## Microsoft GH-300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Domain 4: Prompt Crafting and Prompt Engineering This section measures skills of Software Developers and AI Interaction Designers in effectively crafting prompts to optimize Copilot's output. It reviews foundational concepts such as prompt components, the role of language in prompting, zero-shot vs. few-shot prompting, and how chat history influences responses. Best practices and engineering principles for prompt design and training methods are also covered.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Developer Use Cases for AI: Targeting Software Engineers and Technical Leads, this domain elaborates on how AI improves developer productivity across common tasks like learning new languages, translation, documentation, debugging, data science, and refactoring. It discusses Copilot's support in software development lifecycle management and highlights its limitations. Use of the productivity API to track Copilot's impact is also included.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Privacy Fundamentals and Context Exclusions: This domain focuses on Security Engineers and Compliance Officers and addresses improving code quality with Copilot's test suggestions and security optimizations. It covers identification of security vulnerabilities, performance enhancements, and privacy features like content exclusions at repository and organization levels with explanation of their limitations. Candidates learn about safeguarding mechanisms such as duplication detection, contractual protections, security checks, and troubleshooting guide for common Copilot issues including context exclusions and suggestion gaps.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• GitHub Copilot Plans and Feature: This domain targets Product Managers and DevOps Engineers and focuses on understanding the various GitHub Copilot subscription plans like Individual, Business, and Enterprise, including distinctions and management features. It covers how Copilot is integrated into IDEs, different triggering methods for code suggestions, organizational policy management, subscription administration via API, and effective use of Copilot Chat and Knowledge Bases. Candidates also learn about CLI usage and configuration.</li> </ul>

## Microsoft GitHub Copilot Sample Questions (Q101-Q106):

### NEW QUESTION # 101

What is the correct way to access the audit log events for GitHub Copilot Business?

- A. Navigate to the Insights tab in the repository settings
- B. Use the Audit log section in the organization's GitHub settings
- C. Navigate to the Security tab in the organization's GitHub settings
- D. Use the Code tab in the GitHub repository

**Answer: B**

Explanation:

Audit log events for GitHub Copilot Business can be accessed through the Audit log section within the organization's GitHub settings. This log provides a record of activities related to Copilot usage and configuration.

### NEW QUESTION # 102

What configuration needs to be set to get help from Microsoft and GitHub protecting against IP infringement while using GitHub Copilot?

- A. Enable GitHub Copilot license checking
- B. You need to check code suggestions yourself before accepting
- C. Enforce blocking of MIT or GPL licensed code
- D. Suggestions matching public code to 'blocked'

**Answer: D**

Explanation:

To help protect against IP infringement, you need to configure GitHub Copilot to block suggestions that match public code. This ensures that the generated code is not directly copied from publicly available sources.

Reference: GitHub Copilot documentation on IP protection and code filtering.

### NEW QUESTION # 103

How can GitHub Copilot assist developers during the requirements analysis phase of the Software Development Life Cycle (SDLC)?

- A. By managing stakeholder communication and meetings.
- B. By identifying and fixing potential requirement conflicts when using /help.
- C. By providing templates and code snippets that help in documenting requirements.
- D. By automatically generating detailed requirements documents.

**Answer: C**

Explanation:

GitHub Copilot can assist during the requirements analysis phase by providing templates and code snippets that aid in documenting requirements. This helps streamline the process of capturing and organizing project requirements.

#### NEW QUESTION # 104

What is a benefit of using custom models in GitHub Copilot?

- **A. Responses use practices and patterns in your repositories**
- B. Responses are faster to produce and appear sooner
- C. Responses use the organization's LLM engine
- D. Responses are guaranteed to be correct

**Answer: A**

Explanation:

Custom models in GitHub Copilot allow the tool to learn from the specific code patterns and practices within your repositories. This results in suggestions that are more aligned with your organization's coding standards and conventions, improving the relevance and accuracy of the generated code.

Reference: GitHub Copilot Enterprise documentation on custom models.

#### NEW QUESTION # 105

How can you get multiple suggestions from GitHub Copilot?

- **A. By opening the completions panel in your editor**
- B. By asking for multiple suggestions using comments in your code
- C. By using the inline chat functionality with the command 'multiple'
- D. By using @workspace in the chat window

**Answer: A**

Explanation:

You can get multiple suggestions by opening the completions panel in your editor, which displays alternative code suggestions.

Reference: GitHub Copilot usage documentation.

#### NEW QUESTION # 106

.....
