# 100% Pass Quiz 2026 Useful UiPath UiPath-ADPv1: Reliable UiPath (ADPv1) Automation Developer Professional Test Review

P.S. Free 2026 UiPath UiPath-ADPv1 dumps are available on Google Drive shared by PrepAwayTest:
https://drive.google.com/open?id=1DvxzmT0nBYcUM_1PZF9eQgI-Itqmfcmv

The second form is UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) web-based practice test which can be accessed through online browsing. The UiPath-ADPv1 web-based practice test is supported by browsers like Firefox, Microsoft Edge, UiPath Chrome, and Safari. You don't need to install any plugins or software to attempt the UiPath-ADPv1 web-based practice test. This online UiPath UiPath-ADPv1 exam is also compatible with all operating systems.

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the UiPath-ADPv1 exam, our experts keep their eyes focusing on it. Our UiPath-ADPv1 exam torrent are updating according to the precise of the real exam. Our UiPath-ADPv1 Test Prep to help you to conquer all difficulties you may encounter. Once you choose our UiPath-ADPv1 quiz torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

UiPath-ADPv1 Test Pdf - Reliable UiPath-ADPv1 Exam Tips

The PrepAwayTest is a leading platform that has been helping the UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam candidates in exam preparation and boosting their confidence to pass the final UiPath-ADPv1 exam. The PrepAwayTest is offering real, valid, and updated UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) practice questions. These UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam questions are verified by UiPath UiPath-ADPv1 exam trainers. They work closely and check all UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam dumps one by one and they ensure the best possible answers to UiPath (ADPv1) Automation Developer Professional (UiPath-ADPv1) exam dumps.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.
Topic 2	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.

Topic 3	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 4	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42
What are the two types of events supported by Integration Service?

- A. Local and Remote.
- B. Generic and Predefined.
- C. Basic and Advanced.
- D. Scheduled and Unscheduled

Answer: B

Explanation:
The UiPath Integration Service supports two types of events: Generic and Predefined. Generic events are customizable, while Predefined events are specific to certain integrations and come with predefined configurations.

NEW QUESTION # 43
What are the steps to publish a project from UiPath Studio?
Instructions: Drag the Description found on the "Left" and drop on the correct Step Sequence found on the "Right".

Answer:

Explanation:

NEW QUESTION # 44
A project built using REFramework pulls phone numbers from a database of employees and creates queue items for each one. Following processing, these elements must be added to a financing application. The queue item holding a phone number becomes invalid if a digit is accidentally left out because of a human mistake.
As a requirement, queue items that contain partial numbers should not be accepted.
What type of error should be thrown according to best practices?

- A. Application Exception
- B. Fatal Exception
- C. Business Exception
- D. System Exception

Answer: C

Explanation:
The type of error that should be thrown according to best practices for queue items that contain partial numbers is Business Exception. A Business Exception is an exception that occurs due to an incorrect or incomplete input data or an expected business rule violation. A Business Exception indicates that the transaction item cannot be processed successfully and should be marked as failed in the queue. A Business Exception can be thrown by using the Throw activity in UiPath Studio, with the exception type set to UiPath.
Core.BusinessRuleException. Alternatively, a Business Exception can be thrown by using the Set Transaction Status activity in the REFramework, with the status set to Failed and the exception type set to Business Exception. References: [Business Exception vs Application Exception], [Throw], [Set Transaction Status]

NEW QUESTION # 45

When building an automation for a car rental company as part of a larger project initiative, a developer should follow the high-level steps:

1.log in to the company's desktop application.

2.For each Queue Item:

a.Navigate to the Reservations section from the Requests section.

b.Add the reservation data to the Reservations section.

c.Close the current reservation.

3.Log out and close the company's application.

What step should be mocked from the end-to-end test case in order to retrieve test data?

- A. InitAIIApplications
- B. SetTransactionStatus
- C. Process
- D. GetTransactionData

Answer: D

Explanation:

The GetTransactionData step should be mocked from the end-to-end test case in order to retrieve test data. Mocking is a technique of substituting a part of the system with a fake counterpart, usually for testing purposes1. The GetTransactionData step is responsible for fetching the next transaction item from the queue and assigning it to the TransactionItem argument2. By mocking this step, the developer can avoid interacting with the actual queue and provide a predefined transaction item for testing. This can make the test more predictable, focused, and isolated from external dependencies.

Option A is incorrect, because the SetTransactionStatus step should not be mocked, as it is used to update the status of the current transaction item in the queue, which is an important part of the end-to-end test case2. Option C is incorrect, because the Process step should not be mocked, as it contains the core business logic of the automation, such as navigating to the Reservations section, adding the reservation data, and closing the current reservation2. Option D is incorrect, because the InitAllApplications step should not be mocked, as it is used to log in to the company's desktop application, which is a necessary precondition for the end-to-end test case2.

References: 1: When should I (not) use mocks in testing? 2: The UiPath ReFramework

NEW QUESTION # 46

In the Robotic Enterprise (RE) Framework, at which point should a developer log a clear message with the Logging Level set to "Information," adhering to the best practices for automating a production-level process?

- A. Whenever data is fetched from external sources.
- B. Whenever an argument or value is used.
- C. Whenever an exception is caught in a Catch block.
- D. Whenever the robot encounters an error on a Queue Item.

Answer: A

Explanation:

In the Robotic Enterprise Framework (REFramework), best practices for logging at the "Information" level suggest recording entries that are informative about the progress of the automation. This would typically include:

The start and end of a transaction.

Status updates of a transaction.

The result of an operation, like a successful data retrieval or submission.

From the provided options, the one that aligns best with this approach would be:

B: Whenever data is fetched from external sources.

This action is a significant step in most automation processes because it usually represents a point where the robot interacts with systems outside of its immediate control, and it's important to have a record that this step has been completed successfully. It provides a clear and traceable log entry that helps in understanding the workflow's progress and is useful for audit trails and troubleshooting.

Logging every time an argument or value is used (C) would be excessive and not practical for production-level processes. Logging every exception (A) and error on a Queue Item (D) would typically be done at a

"Warning" or "Error" level, not "Information".

NEW QUESTION # 47

......

To some extent, to pass the UiPath-ADPv1 exam means that you can get a good job. The UiPath-ADPv1 exam materials you master will be applied to your job. The possibility to enter in big and famous companies is also raised because they need outstanding talents to serve for them. Our UiPath-ADPv1 Test Prep is compiled elaborately and will help the client a lot. Our product is of high quality and the passing rate and the hit rate are both high.
