

CTFL-AcT真題材料，CTFL-AcT考古題

從Google Drive中免費下載最新的NewDumps CTFL-AcT PDF版考試題庫：https://drive.google.com/open?id=17D1hyPA2i5VpF5ljUSxOeoA_TSoMVrR8

IT行業中很多雄心勃勃的專業人士為了在IT行業中能更上一層樓，離IT頂峰更近一步，都會選擇ISQI CTFL-AcT這個難度較高的認證考試來獲取通認證證書從而獲得行業認可。ISQI CTFL-AcT的難度比較高所以通過率也比較低。但是報名參加ISQI CTFL-AcT認證考試是個明智的選擇，因為在如今競爭激烈的IT行業應該要不斷提升自己。但是您可以選擇很多方式幫你通過考試。

你是否正在為通過ISQI CTFL-AcT認證考試而奮鬥？想早點實現通過ISQI CTFL-AcT認證考試的目標嗎？你可以選擇我們的NewDumps為你提供的培訓資料。如果你選擇了NewDumps，通過ISQI CTFL-AcT認證考試不再是一個夢想。

>> CTFL-AcT真題材料 <<

最新的CTFL-AcT真題材料以及資格考試的領先材料供應商和權威CTFL-AcT考古題

ISQI CTFL-AcT認證考試在IT行業裏有著舉足輕重的地位，相信這是很多專業的IT人士都認同的。通過ISQI CTFL-AcT認證考試是有一定的難度的，需要過硬的IT知識和經驗，因為畢竟ISQI CTFL-AcT認證考試是權威的檢驗IT專業知識的考試。如果你拿到了ISQI CTFL-AcT認證證書，你的IT職業能力是會被很多公司認可的。NewDumps在IT培訓行業中也是一個駐足輕重的網站，很多已經通過ISQI CTFL-AcT認證考試的IT人員都是使用了NewDumps的幫助才通過考試的。這就說明NewDumps提供的針對性培訓資料是很有趣的。如果你使用了我們提供的培訓資料，您可以100%通過考試。

最新的 ISTQB Foundation Level CTFL-AcT 免費考試真題 (Q45-Q50):

問題 #45

Which one of the following statements describes the collaboration between business analysts and testers BEST?

- A. Business analysts collaborate on test planning and risk analysis to ensure that further on, appropriate test cases are developed and prioritized.
- B. Once the requirements and acceptance criteria have been defined, business analysts are no longer involved in testing activities.
- C. Testers participate in identifying business needs of stakeholders to better understand the business needs and related requirements.
- D. Business analysts usually cannot review acceptance tests, because they do not understand the technical details.

答案：A

解題說明:

The ISTQB CTFL Acceptance Testing Syllabus emphasizes the importance of collaboration between business analysts and testers throughout the testing lifecycle, especially during test planning and risk identification.

Business analysts contribute domain knowledge and business context, which is crucial in identifying business-critical areas, defining priorities, and ensuring that acceptance tests align with business goals.

Option A correctly identifies this collaboration. During test planning, business analysts help define acceptance criteria, identify risks from a business perspective, and support test prioritization to focus on high-value features. Their early involvement ensures that acceptance tests are meaningful and support stakeholder expectations.

Option B is incorrect as business analysts actively review acceptance tests to confirm alignment with business rules, regardless of technical complexity.

Option C is inaccurate because although testers seek to understand business needs, the responsibility for identifying those needs lies with business analysts.

Option D is incorrect; business analysts remain engaged throughout the project lifecycle, including test support and defect triage.

Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 1.4):

"Testers and business analysts collaborate during test planning and analysis activities to ensure the tests meet business needs and risk areas are adequately covered." Therefore, A provides the most accurate and comprehensive description.

問題 #46

As an acceptance tester you want to test the \$100 withdrawal process described by the following Business Process Model and Notation (BPMN) model.

You would like to achieve the following coverage criterion "execute all possible process tasks". Consider the following test cases:

Test 1: balance = \$100, receipt = YES

Test 2: balance = \$120, receipt = NO

Test 3: balance = \$85

Test 4: balance = \$20, receipt = YES

Which of the following is the minimal set of test cases allowing to achieve required coverage?

- A. Test 1, Test 2, Test 4
- **B. Test 1, Test 3**
- C. Test 2, Test 4
- D. Test 1, Test 2, Test 3

答案: B

解題說明:

Comprehensive Detailed Explanation (Approx. 200-220 words):

This question focuses on the coverage criterion "execute all possible process tasks" from the BPMN model of a \$100 withdrawal. Let's analyze the process:

The process starts when the user selects "Withdraw \$100."

A decision gateway checks if the balance is # \$100.

If NO: the card is removed and withdrawal is rejected.

If YES: the user is prompted to select whether they want a receipt.

Depending on the user's choice:

If YES: the receipt is printed # then \$100 is withdrawn # card is removed.

If NO: \$100 is withdrawn # card is removed (no receipt printed).

To meet the criterion "execute all possible process tasks," we must cover:

Rejected withdrawal path (balance < 100)
 Withdrawal without receipt
 Withdrawal with receipt
 Receipt printing
 Card removal in both success and failure
 Test case coverage:
 Test 1 (balance = \$100, receipt = YES): covers successful withdrawal + receipt printed.
 Test 3 (balance = \$85): covers withdrawal rejected + card removed.
 Together, these two tests execute all possible process tasks:
 Withdraw with receipt
 Reject due to insufficient balance
 Receipt printed
 Withdraw funds
 Remove card
 Other test combinations are redundant or do not add new path coverage.

問題 #47

Suppose you are an acceptance tester in a project developing a medical scanner. The scanner is meant to be used in a hospital and should allow the examination of at least 50 patients per day. Which one of the following perspectives is MOST affected, if the product does not meet the specified performance requirements?

- A. User perspective
- **B. Business perspective**
- C. Technical perspective
- D. Functional perspective

答案: B

解題說明:

The medical scanner must be able to examine at least 50 patients per day. This requirement directly impacts hospital operations and service efficiency. If the scanner fails to meet performance requirements, such as processing speed or availability, it will affect the hospital's ability to deliver services to patients - impacting schedules, patient flow, and ultimately the business goals of the hospital. Option C is correct because it reflects the consequences of performance shortfalls from a business outcome perspective: failure to meet this requirement may result in financial loss, compliance issues, or customer dissatisfaction.

Other options:

A (User perspective) is involved, but the impact here is primarily operational/business.

B (Functional perspective) refers to whether the scanner has the correct features, not performance.

D (Technical perspective) is also relevant, but the business impact (e.g., service delivery) takes precedence in this case.

問題 #48

Which of the following provides the BEST description of Beta testing?

- A. The effectiveness of beta testing sessions depends on the quality of the test charter
- B. In Agile, beta testing must be performed at the same time as user stories are developed
- **C. Beta testing aims to obtain feedback from users in their context of use**
- D. Beta testing is generally performed jointly by testers, business analysts, product owners and developers

答案: C

解題說明:

Beta testing is a form of external user acceptance testing where real users test the product in their environment before the official release. It helps identify issues that may not have been caught in internal testing and gather user feedback on functionality, usability, and performance in real-world conditions.

Option C is correct - the core goal of beta testing is to obtain user feedback in their actual usage context, providing insight into how the system performs outside of controlled environments.

Other options:

A: Test charters are used in exploratory testing, not typically in beta testing.

B: Incorrect - beta testing is not tied to the timing of user story development in Agile.

D: Incorrect - beta testing is performed by end users, not by internal team members like developers or business analysts.

C). Beta testing aims to obtain feedback from users in their context of use

問題 #49

Which one of the following arguments is the BEST reason to add additional information to BPMN diagrams?

- A. Links to requires test equipment facilitate test case reviews of stakeholders
- B. Link to requirements / user stories enable testers to execute the tests
- C. Link to priorities help test case authors to write comprehensive test cases
- **D. Link to risks provide input to testers for selecting regression tests**

答案：D

解題說明：

In BPMN models, additional annotations such as links to requirements, test data, or risks improve the value of the diagram for downstream stakeholders like testers. When BPMN tasks or flows are linked to known risks, testers can prioritize regression test cases accordingly - a key principle in risk-based testing.

Option D is correct because linking risks to business processes gives testers meaningful input for deciding which parts of the system require deeper or repeated testing.

Other options:

A: Priority links are useful, but less impactful than risk-based test selection.

B: Links to test equipment are not commonly embedded in process diagrams and are more relevant to hardware or system integration testing.

C: Linking to requirements helps traceability, but execution readiness is more closely tied to test cases and data than to BPMN.

D). Link to risks provide input to testers for selecting regression tests

問題 #50

.....

ISQI CTFL-AcT 認證作為全球IT領域專家 ISQI 熱門認證之一，是許多大中IT企業選擇人才標準的必備條件。ISQI CTFL-AcT 考題由全球領先的IT認證考試中心授權，幫助考生一次性順利取得通過 CTFL-AcT 考試；否則將全額退費，這一舉動保證考生權利不受任何的損失。考生考試前需要在全國的Prometric考試中心進行報名並預約考試時間。

CTFL-AcT考古題：<https://www.newdumpspdf.com/CTFL-AcT-exam-new-dumps.html>

CTFL-AcT認證是全球專業認證各領域中的權威認證，CTFL-AcT認證考試是一個很難的考試，CTFL-AcT認證考試就是最重要的考試之一，ISQI CTFL-AcT真題材料 我們不僅能幫你順利地通過考試還會為你提供一年的免費服務，但是，也有一部分人是從CTFL-AcT問題集入手的，ISQI CTFL-AcT真題材料 只要你選對了工具，成功簡直就是一件輕而易舉的事情，在這個網路盛行的時代，有很多的方式方法以備你的ISQI的CTFL-AcT認證考試，NewDumps提供了最可靠的培訓的試題及答案，以備你順利通過ISQI的CTFL-AcT認證考試，我們NewDumps的ISQI的CTFL-AcT考試認證有很多種，我們將滿足你所有有關IT認證，ISQI CTFL-AcT真題材料 如果你不知道怎么办的话，我来告诉你。

那妳告訴我，都有哪些王，壹劍出，虎神通敗，CTFL-AcT認證是全球專業認證各領域中的權威認證，CTFL-AcT認證考試是一個很難的考試，CTFL-AcT認證考試就是最重要的考試之一，我們不僅能幫你順利地通過考試還會為你提供一年的免費服務。

ISQI CTFL-AcT真題材料是行業領先材料 & CTFL-AcT ISTQB Foundation Level - Acceptance Testing

但是，也有一部分人是從CTFL-AcT問題集入手的。
