Besides regular updates, Real4Prep also offer up to 1 year of free real WGU Information Technology Management QGC1 (Information-Technology-Management) exam questions updates.

WGU Information Technology Management QGC1 Sample Questions (Q180-Q185):

NEW QUESTION # 180

Which enterprise resource planning (ERP) feature benefits small businesses?

- A. Customizable business modules
- B. Offline processing only
- C. Minimal IT infrastructure
- **D. Simple setup and low cost**

Answer: D

Explanation:

Small businesses often adopt ERP systems that are designed for simple setup, ease of use, and low cost. These ERP solutions typically provide scaled-down, cloud-based options that do not require heavy IT infrastructure, making them affordable and accessible for organizations with limited resources.

Option A: Incorrect-ERP requires infrastructure or cloud resources, not "minimal" infrastructure alone.

Option B: Incorrect-modern ERP systems are cloud-based and support online integration, not offline only.

Option C: While customizable modules are helpful, the primary small-business advantage is affordability and simplicity.

Thus, the ERP feature that benefits small businesses is simple setup and low cost.

NEW QUESTION # 181

What is a benefit of manufacturing enterprise resource planning (ERP) systems?

- A. Streamlined hiring processes
- **B. Improved material coordination**
- C. Customized machine software
- D. Enhanced supplier marketing

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A key benefit of manufacturing ERP systems is improved coordination of materials used in production. ERP integrates purchasing, inventory management, and production planning so that materials and components are:

Ordered at the right time

Delivered in the right quantities

Available at the correct locations for manufacturing activities

This integration reduces stockouts, excess inventory, and delays caused by missing parts, thereby making production more efficient and reliable. Improved material coordination supports smoother workflows on the production floor and better alignment between demand and supply.

Option A (Customized machine software) refers to specialized software for specific machines or equipment, which is not the primary benefit of a manufacturing ERP system.

Option B (Streamlined hiring processes) is a human resources function and would be associated with HR systems, not specifically manufacturing ERP.

Option C (Enhanced supplier marketing) relates more to marketing and promotion to suppliers, which is not a central benefit of manufacturing ERP.

Thus, the primary benefit listed that aligns with manufacturing ERP is improved material coordination.

NEW QUESTION # 182

What is a benefit of globalization?

- A. Costs associated with operating in new geographic areas
- **B. Access to new talent pools**
- C. Increased competition
- D. Adherence to regulatory requirements

Answer: B

Explanation:

Definition of Globalization Benefits:

Globalization allows organizations to expand their operations globally, gaining access to diverse markets and resources, including new talent pools from different regions.

Key Benefit:

Accessing new talent pools enables businesses to tap into a diverse workforce with varied skills, fostering innovation and improving operational efficiency.

Incorrect Options Analysis:

A . Costs associated with new geographic areas: This is a challenge, not a benefit.

B . Adherence to regulatory requirements: This is an obligation, not a benefit.

C . Increased competition: This is a consequence of globalization, but not a direct benefit.

and Documents of Information Technology Management:

"Global Workforce Management" (Harvard Business Review).

ITIL Global IT Strategy Framework (Axelos).

NEW QUESTION # 183

Which business impact is attributed to the creation of a knowledge-dependent global society from growth in information industries?

- A. Autonomous agent
- **B. Information of Everything**
- C. Ambient digital experience
- D. Virtual assistant

Answer: B

Explanation:

* Information of Everything (IoE):

* Refers to the phenomenon of using information derived from every connected device, system, and user in a knowledge-based global society.

* Growth in information industries enables the collection, analysis, and sharing of vast amounts of data to drive decision-making, automation, and innovation.

* Business Impact:

* Creation of a knowledge-dependent society where data is the key driver of value creation and economic growth.

* IoE facilitates smart systems, global connectivity, and the integration of diverse industries.

* Incorrect Options Analysis:

* Autonomous Agent: Refers to self-governing systems, not a societal impact.

* Ambient Digital Experience: Focuses on pervasive and seamless digital interfaces.

* Virtual Assistant: A specific application, not a broad societal impact.

References and Documents of Information Technology Management:

* Gartner's "Top Technology Trends: Information of Everything."

* ITIL 4 Digital Strategy Guide (Axelos Publications).

NEW QUESTION # 184

Which type of encryption uses related keys-one to encrypt and one to decrypt?

- A. File compression
- B. Symmetrical encryption
- C. Asymmetrical encryption
- D. Data anonymization

Answer: C

Explanation:

Asymmetrical encryption (also known as public-key encryption) uses a pair of mathematically related keys:

A public key for encryption

A private key for decryption

This ensures secure communication, as only the private key holder can decrypt data encrypted with the corresponding public key.

Option A (Symmetrical): Uses the same key for both encryption and decryption.

Option C: File compression reduces file size, not encryption.

Option D: Data anonymization removes identifying details, not encryption.

Thus, the encryption type that uses related but different keys is Asymmetrical encryption.
