BTW, DOWNLOAD part of TopExamCollection C-TS470-2412 dumps from Cloud Storage: <https://drive.google.com/open?id=17SKA8szdCcddJ2XIcBN-HJFN-frMD55G>

Our latest C-TS470-2412 exam dump is comprehensive, covering all the learning content you need to pass the qualifying exams. Users with qualifying exams can easily access our web site, get their favorite latest C-TS470-2412 study guide, and before downloading the data, users can also make a free demo for an accurate choice. Users can easily pass the exam by learning our C-TS470-2412 practice materials, and can learn some new knowledge, is the so-called live to learn old. Believe in yourself, choosing the C-TS470-2412 Study Guide is the wisest decision. So far, the C-TS470-2412 practice materials have almost covered all the official test of useful materials, before our products on the Internet, all the study materials are subject to rigorous expert review, so you do not have to worry about quality problems of our latest C-TS470-2412 exam dump, focus on the review pass the qualification exam. I believe that through these careful preparation, you will be able to pass the exam.

## SAP C-TS470-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.</li> </ul>

## C-TS470-2412 Reliable Test Practice & C-TS470-2412 Interactive Questions

As the talent competition increases in the labor market, it has become an accepted fact that the C-TS470-2412 certification has become an essential part for a lot of people, especially these people who are looking for a good job, because the certification can help more and more people receive the renewed attention from the leaders of many big companies. So it is very important for a lot of people to gain the C-TS470-2412 Certification. We must pay more attention to the certification and try our best to gain the C-TS470-2412 certification.

### SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

What is the purpose of a strategy plan in SAP S/4HANA Cloud Private Edition, Service?

- A. To automatically generate Customer Service orders
- B. To support a service scenario where an activity is required every X months and Y kilometers
- C. To support the planning and scheduling of activities with different intervals**
- D. To document your company's direction in terms of service scenarios to be implemented

**Answer: C**

Explanation:

A strategy plan in SAP S/4HANA Cloud Private Edition, Service is a type of maintenance plan. The correct answer is C. Let's dive into this.

What is a Strategy Plan?

A strategy plan uses a maintenance strategy (e.g., time-based, performance-based cycles) to schedule tasks with varying intervals (e.g., 3 months, 6 months, 1,000 km). It's linked to a task list with operations tied to maintenance packages.

Why C?

The purpose is to support the planning and scheduling of activities with different intervals. For example, a strategy might include Package 1 (every 3 months) for an oil check and Package 2 (every 12 months) for a full inspection. The plan schedules these flexibly based on the strategy's rules.

Why Not the Others?

- \* A: This is a business strategy, not a maintenance plan function.
- \* B: This describes a multiple counter plan, not a strategy plan.
- \* D: Orders are generated by scheduling, not the plan's purpose.

Example:

Strategy "STR1" has packages: 3M (oil) and 12M (inspection). The plan schedules calls accordingly.

"A strategy plan supports the planning and scheduling of maintenance activities with different intervals using a maintenance strategy."

### NEW QUESTION # 58

For which objects can you define measuring points? Note: There are 2 correct answers to this question.

- A. Pieces of equipment
- B. Material
- C. Functional locations
- D. Serial numbers

**Answer: A,C**

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, measuring points are used to record quantitative or qualitative data (e.g., temperature, mileage) for technical objects to monitor their condition or performance.

The correct answers are:

- \* Functional locations (A): Measuring points can be defined for functional locations to track conditions at specific sites or areas within a plant.
- \* Pieces of equipment (C): Measuring points are commonly assigned to equipment to monitor operational parameters, supporting preventive maintenance.
- \* Serial numbers (B): Serial numbers identify individual instances of materials but are not technical objects themselves; measuring points are not directly assigned to them.
- \* Material (D): Materials represent stock items or products, not technical objects, so measuring points are not applicable.

"Measuring points can be created for functional locations and pieces of equipment to capture measurement data, enabling condition-based maintenance strategies."

### NEW QUESTION # 59

What happens when you execute the step "Release for Billing" in an in-house repair process?

- A. Billing due list entries are created for each repair object.
- B. The system creates a billing document request for each selected repair confirmation item
- C. The repair confirmation items are automatically set to completed.
- D. A billing document is created for each repair order item

**Answer: B**

Explanation:

In their-house repair process in SAP S/4HANA Cloud Private Edition, Service, the "Release for Billing" step initiates the billing process for repair activities. The correct answer is C: "The system creates a billing document request for each selected repair confirmation item." A repair confirmation (e.g., transaction type REPC) records the work done, and when released for billing, the system generates a billing document request (BDR) for each confirmed item that is billable. The BDR is a preliminary document that can later be converted into a billing document (e.g., an invoice) via the billing due list.

- \* A: Billing due list entries are an outcome of BDRs, not directly created per repair object.
- \* B: Billing documents are not created immediately; BDRs are created first.
- \* D: Completion status is separate from billing release.

"Upon executing 'Release for Billing' in an in-house repair process, the system generates a billing document request for each selected repair confirmation item, enabling subsequent invoicing."

### NEW QUESTION # 60

What are characteristics of recurring services when using Service with Advanced Execution? Note: There are 3 correct answers to this question.

- A. Both resource-related and fixed-price billing are available
- B. Customer Service orders are generated
- C. The maintenance confirmation describes the actual effort and spare parts used
- D. Billable maintenance orders are generated
- E. An invoice is generated for each call object as soon as it is set to completed

## Answer: A,C,D

Explanation:

Service with Advanced Execution enhances recurring service processes with detailed execution and billing.

The correct answers are A, B, D. Let's unpack this.

- \* Both resource-related and fixed-price billing are available (A): This scenario supports flexible billing-resource-related (based on actual effort/materials) or fixed-price (predefined rates), configured via the dynamic item processor profile.
- \* The maintenance confirmation describes the actual effort and spare parts used (B): Confirmations (e.g., via IW41) detail hours worked and parts consumed, feeding into billing and cost tracking.
- \* Billable maintenance orders are generated (D): Recurring services generate maintenance orders (mapped to service order types) that are billable, unlike simpler Customer Service orders.

Why Not the Others?

\* C: "Customer Service orders" is a legacy term; advanced execution uses maintenance orders.

\* EInvoices are created via billing runs, not automatically per call object completion.

Example:

A maintenance plan generates a billable order, confirmed with 5 hours and parts, billed resource-related.

"Recurring services in Advanced Execution feature resource-related and fixed-price billing, maintenance confirmations for effort/parts, and billable maintenance orders."

## NEW QUESTION # 61

What is the purpose of creating maintenance planner groups?

- A. Mapping a group of persons performing maintenance work
- B. Mapping a group of persons planning maintenance capacities
- C. Mapping a group of persons creating maintenance task lists
- D. **Mapping a group of persons planning maintenance activities for technical assets**

## Answer: D

Explanation:

Maintenance planner groups in SAP S/4HANA Service (and Plant Maintenance):

- \* Mapping a group of persons planning maintenance activities for technical assets: Planner groups (e.g., defined in transaction IP02) organize planners responsible for scheduling and managing maintenance plans and orders for technical objects.
- \* Performing maintenance work: Handled by work centers, not planner groups.
- \* Creating task lists: A design task, not the planner group's role.
- \* Planning capacities: Managed via capacity planning, not planner groups. This is part of maintenance planning setup. "Maintenance planner groups map persons responsible for planning maintenance activities for technical assets." (SAP Help Portal, Maintenance Planning).

## NEW QUESTION # 62

.....

Getting ready for SAP C-TS470-2412 exam, do you have confidence to sail through the certification exam? Don't be afraid. TopExamCollection can supply you with the best practice test materials.
