Oracle N16291GC10 Exam Syllabus Topics:

Topic	Details
Topic 1	• Setup and Administration: This section of the exam measures skills of NetSuite System Administrators and focuses on system configuration, environment management, and role-based security. It covers best practices for assigning custom roles, handling global permissions, and defining subsidiary-level access. Candidates are tested on the correct use of the Administrator role, user access configurations, multi-language settings, and environment management between Sandbox, Production, and Release Preview. Additionally, the section assesses knowledge of advanced CSV import options, troubleshooting import errors, and applying SuiteCloud Plus features.
Topic 2	• Sitebuilder: This section of the exam measures skills of NetSuite Configuration Specialists and focuses on customizing NetSuite forms and fields. It includes recognizing appropriate form types for given use cases, understanding field-level versus form-level configurations, and applying restrictions for user-specific access. The section evaluates knowledge of creating online forms, adjusting field display types, and managing data through custom fields and records. Candidates must differentiate between custom records and custom lists, configure attributes for custom record types, and identify proper use cases for "Record is Parent" or sublist publishing.
Topic 3	• Data Security: This section of the exam measures skills of Information Security Specialists and focuses on managing access and safeguarding sensitive data within NetSuite. It includes understanding how to secure the File Cabinet, configure login security, and set up Two-Factor Authentication or Single Sign-On. Candidates are evaluated on recognizing permissions with high access levels, mitigating data risks when employees exit the organization, and managing the security impact of changing field values on reports.
