

# 1Z1-771題庫分享 &最新1Z1-771題庫

2026 NewDumps最新的1Z1-771 PDF版考試題庫和1Z1-771考試問題和答案免費分享：[https://drive.google.com/open?id=1tT\\_a4j-NckXFFN\\_I5hlI4VAfg0MBhDHv](https://drive.google.com/open?id=1tT_a4j-NckXFFN_I5hlI4VAfg0MBhDHv)

面對激烈競爭，每個大學生都在為使自己在人才市場上脫穎而出而努力，多一張國際通行證無疑是為他們在就業及其他競爭中在同學中脫穎而出的法寶。所以，通過 Oracle 的 1Z1-771 考試認證是我人生中的一大挑戰，需要拼命的努力學習，不過不要緊，你可以購買NewDumps Oracle 的 1Z1-771 考試認證培訓資料，幫你輕鬆通過考試。

## Oracle 1Z1-771 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li></ul>
主題 2	<ul style="list-style-type: none"><li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li></ul>
主題 3	<ul style="list-style-type: none"><li>Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li></ul>
主題 4	<ul style="list-style-type: none"><li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li></ul>
主題 5	<ul style="list-style-type: none"><li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li></ul>
主題 6	<ul style="list-style-type: none"><li>Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul>
主題 7	<ul style="list-style-type: none"><li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li></ul>

主題 8	<ul style="list-style-type: none"> <li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
主題 9	<ul style="list-style-type: none"> <li>Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li> </ul>
主題 10	<ul style="list-style-type: none"> <li>Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
主題 11	<ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
主題 12	<ul style="list-style-type: none"> <li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>

## 最新1Z1-771題庫 & 1Z1-771更新

將NewDumps的產品加入購物車吧！你將以100%的信心去參加考試，一次性通過Oracle 1Z1-771 認證考試，你將不會後悔你的選擇的。

## 最新的 Application Development 1Z1-771 免費考試真題 (Q14-Q19):

### 問題 #14

You use the Create Page Wizard to create a faceted search page on the EMP table. What is the default report type generated for this page?

- A. Classic Report
- **B. Interactive Report**
- C. Interactive Grid
- D. Column Toggle Report

答案：B

解題說明：

When creating a faceted search page via the Create Page Wizard, the default report type is an Interactive Report. This pairs with the faceted search region to provide a searchable, filterable, and customizable report, leveraging the facets for dynamic filtering.

### 問題 #15

Which statement is true about the Link Column attributes of an Interactive Report?

- A. It is not possible to include a custom target in Link Column.
- B. A Link Column cannot be sorted, hidden, or moved by an end user.
- **C. It is not possible to exclude Link Column.**
- D. If you select Link Column, it is always displayed as the last column in the report.

答案：C

解題說明：

The Link Column in an Interactive Report adds a clickable link to each row. The true statement is:

It is not possible to exclude Link Column: Once defined in the report attributes, the Link Column is mandatory and cannot be hidden or excluded via end-user controls (e.g., Column Management). It's always rendered unless removed by the developer.

Custom target: False; custom targets (e.g., URLs, pages) can be defined.

Always last column: False; its position is configurable.

Cannot be sorted/hidden/moved: False; end users can sort or move it, though hiding is restricted.

This behavior ensures consistent navigation in reports.

#### 問題 #16

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- A. GET
- **B. PUT**
- C. POST

答案： B

解題說明：

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C . PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., /employees/101), updating the corresponding record.

A . POST: Creates new records, used for inserts, not updates.

B . GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

#### 問題 #17

Which two statements are true about Oracle APEX?

- A. Running an APEX app needs client software.
- B. Application definition is not stored in the database.
- **C. APEX eliminates middle tier application logic.**
- **D. You can build interactive reporting apps based on data from disparate systems.**

答案： C,D

解題說明：

Key truths about Oracle APEX:

APEX eliminates middle tier application logic: APEX runs entirely within the Oracle Database, using PL/SQL and SQL for logic, bypassing traditional middle-tier servers (e.g., Java EE). This simplifies architecture and boosts performance.

You can build interactive reporting apps based on data from disparate systems: Via REST Data Sources, database links, or ORDS, APEX integrates data from external systems, enabling unified reporting (e.g., combining on-premises and cloud data).

Needs client software: False; APEX is web-based, requiring only a browser.

Application definition not stored in database: False; definitions are stored as metadata in the database (e.g., APEX\_APPLICATIONS).

This reflects APEX's database-centric, low-code philosophy.

#### 問題 #18

The Movies faceted search report is filtered only when the Apply button for a selected facet is clicked. What must be done in the Page Designer so that report filtering is automatically executed when any facet value is selected?

- A. Navigate to each facet and then in the Property Editor, turn on Client-Side Filtering.
- **B. Navigate to the faceted search region Attributes, and disable the Batch Facet Changes attribute.**
- C. Navigate to the faceted search region Attributes, and turn off the Show Facet Name attribute.

答案：B

解題說明：

By default, faceted search can "batch" changes, requiring an "Apply" button click to filter the report. To enable automatic filtering: Disable the Batch Facet Changes attribute: In Page Designer, under the Faceted Search region's Attributes, setting "Batch Facet Changes" to "No" ensures the report refreshes immediately when a facet value is selected, improving responsiveness. This triggers an AJAX call to update the report without a manual submit.

Show Facet Name: This controls facet label visibility, unrelated to filtering behavior.

Client-Side Filtering: This applies to Interactive Reports/Grids, not faceted search regions, and isn't the correct solution here. This adjustment enhances the user experience by providing instant feedback.

## 問題 #19

.....

你是IT人士嗎？你想成功嗎？如果你想成功你就購買我們NewDumps Oracle的1Z1-771考試認證培訓資料吧，我們的培訓資料是通過實踐檢驗了的，它可以幫助你順利通過IT認證，有了NewDumps Oracle的1Z1-771考試認證培訓資料你在IT行業的將有更好的發展，可以享受高級白領的待遇，可以在國際上闖出一片天地，擁有高端的技術水準，你還在擔心什麼，NewDumps Oracle的1Z1-771考試認證培訓資料將會滿足你這一欲望，我們與你同甘共苦，一起接受這挑戰。
