Topic 3	• Quality Inspection: It explains the configuration requirements of Quality Inspection.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q76-Q81):

NEW QUESTION # 76

How does the system handle equipment and functional locations in an inspection lot in calibration inspection?

- A. As a inspection point
- B. As a characteristic
- C. As physical sample
- D. As a material

Answer: D

NEW QUESTION # 77

You want to create a quality notification for the Customer Complaint notification origin. Which of the following documents are available as standard in SAP S/4HANA to use as reference documents? Note: There are 2 correct answers to this question.

- A. Delivery
- B. Sales order
- C. Material document
- D. Quotation

Answer: A,B

Explanation:

For a customer complaint notification (type Q1, transaction QM01), standard reference documents include:

* Delivery (A): Outbound delivery documents (e.g., from VL01N) are commonly referenced, linking the complaint to a shipped item (SPRO > QM > Quality Notifications > Notification Creation).

* Sales Order (D): Sales orders (e.g., from VA01) can be referenced to trace the complaint back to the original customer order.

* Quotation (B): Quotations are pre-sales documents and not standard references for QM notifications.

* Material Document (C): Material documents (e.g., GR) are procurement-related, not typical for customer complaints.

Thus, "Delivery" and "Sales order" are the correct answers. References: SAP Help Portal - "Reference Documents in QM Notifications"; SAP S/4HANA QM User Guide - "Customer Complaints".

NEW QUESTION # 78

Partners are involved in your notification processing. The partner determination procedure contains the partners who are involved in notification processing. Which assignment for a partner determination procedure is possible?

- A. Assignment to the notification origin
- B. Assignment to the material type
- C. Assignment to the material master
- D. Assignment to the notification type

Answer: D

Explanation:

Partner determination in QM notifications (e.g., transaction QM01) assigns partners (e.g., responsible person) via:

* Assignment to the Notification Type (D): The partner determination procedure is assigned in Customizing (SPRO > QM > Quality

Notifications > Notification Creation > Define Notification Types), linking specific partner roles (e.g., coordinator) to a notification type (e.g., Q1 for customer complaints). This is the standard approach.

* Notification Origin (A): Origins (e.g., 01 for GR) don't directly assign partner procedures.

* Material Type (B): Material types are MM settings, not linked to QM partner determination.

* Material Master (C): Material master doesn't store partner procedures for notifications.

Thus, "Assignment to the notification type" is the correct answer. References: SAP Help Portal - "Partner Determination in QM Notifications"; SAP S/4HANA QM Customizing Guide - "Notification Types".

NEW QUESTION # 79

You create a supplier claim notification with reference to material document year, number and item from a goods receipt for the PO. What information is copied to the notification?

Note : 3 correct answer

- A. Material number
- B. Purchasing document number and item
- C. Advanced Shipping number
- D. Inspection lot number
- E. Quantity and unit

Answer: A,B,E

NEW QUESTION # 80

For which structure elements of a quality notification can you assign a status profile? Note : 2 correct answer

- A. Header
- B. Activities
- C. Items
- D. Follow up actions
- E. Tasks

Answer: A,E

NEW QUESTION # 81

.....
