AB-900 Cert - AB-900 Actual Braindumps

With AB-900 test answers, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase new learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to AB-900 test dumps based on constantly changing syllabus and industry development breakthroughs. We also hired dedicated IT staff to continuously update our question bank daily, so no matter when you buy AB-900 Study Materials, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our AB-900 test answers, we will still provide you with the benefits of free updates within a year.

Microsoft AB-900 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> • Understand data protection and governance tasks for Microsoft 365 and Copilot: This domain explains how Microsoft Purview protects and governs organizational data through classification, sensitivity labels, retention, and compliance tools. It also covers how Copilot accesses data, follows permissions, and how administrators monitor risks, alerts, and oversharing.

Topic 2	<ul style="list-style-type: none"> Identify the core features and objects of Microsoft 365 services: This domain covers the main Microsoft 365 objects such as users, groups, licenses, mailboxes, SharePoint sites, and Teams. It also focuses on managing organization settings, roles, authentication, authorization, and core security features using Microsoft Entra and Microsoft Defender.
Topic 3	<ul style="list-style-type: none"> Perform basic administrative tasks for Copilot and agents: This domain focuses on managing Copilot and agents, including licensing, feature controls, and usage monitoring. It also covers creating agents, managing prompts, configuring user access, and monitoring agent activity through admin centers.

Microsoft 365 Copilot & Agent Administration Fundamentals Sample Questions (Q33-Q38):

NEW QUESTION # 33

Hotspot Question

Select the answer that correctly completes the sentence.

Answer Area

Answer:

Explanation:

Answer Area

NEW QUESTION # 34

Your organization has a Microsoft 365 subscription.

You need to generate a report that shows the permissions and active sharing links of content stored in Microsoft OneDrive accounts. What should you use?

- A. Reports in the Microsoft 365 admin center
- B. eDiscovery in the Microsoft Purview portal
- C. Audit in the Microsoft Defender portal
- D. Data access governance in the SharePoint admin center

Answer: D

Explanation:

The correct answer is A. Data access governance in the SharePoint admin center . Microsoft Learn documents Data access governance reports in the SharePoint admin center as the reporting solution used to understand data exposure, including permission structure and sharing link activity . Microsoft specifically states that the site permissions snapshot report provides visibility across

SharePoint and OneDrive sites, helping administrators understand current permissions exposure, and that separate reports are created for SharePoint and OneDrive. Microsoft also documents sharing links activity reports as part of Data access governance for monitoring link-sharing activity, and notes that OneDrive support is available through PowerShell for those reports. Together, this is the Microsoft reporting capability aligned with permissions and active sharing links for OneDrive content.

The other options do not fit this requirement. Microsoft 365 admin center reports focus mainly on usage and activity reporting, not detailed permissions and sharing-link governance. Defender Audit is for security investigation activity, and Purview eDiscovery is for legal and investigative content search, not for generating OneDrive permissions and sharing-link governance reports. Therefore, the best Microsoft- documented answer is Data access governance in the SharePoint admin center.

NEW QUESTION # 35

An organization requires that Copilot never include public web search results in responses (to avoid potential exposure of internal prompts/data). Which Copilot capability should an administrator disable to block web grounding for Copilot responses?

- **A. Copilot Chat (web search / browsing context)**
- B. Copilot for Microsoft 365 (license)
- C. Copilot in Word
- D. Copilot features in Microsoft 365 Apps (Word/Excel/PowerPoint)

Answer: A

Explanation:

Copilot Chat is the primary interface (also available within the Microsoft 365 app) that, by default, utilizes the Bing Search Graph Connector to incorporate real-time web results (public internet data) alongside the user's organizational data. In the Microsoft 365 admin center, administrators can disable this feature to restrict Copilot's grounding to only internal, organizational data, thus preventing the exposure of internal data during web searches.

Microsoft

prep4sureexam.com

The correct answer is eDiscovery . In Microsoft Purview, eDiscovery is the solution used to search for content and export copies of that content from Microsoft 365 locations such as SharePoint and OneDrive.

Microsoft Learn states that when you export search results from eDiscovery, copies of native Office documents and other documents are exported . That directly matches the requirement to provide HR with a copy of files .

By contrast, Audit is primarily used to investigate user and admin activity records and can export those audit records to CSV , but it does not export the actual files themselves. Audit would help identify that User1 modified files, but the question asks for copies of the recent files modified by User1 , which is an eDiscovery content search and export scenario rather than an activity-log reporting scenario.

So, among the Microsoft Purview solutions shown, the appropriate selection is eDiscovery because it is the Purview tool designed to find and export the actual content items HR wants to receive.

NEW QUESTION # 37

You want to view the administrative actions taken by a service administrator in Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 Admin center.	<input type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Defender portal.	<input type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Purview portal.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
You can use Search & intelligence in the Microsoft 365 admin center.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Audit in the Microsoft Defender portal.	<input checked="" type="radio"/>	<input type="radio"/>
You can use Audit in the Microsoft Purview portal.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

The correct selections are No, Yes, Yes . Microsoft documents that the Audit page in the Microsoft Defender portal can be used to search the unified audit log for user and admin actions in the organization.

Microsoft also states that audit log search in the Defender portal is the same as audit log search in the Microsoft Purview portal , which means both portals can be used to review administrative actions taken in Microsoft 365.

Microsoft further explains that Microsoft Purview Audit enables organizations to search for audit records of activities that users and admins perform across Microsoft services, making it a correct tool for this requirement.

By contrast, Search & intelligence in the Microsoft 365 admin center is not the feature used to investigate administrator actions through the unified audit log. It is not Microsoft's documented audit search tool for this purpose. Therefore, for this hotspot the right answers are No for Search & intelligence, Yes for Audit in Microsoft Defender, and Yes for Audit in Microsoft Purview.

NEW QUESTION # 38

.....

With AB-900 fabulous dump, you have no fear of losing the exam. Actually, the state of the art content in dumps leaves no possibility of confusion for the candidate and the deficiency of information to answer questions in the real exam. Only a few days' effort can equip you thoroughly and thus impart you enormous confidence to appear in AB-900 Exam and ace it in your very first go.
