

Hot F5CAB1 Exam Introduction | Well-Prepared F5CAB1 Valid Test Duration: BIG-IP Administration Install, Initial Configuration, and Upgrade

Among all marketers who actively compete to win customers, we sincerely offer help for exam candidates like you with our F5CAB1 exam questions. To cater to the needs of exam candidates, our experts have been assiduously worked for their quality day and night. F5CAB1 Training Materials can help you achieve personal goals about the F5CAB1 exam successfully. So of course we received sincere feed-backs from exam candidates which are maximum benefits for us.

It is known to us that our F5CAB1 learning dumps have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the F5CAB1 training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the F5CAB1 study questions from our company, you will get the certification in a shorter time.

2026 F5CAB1 – 100% Free Exam Introduction | Reliable F5CAB1 Valid Test Duration

After our practice materials were released ten years ago, they have been popular since then and never lose the position of number one in this area. Our F5CAB1 practice quiz has authority as the most professional exam material unlike some short-lived F5CAB1 Exam Materials. Targeting exam candidates of the exam, we have helped over tens of thousands of exam candidates achieved success now. So you can be successful by make up your mind of our F5CAB1 training guide.

F5 BIG-IP Administration Install, Initial Configuration, and Upgrade Sample Questions (Q29-Q34):

NEW QUESTION # 29

An administrator is in the process of reactivating the license using the interface displayed in the exhibit.

□

What is the address of the license server to which the BIG-IP device must be able to establish an outbound connection in order to use the Automatic Activation Method?

- A. callhome.f5.com
- B. license.f5.com
- **C. activate.f5.com**
- D. ask.f5.com

Answer: C

Explanation:

When you choose Automatic as the activation method in the License , Re-activate screen, the BIG-IP device itself contacts F5's license activation service over the Internet.

For successful automatic activation:

- * The BIG-IP must have outbound network connectivity (typically via the management interface).
- * DNS resolution and routing must allow it to reach the F5 license activation host (the one shown in option D).
- * The device sends its dossier and registration key to that service and receives an updated license file in return, which is then installed automatically.

The other hostnames in the options are not used by BIG-IP for license activation, so they cannot be correct in the context of Automatic Activation.

NEW QUESTION # 30

The BIG-IP Administrator received a ticket that an authorized user is attempting to connect to the Configuration Utility from a jump host and is being denied.

The HTTPD allow list is configured as:

```
sys httpd {  
  allow { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }  
}
```

The jump host IP is 172.28.32.22.

What command should the BIG-IP Administrator use to allow HTTPD access for this jump host?

- A. `modify /sys httpd allow delete { 172.28.31.0/255.255.255.0 172.28.65.0/255.255.255.0 }`
- B. `modify /sys httpd allow replace-all-with { 172.28.32.22 }`
- **C. `modify /sys httpd allow add { 172.28.32.22 }`**

Answer: C

Explanation:

The HTTPD allow list controls which IP addresses or subnets may access the Configuration Utility (TMUI) on the BIG-IP system. The Administrator already has two subnets allowed and needs to add a single host IP to the existing list.

- * The object `/sys httpd` allows actions such as `add`, `delete`, and `replace-all-with`.
- * Because the goal is to add one more entry without removing the existing permitted subnets, the correct command is:
`modify /sys httpd allow add { 172.28.32.22 }`

This appends the new host to the existing list while preserving the previously configured networks.

Why the other options are incorrect:

- * Option A (`replace-all-with`) would overwrite the entire allow list, removing existing permitted subnets- unacceptable.
- * Option B (`delete`) would remove the existing networks and not add the required host.

Therefore, the correct administrative action is to add the jump host's IP.

NEW QUESTION # 31

Which of the following are resource allocation (provisioning) settings for BIG-IP modules?
(Choose two.)

- **A. Nominal**
- B. Maximum
- C. Limited
- **D. Dedicated**

Answer: A,D

Explanation:

BIG-IP module provisioning determines how CPU, memory, and disk resources are allocated to each licensed module. F5 defines a specific set of supported provisioning levels.

Valid provisioning (resource allocation) settings

Nominal

- * Allocates a standard, balanced amount of system resources to a module.
- * Intended for typical production deployments where multiple modules may be provisioned at the same time.

Dedicated

- * Allocates all available system resources to a single module.
- * Used when the BIG-IP device is dedicated to running only one module (for example, ASM-only or APM-only deployments).
- * No other modules can be provisioned when one is set to Dedicated.

These two options are valid and supported provisioning levels.

Why the other options are incorrect

Maximum

- * This is not a valid BIG-IP provisioning level.
- * BIG-IP does not use "Maximum" as a resource allocation setting.

Limited

- * This is also not a supported provisioning level.
- * BIG-IP uses levels such as None, Minimal, Nominal, and Dedicated (module-dependent), not Limited.

NEW QUESTION # 32

A BIG-IP Administrator needs to purchase new licenses for a BIG-IP appliance.

The administrator needs to know:

- * Whether a module is licensed
- * The memory requirement for that module

Where should the administrator view this information in the System menu?

- A. Configuration - Device
- **B. Resource Provisioning**
- C. Configuration - OVSDDB
- D. Software Management

Answer: B

NEW QUESTION # 33

What will setting a Self IP to "Allow None" for Port Lockdown do?

- A. Block HA communications, causing the systems to report their peer as online ready.
- **B. Block HA communications, causing the systems to report their peer as offline and go active-active.**
- C. Default allow port 1026 access between peer devices and traffic processing across the network failover.

Answer: B

Explanation:

The Port Lockdown feature controls which services a Self-IP will respond to.

Setting a Self-IP to Allow None means:

- * The Self-IP will not accept any traffic except the very limited, hard-coded HA ports such as TCP 4353 used for device trust and configuration sync.
- * All other HA ports, including those needed for network failover and other HA mechanisms, are blocked.

When essential HA services cannot communicate, each device assumes its peer is down.

This results in:

- * HA failover misbehavior
- * Both devices thinking the other is offline
- * Potential active-active condition, which is not intended and can cause traffic disruption. Thus, Allow None can break HA functionality unless the Self-IP is not used for HA links.

NEW QUESTION # 34

In traditional views, the F5CAB1 practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real F5CAB1 exam. However, our F5CAB1 learning questions are not doing that way. According to data from former exam candidates, the passing rate of our F5CAB1 learning material has up to 98 to 100 percent. There are adequate content to help you pass the exam with least time and money.

Are you still looking for F5CAB1 Dumps Download exam materials, F5 F5CAB1 Exam Introduction Actions speak louder than any kinds of words, once you place your order and you will not regret, F5 F5CAB1 Exam Introduction Both of two versions are available for different kinds of electronic products, To get the F5CAB1 certification is considered as the most direct-viewing way to make big change in your professional profile, and we are the exact F5CAB1 exam braindumps vendor.
