Die SAP C-TS462-2023 Fragenkataloge von It-Pruefung werden von den IT-Experten konzipiert. Sein Design ist eng mit dem heutigen schnell verändernden IT-Markt verbunden. Die Ausbildung von It-Pruefung wird Ihnen helfen, mit der erneuerten Technik Ihre Fähigkeit zur Problemlösung zu fördern und Ihre Zufriedenheit am Arbeitsplatz zu verbessern. Die Deckung der SAP C-TS462-2023 Zertifizierung von It-Pruefung ist um 100% als geplant gestiegen. Solange Sie unsere Prüfungsfragen und Antworten verwenden, garantieren wir Ihnen, dass Sie zum ersten Mal die SAP C-TS462-2023 Prüfung mühlos bestehen können.

SAP C-TS462-2023 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Managing Clean Core: The topic of Managing Clean Core is about applying principles to ERP to enhance business process agility and reduce adaptation efforts.
Thema 2	Master Data: It includes setting up and maintaining relevant master data to ensure accurate sales and billing processes.
Thema 3	Organizational Structures: This topic discusses the role of organizational structures and how they relate to basic functions within the sales process.
Thema 4	Basic Functions (Customizing): It focuses on explaining and performing tasks related to basic functions (customizing).
Thema 5	Sales Documents: This topic covers the explanation and performance of tasks related to sales document customization, including pricing and condition techniques. It also encompasses the shipping process and its associated customization settings.

C-TS462-2023 Simulationsfragen & C-TS462-2023 Testfragen

IT-Prüfung hat sich stetig entwickelt. Unsere Antriebe werden von unseren Kunden, die mit Hilfe unserer Produkte die IT-Zertifizierung erworben haben, gegeben. Heute wird die SAP C-TS462-2023 Prüfungssoftware von zahllosen Kunden geprüft und anerkannt. Die Software hilft ihnen, die Zertifizierung der SAP C-TS462-2023 zu erwerben. Auf unserer offiziellen Webseite können Sie die Demo kostenfrei downloaden und probieren. Wir erwarten Ihre Anerkennung. Innerhalb eines Jahr nach Ihrem Kauf werden wir Ihnen Informationen über den Aktualisierungsstand der SAP C-TS462-2023 rechtzeitig geben. Ihre Vorbereitungsprozess der Prüfung wird deshalb bestimmt leichter!

SAP Certified Associate - SAP S/4HANA Cloud Private Edition - Sales C-TS462-2023 Prüfungsfragen mit Lösungen (Q36-Q41):

36. Frage

When you create a sales order with reference to a quotation, you want to ensure the entire quotation is always included in the order. Where do you make this setting?

- A. Order type
- B. Quotation type
- **C. Copying control**
- D. Order item category

Antwort: C

Begründung:

To ensure the entire quotation is always included in the sales order, the setting is made in:

A. Copying control: This defines how data is transferred from one document to another, such as from a quotation to a sales order, and can be configured to ensure the complete transfer of all items from the quotation.

37. Frage

You want to evaluate sales discount condition records.

Which tool can you use?

Note: There are 2 correct answers to this question.

- **A. Pricing reports**
- B. Price lists
- **C. Manage Prices - Sales app**
- D. Listing

Antwort: A,C

Begründung:

To evaluate sales discount condition records, you can use:

B. Pricing reports: Pricing reports in SAP allow you to analyze various pricing conditions, including sales discounts. These reports can provide detailed information about condition records, their application in sales documents, and how they influence final pricing.

D. Manage Prices - Sales app: In SAP S/4HANA, the "Manage Prices - Sales" app is a Fiori application that provides a user-friendly interface for managing and evaluating pricing conditions, including discounts. This app allows you to view, create, and edit condition records directly, offering a convenient way to assess the impact of sales discounts.

38. Frage

You are using multiple address handling in a sales document. At which levels can you assign the address determination? Note: There are 2 correct answers to this question.

- A. Origin and source of the partner function
- **B. Partner determination procedure**
- **C. Address usage of the business partner**

- D. Generic partner function

Antwort: B,C

Begründung:

Basic Functions (customizing)

39. Frage

In your pricing procedure you have several condition types for a price such as PROO, PR02, PN00 and HM00. Only one of these prices is taken into account Which setting causes this behavior?

- A. Header condition
- B. Condition function
- C. Condition class
- D. Exclusion indicator

Antwort: D

Begründung:

In SAP S/4HANA, a pricing procedure determines how pricing conditions (e.g., PROO, PR02, PN00, HM00) are applied to calculate the final price in a sales document, such as a sales order. The question states that only one of several condition types for a price is taken into account, meaning that only one price condition is selected or applied, while the others are ignored. This behavior is controlled by the Exclusion indicator in the pricing procedure configuration.

Let's break down the question and analyze each option to understand why the Exclusion indicator is the correct choice:

Understanding Pricing in SAP S/4HANA

* A pricing procedure is a sequence of steps that determines how prices, discounts, surcharges, and taxes are calculated in a sales document.

* Condition types (e.g., PROO, PR02, PN00, HM00) represent individual pricing elements, such as base prices, promotional prices, or net prices. Each condition type has specific settings that control its behavior.

* When multiple condition types for prices exist in a pricing procedure (e.g., multiple price conditions), SAP allows configuration to ensure only one price is applied to avoid conflicts or double pricing.

* The question implies that the system selects only one price condition from PROO, PR02, PN00, or HM00, which suggests a mechanism is in place to exclude the others.

Analysis of Options

* A. Condition function:

* The Condition function is not a standard term in SAP S/4HANA pricing configuration. It may refer to the role of a condition type (e.g., price, discount, surcharge), but it is not a specific setting that controls whether only one condition is applied. Instead, the condition function is determined by settings like the condition class and calculation type, which define the purpose and calculation logic of a condition type.

* Why incorrect: There is no "Condition function" setting that directly causes only one price condition to be selected among multiple price conditions.

* B. Exclusion indicator:

* The Exclusion indicator is a setting in the pricing procedure configuration that controls condition type exclusivity. It is used to define condition exclusion groups, which determine which condition types are mutually exclusive. If multiple price condition types (e.g., PROO, PR02, PN00, HM00) are assigned to an exclusion group, the system applies a rule (e.g., selecting the condition with the best price, most specific condition, or first valid condition) to ensure only one condition is active.

* In SAP, condition exclusion is configured via condition exclusion groups (transaction V/08 or SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion). For example:

* You create an exclusion group and assign condition types PROO, PR02, PN00, and HM00 to it.

* You define an exclusion rule, such as "select the condition with the lowest price" or "select the first valid condition."

* During pricing, the system evaluates the conditions in the exclusion group and applies only one based on the rule, deactivating the others.

* This mechanism perfectly explains the behavior described in the question, where only one price condition is taken into account.

* Why correct: The Exclusion indicator (via condition exclusion groups) ensures that only one of the price condition types is applied, based on the defined exclusion rule.

* C. Condition class:

* The Condition class is a setting in the condition type configuration (transaction V/06) that categorizes the condition type's purpose, such as:

* B: Prices (e.g., PROO, PR02 for base prices).

* A: Discounts or surcharges.

- * C: Taxes, etc.
- * While the condition class determines whether a condition is treated as a price, discount, or tax, it does not control whether multiple price conditions are mutually exclusive. For example, multiple condition types can have the condition class "B" (Prices) and still coexist unless an exclusion rule is applied.
- * Why incorrect: The Condition class defines the type of condition but does not enforce the selection of only one price condition among multiple price conditions.
- * D. Header condition:
 - * AHeader condition is a setting in the condition type configuration that determines whether a condition is applied at the header level (affecting the entire document) or the item level (affecting specific items). For example, a header condition might apply a flat surcharge to the entire sales order, while item conditions like PROO or PR02 apply to specific materials.
 - * While header conditions affect how a condition is applied, they do not control whether only one price condition is selected from multiple price conditions at the item level.
 - * Why incorrect: The Header condition setting is unrelated to ensuring that only one price condition (e.g., PROO, PR02, PN00, or HM00) is applied.
- Why Exclusion Indicator is the Correct Choice
 - * The Exclusion indicator is part of the condition exclusion configuration in the pricing procedure. It is used to manage scenarios where multiple price condition types (e.g., PROO for standard price, PR02 for promotional price, PN00 for net price, HM00 for manual price) are defined, but only one should be applied to avoid conflicting prices.
 - * For example:
 - * In the pricing procedure (transaction V/08), you define a condition exclusion group and assign PROO, PR02, PN00, and HM00 to it.
 - * You set an exclusion rule, such as:
 - * Rule A: Select the condition with the lowest price.
 - * Rule B: Select the condition with the highest price.
 - * Rule C: Select the first valid condition in the sequence.
 - * During sales order processing, the system evaluates the conditions in the exclusion group, applies the rule, and deactivates all other conditions in the group, ensuring only one price is used.
 - * This is a common setup in SAP S/4HANA to handle scenarios with multiple price conditions, such as standard prices, promotional prices, or customer-specific prices, ensuring clarity and consistency in pricing.
 - Practical Context
 - * In the SAP system, condition exclusion is configured in the following path:
 - * SPRO > Sales and Distribution > Basic Functions > Pricing > Condition Exclusion > Condition Exclusion for Groups of Conditions.
 - * Alternatively, use transaction VOK8 to maintain condition exclusion groups and assign condition types.
 - * During sales order creation, the system checks the pricing procedure, identifies the exclusion group, and applies the exclusion rule to select one condition type (e.g., PROO) while deactivating others (e.g., PR02, PN00, HM00).
 - * For example, if PROO has a price of \$100, PR02 has \$90, and the exclusion rule is "select the lowest price," the system will apply PR02 and exclude the others.
 - Why Other Options Don't Fit
 - * Condition function: Not a standard SAP term or setting for controlling exclusivity.
 - * Condition class: Defines the type of condition (e.g., price vs. discount) but doesn't manage exclusivity between multiple price conditions.
 - * Header condition: Controls the level of application (header vs. item) but doesn't determine which price condition is selected.

40. Frage

When a user creates a sales order with reference to a quotation, a header text must be automatically copied from the sold-to party if it cannot be found in quotation. If it is copied from the sold-to party, it must be in the sold-to party language.

What must you do? Note: There are 3 correct answers to this question.

- A. Ensure that the access sequence reads the sold-to party text first.
- B. Assign an appropriate text type to the sales document type.
- C. Assign the text determination procedure to the sales document type.
- D. Include the text type with an appropriate access sequence in the text determination procedure.
- E. In the access sequence, set the partner function language for this text to "sold-to party".

Antwort: C,D,E

41. Frage
