Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q127-Q132):

NEW QUESTION # 127

You have a Microsoft 365 E5 subscription that contains the device configurations shown in the following table.

Each configuration uses either Google Chrome or Firefox as a default browser.

You need to implement Microsoft Purview and deploy the Microsoft Purview browser extension to the configurations.

To which configuration can each extension be deployed? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 128

Hotspot Question

You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

You have the data loss prevention (DLP) policies shown in the following table.

From Insider risk management, you configure a priority user group named PriGroup1 that contains User3 as a member.

You have the insider risk policies shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 129

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant and 500 computers that run Windows 11. The computers are onboarded to Microsoft Purview.

You discover that a third-party application named Tailspin_scanner.exe accessed protected sensitive information on multiple computers. Tailspin_scanner.exe is installed locally on the computers.

You need to block Tailspin_scanner.exe from accessing sensitive documents without preventing the application from accessing other documents.

Solution: From Microsoft Defender for Cloud Apps, you create an app discovery policy.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Creating an app discovery policy in Microsoft Defender for Cloud Apps is used for detecting and monitoring cloud application usage, but it does not prevent a locally installed application (Tailspin_scanner.exe) from accessing sensitive files on Windows 11 devices.

To block Tailspin_scanner.exe from accessing sensitive documents while allowing it to access other files, the correct solution is to use Microsoft Purview Endpoint Data Loss Prevention (Endpoint DLP) and add Tailspin_scanner.exe to the Restricted Apps list. Endpoint DLP allows you to block specific applications from accessing sensitive files while keeping general access available.

Restricted Apps List in Endpoint DLP ensures that Tailspin_scanner.exe cannot open, copy, or process protected documents, but it can still function normally for non-sensitive content.

NEW QUESTION # 130

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1.

You plan to create the items shown in the following table.

Which items can use Trainable 1?

- A. Label1 and Label2 only
- B. Label1, Label2, Policy1, and DLP1
- C. Label2, Policy1, and DLP1 only
- D. Label2 only
- E. Label1 and Policy1 only

Answer: C

Explanation:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns. The classifier can be used in:

1. Retention Labels (Label2) # Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) # Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) # Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.

NEW QUESTION # 131

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant.

You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You onboard the computers to Microsoft Defender for Endpoint. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Microsoft Endpoint DLP relies on Microsoft Defender for Endpoint (MDE) for its enforcement.

Onboarding Windows 10/11 devices to Defender for Endpoint ensures the Endpoint DLP policies can be applied, including monitoring and protecting content across apps and browsers.

Topic 1 : Contoso, Ltd Case Study 1 6

Topic 2 : Mix Questions 172

TOTAL 178

Topic 1, Contoso, Ltd Case Study 1

Instructions

This is a case study. Case studies are not timed separately from other exam sections. You can use as much exam time as you would like to complete each case study. However, there might be additional case studies or other exam sections. Manage your time to ensure that you can complete all the exam sections in the time provided. Pay attention to the Exam Progress at the top of the screen so you have sufficient time to complete any exam sections that follow this case study.

To answer the case study questions, you will need to reference information that is provided in the case. Case studies and associated questions might contain exhibits or other resources that provide more information about the scenario described in the case.

Information provided in an individual question does not apply to the other questions in the case study.

A Review Screen will appear at the end of this case study. From the Review Screen, you can review and change your answers before you move to the next exam section. After you leave this case study, you will NOT be able to return to it.

To start the case study

To display the first question in this case study, select the "Next" button. To the left of the question, a menu provides links to information such as business requirements, the existing environment, and problem statements. Please read through all this information before answering any questions. When you are ready to answer a question, select the "Question" button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, Boston, and Johannesburg.

Existing Environment

Microsoft 365 Environment

Contoso has a Microsoft 365 E5 tenant. The tenant contains the administrative user accounts shown in the following table.

Users store data in the following locations:

SharePoint sites

OneDrive accounts

Exchange email

Exchange public folders

Teams chats

Teams channel messages

When users in the research department create documents, they must add a 10-digit project code to each document. Project codes that start with the digits 999 are confidential.

SharePoint Online Environment

Contoso has four Microsoft SharePoint Online sites named Site1, Site2, Site3, and Site4.

Site2 contains the files shown in the following table.

Two users named User1 and User2 are assigned roles for Site2 as shown in the following table.

Site3 stores documents related to the company's projects. The documents are organized in a folder hierarchy based on the project.

Site4 has the following two retention policies applied:

Name: Site4RetentionPolicy1

Locations to apply the policy: Site4

Delete items older than: 2 years

Delete content based on: When items were created

Name: Site4RetentionPolicy2

Locations to apply the policy: Site4

Retain items for a specific period: 4 years

Start the retention period based on: When items were created

At the end of the retention period: Do nothing

Problem Statements

Management at Contoso is concerned about data leaks. On several occasions, confidential research department documents were leaked.

Requirements

Planned Changes

Contoso plans to create the following data loss prevention (DLP) policy:

Name: DLPpolicy1

Locations to apply the policy: Site2

Conditions:

Content contains any of these sensitive info types: SWIFT Code

Instance count: 2 to any

Actions: Restrict access to the content

Technical Requirements

Contoso must meet the following technical requirements:

All administrative users must be able to review DLP reports.

Whenever possible, the principle of least privilege must be used.

For all users, all Microsoft 365 data must be retained for at least one year.

Confidential documents must be detected and protected by using Microsoft 365.

Site1 documents that include credit card numbers must be labeled automatically.

All administrative users must be able to create Microsoft 365 sensitivity labels.

After a project is complete, the documents in Site3 that relate to the project must be retained for 10 years.

NEW QUESTION # 132

.....

Everyone wishes to spend their career at one level. Obtaining a Administering Information Security in Microsoft 365 SC-401 certificate is the reason that many people join the Microsoft SC-401 exam. They can be sure of earning promotions and higher pay at their current job with this credential. While attempting career growth is crucial, you can only do so after clearing the Administering Information Security in Microsoft 365 SC-401 Exam.
