Pass Guaranteed Quiz 2026 AZ-305: Designing Microsoft Azure Infrastructure Solutions Newest Exam PDF
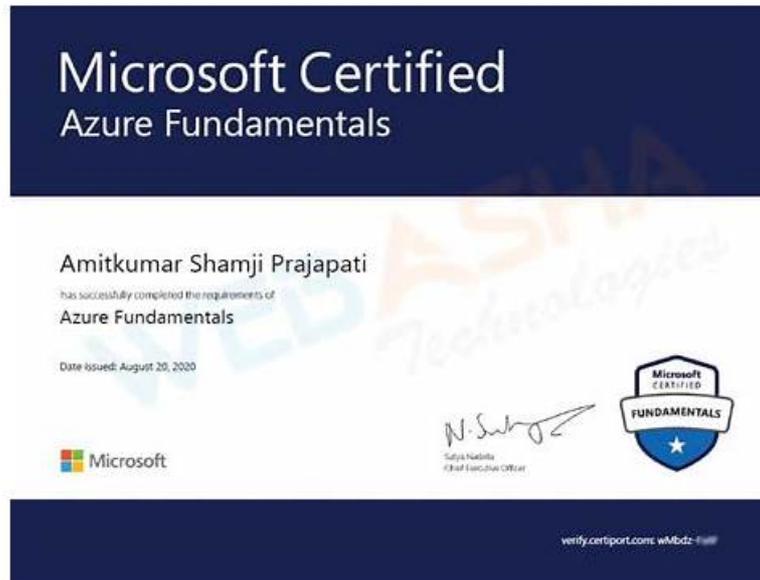

In today's society, our pressure grows as the industry recovers and competition for the best talents increases. By this way the AZ-305 exam is playing an increasingly important role to assess candidates. Considered many of our customers are too busy to study, the AZ-305 real study dumps designed by our company were according to the real exam content, which would help you cope with the AZ-305 Exam with great ease. With about ten years' research and development we still keep updating our AZ-305 prep guide, in order to grasp knowledge points in accordance with the exam, thus your study process would targeted and efficient.

The AZ-305 exam covers a broad range of topics related to Azure infrastructure solutions. These include designing compute solutions, designing networking solutions, designing storage solutions, and designing security and identity solutions. AZ-305 exam also covers topics such as Azure cost management and optimization, deployment and migration, and monitoring and troubleshooting.

Microsoft AZ-305 Exam is intended for professionals who have experience in designing and implementing Azure solutions, including architects, developers, and system administrators. AZ-305 exam is designed to test the candidate's knowledge and ability to design and implement solutions that meet business requirements, align with industry best practices, and are scalable, secure, and highly available.

100% Pass Microsoft - Newest AZ-305 - Designing Microsoft Azure Infrastructure Solutions Exam PDF

The importance of learning is well known, and everyone is struggling for their ideals, working like a busy bee. We keep learning and making progress so that we can live the life we want. Our AZ-305 practice test materials help users to pass qualifying examination to obtain a AZ-305 qualification certificate are a way to pursue a better life. If you are a person who is looking forward to a good future and is demanding of yourself, then join the army of learning to pass the AZ-305 Exam. Choosing our AZ-305 test question will definitely bring you many unexpected results!

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q402-Q407):

NEW QUESTION # 402
You are designing an Azure Cosmos DB solution that will host multiple writable replicas in multiple Azure regions.

You need to recommend the strongest database consistency level for the design. The solution must meet the following requirements:
* Provide a latency-based Service Level Agreement (SLA) for writes.
* Support multiple regions.
Which consistency level should you recommend?

- A. consistent prefix
- B. session
- C. strong
- D. bounded staleness

Answer: D

Explanation:
Each level provides availability and performance tradeoffs. The following image shows the different consistency levels as a spectrum.

Note: The service offers comprehensive 99.99% SLAs which covers the guarantees for throughput, consistency, availability and latency for the Azure Cosmos DB Database Accounts scoped to a single Azure region configured with any of the five Consistency Levels or Database Accounts spanning multiple Azure regions, configured with any of the four relaxed Consistency Levels.
Reference:
https://azure.microsoft.com/en-us/support/legal/sla/cosmos-db/v1_3/
https://docs.microsoft.com/en-us/azure/cosmos-db/consistency-levels#consistency-levels-and-latency

NEW QUESTION # 403
You are developing a multi-tier app named App1 that will be hosted on Azure virtual machines. The peak utilization periods for App1 will be from 8 AM to 9 AM and 4 PM to 5 PM on weekdays.
You need to deploy the infrastructure for App1. The solution must meet the following requirements:
* Support virtual machines deployed to four availability zones across two Azure regions.
* Minimize costs by accumulating CPU credits during periods of low utilization.
What is the minimum number of virtual networks you should deploy, and which virtual machine size should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Answer Area

NEW QUESTION # 404

You have two on-premises Microsoft SQL Server 2017 instances that host an Always On availability group named AG1. AG1 contains a single database named DB1.

You have an Azure subscription that contains a virtual machine named VM1VM1 runs Linux and contains a SQL Server 2019 instance.

You need to migrate DB1 to VMI. The solution must minimize downtime on DBI. What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

NEW QUESTION # 405

You are planning an Azure Storage solution for sensitive data. The data will be accessed daily. The data set is less than 10 GB.

You need to recommend a storage solution that meets the following requirements:

* All the data written to storage must be retained for five years.
* Once the data is written, the data can only be read. Modifications and deletion must be prevented.
* After five years, the data can be deleted, but never modified.
* Data access charges must be minimized

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: General purpose v2 with Archive acce3ss tier for blobs

Archive - Optimized for storing data that is rarely accessed and stored for at least 180 days with flexible latency requirements, on the order of hours.

Cool - Optimized for storing data that is infrequently accessed and stored for at least 30 days.

Hot - Optimized for storing data that is accessed frequently.

Box 2: Storage account resource lock

As an administrator, you can lock a subscription, resource group, or resource to prevent other users in your organization from accidentally deleting or modifying critical resources. The lock overrides any permissions the user might have.

Note: You can set the lock level to CanNotDelete or ReadOnly. In the portal, the locks are called Delete and Read-only respectively.

* CanNotDelete means authorized users can still read and modify a resource, but they can't delete the resource.

* ReadOnly means authorized users can read a resource, but they can't delete or update the resource.

Applying this lock is similar to restricting all authorized users to the permissions granted by the Reader role.

NEW QUESTION # 406

Your company has the divisions shown in the following table.

Division	Azure subscription	Azure Active Directory (Azure AD) tenant
East	Sub1, Sub2	East.contoso.com
West	Sub3, Sub4	West.contoso.com

You plan to deploy a custom application to each subscription. The application will contain the following:

A resource group

An Azure web app

Custom role assignments

An Azure Cosmos DB account

You need to use Azure Blueprints to deploy the application to each subscription.

What is the minimum number of objects required to deploy the application? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Management groups:
1
2
3
4

Blueprint definitions:
1
2
3
4

Blueprint assignments:
1
2
3
4
