## Oracle Data Platform 2025 Foundations Associate Sample Questions (Q57-Q62):

### NEW QUESTION # 57

Which two are true about the Autonomous JSON Database?

- A. A DBA is required
- B. Accessed via document APIs
- C. Applications cannot be built without SQL
- D. Instant auto-scaling

**Answer: B,D**

Explanation:

The "Autonomous JSON Database" is "Accessed via document APIs" (A), such as SODA, for NoSQL-style operations, and offers "Instant auto-scaling" (D) for compute and storage with no downtime. "Applications cannot be built without SQL" (B) is false, as document APIs suffice, and "A DBA is required" (C) is incorrect due to its self-managing nature. Oracle's documentation highlights these autonomous and API-driven features.

### NEW QUESTION # 58

Oracle Lakehouse provides extensive data processing capabilities, to accommodate the migration of existing architectures or the creation of new, agile ones. Which service does NOT provide data processing on Oracle Cloud Infrastructure (OCI) Lakehouse?

- A. Autonomous Database

- B. OCI Data Flow
- C. Big Data Service
- **D. NoSQL Service**

**Answer: D**

#### NEW QUESTION # 59

What are the two main features of APEX's low code platform?

- A. Use traditional computer programming paradigms
- B. Limited productivity
- C. Simplified core-based licensing
- D. Build scalable web apps for MongoDB
- **E. Focus on business requirements**
- **F. Use graphical user interfaces and configuration**

**Answer: E,F**

Explanation:

Full Detailed In-Depth Explanation: Oracle APEX (Application Express) is a leading low-code platform designed to simplify and accelerate application development, particularly within the Oracle ecosystem. The two main features of APEX's low-code platform are "Use graphical user interfaces and configuration" (D) and "Focus on business requirements" (F). Option D reflects APEX's core strength: it provides a browser-based, declarative development environment with drag-and-drop functionality, wizards, and visual UI tools, allowing developers and business users to build applications with minimal coding. This reduces complexity and speeds up development, aligning with the low-code philosophy. Option F highlights APEX's emphasis on enabling users to address business needs directly, rather than getting bogged down in technical intricacies, by offering prebuilt components and templates tailored to solve real-world problems efficiently. "Limited productivity" (A) is incorrect, as APEX enhances productivity significantly. "Build scalable web apps for MongoDB" (B) is false, as APEX is optimized for Oracle Database, not MongoDB. "Simplified core-based licensing" (C) is a licensing aspect, not a development feature, and "Use traditional computer programming paradigms" (E) contradicts APEX's low-code approach, which minimizes hand-coding. Oracle's official APEX documentation emphasizes its graphical, business-focused design as key differentiators.

#### NEW QUESTION # 60

What are two typical reasons why customers CANNOT move their database into the public cloud?

- A. Total Cost of Ownership in public cloud is higher than on-premises
- **B. Regulations that prevent moving data into the public cloud**
- **C. Putting data in the cloud would break data residency rules**
- D. Public cloud does not provide storage for more than 10TB

**Answer: B,C**

Explanation:

Customers may not move databases to the public cloud due to "Putting data in the cloud would break data residency rules" (A), where laws mandate data remain in specific regions, and "Regulations that prevent moving data into the public cloud" (B), such as industry-specific compliance requirements (e.g., GDPR, HIPAA). "Total Cost of Ownership in public cloud is higher" (C) is a consideration but not a universal barrier, and "Public cloud does not provide storage for more than 10TB" (D) is false, as OCI offers vast storage options. Oracle's cloud adoption guides cite residency and regulatory constraints as common blockers.

#### NEW QUESTION # 61

Which migration type uses Datapump and GoldenGate tools?

- A. Physical Migration
- B. Indirect Connection
- C. Direct Connection
- **D. Logical Migration**

**Answer: D**

Explanation:

"Logical Migration" (B) uses "Datapump" for exporting/importing database objects and "GoldenGate" for real-time replication, focusing on data and schema transfer rather than physical structures. "Physical Migration" (A) involves moving entire database files (e.g., RMAN), while "Direct Connection" (C) and "Indirect Connection" (D) are not standard migration types. Oracle's migration guides associate Datapump and GoldenGate with logical methods.
