Check Point Certified Security Expert R81 certification is ideal for security professionals who want to enhance their skills and knowledge in the field of network security.

## CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q90-Q95):

### NEW QUESTION # 90

What is the purpose of extended master key extension/session hash?

- A. In case of TLS1.x it is a prevention of a Man-in-the-Middle attack/disclosure of the client-server communication
- B. UDP VOIP protocol extension
- C. Supplement DLP data watermark
- D. Special TCP handshaking extension

**Answer: A**

### NEW QUESTION # 91

Which Remote Access Client does not provide an Office-Mode Address?

- A. Endpoint Security VPN
- B. Endpoint Security Suite
- C. SecuRemote
- D. Check Point Mobile

**Answer: C**

Explanation:

In the context of Check Point remote access clients and Office Mode, the correct answer is:

A) SecuRemote: SecuRemote is a Check Point remote access client that does not provide an Office-Mode Address. Office Mode is a feature that assigns a unique IP address from a designated IP pool to remote users when they connect to the corporate network. SecuRemote does not support this feature.

B) Endpoint Security Suite, C. Endpoint Security VPN, and D. Check Point Mobile are remote access clients that support Office Mode and can provide an Office-Mode Address to remote users.

Therefore, option A is the correct answer as it correctly identifies a remote access client that does not provide an Office-Mode Address.

### NEW QUESTION # 92

Fill in the blank: The IPS policy for pre-R81 gateways is installed during the \_\_\_\_\_ .

- A. Access Control policy install
- **B. Anti-bot policy install**
- C. Threat Prevention policy install
- D. Firewall policy install

**Answer: B**

Explanation:

The IPS policy for pre-R81 gateways is installed during the Anti-bot policy install. The Anti-bot policy install includes both Anti-bot and IPS protections for pre-R81 gateways, since they share the same inspection engine. For R81 and above gateways, the IPS policy is installed separately as part of the Threat Prevention policy install, which also includes Anti-virus and Threat Emulation protections. References: R81 Threat Prevention Administration Guide, page 15.

### NEW QUESTION # 93

What does it mean if Deyra sees the gateway status? (Choose the BEST answer.)

| Status | Name | IP         | Version | Active Blade |
|--------|------|------------|---------|--------------|
|        | A-GW | 10.1.1.1   | R80     |              |
|        | SMS  | 10.1.1.101 | R80     |              |

- **A. There is a blade reporting a problem**
- B. SmartCenter Server cannot reach this Security Gateway.
- C. Security Gateway's MGNT NIC card is disconnected.
- D. VPN software blade is reporting a malfunction.

**Answer: A**

Explanation:

Explanation

If Deyra sees the gateway status as shown in the image, it means that there is a blade reporting a problem. The red exclamation mark indicates that one or more blades on the gateway have an issue that needs attention. The issue could be related to configuration, license, policy, or other factors. Deyra can hover over the icon to see more details about the problem. References: Training & Certification | Check Point Software, New Courses and Certificates for R81.20 - Check Point CheckMates

### NEW QUESTION # 94

Which one is not a valid Package Option In the Web GUI for CPUSE?

- **A. Export Package**
- B. Clean Install
- C. Database Conversion to R81.10 only
- D. Upgrade

**Answer: A**

Explanation:

Explanation

CPUSE (Check Point Upgrade Service Engine) is a tool that allows users to download, import, install, and uninstall software packages on Gaia OS. CPUSE has a web-based user interface that can be accessed through Gaia Portal. CPUSE offers four package options in the web GUI for different purposes:

Clean Install - This option performs a clean installation of a Major Version package, which erases all existing configuration and data on the system.

Export Package - This option exports a package from CPUSE repository to an external location for backup or transfer purposes.

Upgrade - This option performs an upgrade of a Major Version package or a Minor Version package, which preserves the existing

configuration and data on the system.

Database Conversion - This option converts the database schema of a Major Version package to match the current version.

Therefore, the correct answer is B.
