business Partner (B): Blocking a supplier globally is possible (e.g., via MM06), but not material-specific for quality reasons in QM.

* Purchase Order Item (D): POs can't enforce a quality block; they reflect existing restrictions.

Thus, "Quality info record: Procurement" is the correct answer. References: SAP Help Portal - "Blocking Suppliers in QM"; SAP S/4HANA QM User Guide - "Quality Info Record".

NEW QUESTION # 83

Which valuation mode can be used for a quantitative inspection characteristic? Note: There are 3 correct answers to this question.
