

New D-PST-DY-23 Exam Test, D-PST-DY-23 Latest Exam

GetRealDumps offers 100% updated Dell EMC D-PST-DY-23 exam questions with online practice test and D-PST-DY-23 Dumps 2024. These D-PST-DY-23 exam dumps are enough for instant success in actual exam.

Latest Dell EMC D-PST-DY-23 Exam Braindumps 40 Q&As 2024 For Success

Are you planning to take the PowerStore Deploy D-PST-DY-23 certification exam and become a certified professional? Taking the D-PST-DY-23 Dell PowerStore Deploy 2023 Exam is not everyone's cup of tea and requires a lot of effort. If you are here looking for a way to crack your D-PST-DY-23 easily, then start your preparation right away. The only way to easily pass your Dell PowerStore Deploy 2023 Exam is to prepare with reliable [PowerStore Deploy D-PST-DY-23 Exam Questions 2024](#) learning material. You can find many learning sources online, but most of them are not reliable. Try GetRealDumps for the preparation of your D-PST-DY-23 test as it offers a success guarantee with the actual and latest D-PST-DY-23 dumps preparation material product.

GetRealDumps D-PST-DY-23 Exam PDF Dumps 2024 For Easy Preparation

P.S. Free 2026 EMC D-PST-DY-23 dumps are available on Google Drive shared by BootcampPDF: https://drive.google.com/open?id=1rKZCcXwqocmlcZs_HTsWCBwFHQ2rJcVZ

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. D-PST-DY-23 practice materials are an effective tool to help you reflect your abilities. With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method D-PST-DY-23 Real Questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning.

EMC D-PST-DY-23 (Dell PowerStore Deploy 2023) Exam is a certification exam designed for IT professionals who are interested in validating their skills and knowledge in deploying Dell PowerStore storage solutions. D-PST-DY-23 exam is intended for individuals who are responsible for deploying and managing Dell PowerStore storage solutions in their organization. D-PST-DY-23 exam is also suitable for individuals who are interested in pursuing a career in the storage and data management field.

EMC D-PST-DY-23 Certification Exam covers a wide range of topics related to Dell EMC PowerStore solutions. This includes topics such as PowerStore architecture, deployment options, storage provisioning, data protection, and management. D-PST-DY-23 exam is designed to test the candidate's knowledge of these topics and their ability to apply this knowledge to real-world scenarios.

D-PST-DY-23 Latest Exam, New D-PST-DY-23 Exam Duration

The best strategy to enhance your knowledge and become accustomed to the D-PST-DY-23 Exam Questions format is to test yourself. BootcampPDF EMC D-PST-DY-23 practice tests (desktop and web-based) assist you in evaluating and enhancing your knowledge, helping you avoid viewing the EMC test as a potentially daunting experience. If the reports of your EMC practice exams (desktop and online) aren't perfect, it's preferable to practice more. D-PST-DY-23 self-assessment tests from BootcampPDF works as a wake-up call, helping you to strengthen your D-PST-DY-23 preparation ahead of the EMC actual exam.

EMC Dell PowerStore Deploy 2023 Exam Sample Questions (Q76-Q81):

NEW QUESTION # 76

What is the maximum number of snapshot and replication rules that a protection policy supports?

- A. Up to four snapshot rules, and no more than one replication rule.
- B. Up to four rules, protection types cannot be mixed in the same policy.
- C. Up to four replication rules, and no more than one snapshot rule.

Answer: A

NEW QUESTION # 77

What does setting the alert threshold to 0 (zero) do when configuring replication rules?

- A. Enables alerts if the RPO cycle was missed for three consecutive cycles.
- B. Generates an alert if the data saved during the RPO cycle exceeds 20% of the storage object capacity
- C. Disables all alerts for any missed RPO cycles.
- D. Generates an alert if the synchronization time exceeds the RPO.

Answer: C

NEW QUESTION # 78

A PowerStore appliance is running out of storage capacity. The cluster consists of a PowerStore 5000T appliance with three NVMe expansion enclosures.

How can this issue be resolved?

- A. Enable advanced deduplication.
- B. Add additional SAS expansion enclosures.
- C. Add additional NVMe expansion enclosures.
- D. Add an additional PowerStore appliance.

Answer: D

Explanation:

PowerStore 5000T and Expansion: The PowerStore 5000T model supports a maximum of three NVMe expansion enclosures.

Since the appliance already has three, adding more is not an option. Scaling Out: To increase capacity in this scenario, you need to scale out by adding another PowerStore appliance to the cluster. This will provide additional storage resources and processing power.

NEW QUESTION # 79

A protection policy with snapshot and replication rules is applied to a file system.

What is the result?

- A. Snapshot rules get ignored and only replication rules get applied
- B. Replication rules get ignored and only snapshot rules get applied
- C. Both replication and snapshot rules get applied
- D. Applying the protection policy to the file system fails

Answer: B

NEW QUESTION # 80

A customer must configure two PowerStore clusters with these requirements:

Two PowerStore T appliances in each cluster.

Configure file replication between the clusters.

What is the minimum number of management subnet IPs required in each cluster to complete the configuration on each site?

- A. 06 IPs on source and target
- B. 10 IPs on source and target
- C. 09 IPs on source and target
- **D. 07 IPs on source and target**

Answer: D

Explanation:

IP Address Requirements for PowerStore T Appliances

Management IP: Each PowerStore T appliance requires one management IP address for initial configuration and ongoing management.

Cluster IP: Each PowerStore cluster requires one cluster IP address for internal communication between the appliances within the cluster.

File Mobility Network (FMN) IPs: For file replication, each PowerStore cluster needs three FMN IP addresses. These are dedicated IPs used for replication traffic between clusters.

Calculating the Total Number of IPs

Since the scenario involves two PowerStore T appliances in each cluster, let's calculate the IP addresses needed per cluster:

2 appliances x 1 management IP per appliance = 2 management IPs

1 cluster IP

3 FMN IPs

Total: 2 + 1 + 3 = 6 IPs

However, there's a crucial detail:

Additional IP for File Replication: When configuring file replication, an additional IP address is required on the source cluster for the destination cluster to connect to. This is used for the replication relationship and communication.

Therefore, the final count is:

Source Cluster: 6 IPs + 1 additional IP = 7 IPs

Target Cluster: 6 IPs = 6 IPs

Since the question asks for the minimum number of IPs in each cluster to complete the configuration, the answer is 7 IPs.

Dell PowerStore Reference

PowerStore: Networking Guide for Storage Services: This guide provides detailed information about IP address requirements for different PowerStore configurations, including file replication. You can find the latest version on the Dell Support site.

PowerStore: Replication Technologies - Overview and Prerequisites: This document outlines the requirements for configuring replication, including the need for additional IP addresses for the File Mobility Network.

Link to PowerStore documentation: <https://infohub.delltechnologies.com/l/dell-powerstore-replication-technologies/overview-and-prerequisites-1/> Understanding these IP address requirements is crucial for proper network planning and configuration in PowerStore environments, especially when implementing features like file replication.

NEW QUESTION # 81
