

Reliable Exam 1Z0-1055-25 Pass4sure - Testking 1Z0-1055-25 Learning Materials

2026 Latest Pass4sures 1Z0-1055-25 PDF Dumps and 1Z0-1055-25 Exam Engine Free Share: <https://drive.google.com/open?id=1dpaVlsrl0-RWshhRXku04NZtJSYSBS4H>

For candidates who are going to select the 1Z0-1055-25 training materials for the exam, the pass rate for the 1Z0-1055-25 training materials is important. With pass rate reaching 98.65%, the exam dumps have reached great popularity among the candidates, and we have received many good feedbacks from the buyers. In addition, 1Z0-1055-25 Exam Materials are edited by professional experts, they possess the professional knowledge for the exam, therefore the quality can be guaranteed. We have free demo for you to have a try for 1Z0-1055-25 training materials. You can have a try before buying.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 2	<ul style="list-style-type: none"> Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 3	<ul style="list-style-type: none"> Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.
Topic 4	<ul style="list-style-type: none"> Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.

Topic 5	<ul style="list-style-type: none"> • Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.

What sets Pass4sures Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) practice tests (desktop and web-based) apart are their unique features. The 1Z0-1055-25 web-based practice exam is compatible with all operating systems and it can be taken on popular browsers like Chrome, Firefox, and Safari. The Oracle 1Z0-1055-25 desktop practice exam software is compatible with Windows computers. After validating the product's license, you won't need an active internet connection to use the desktop Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) practice test software.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q46-Q51):

NEW QUESTION # 46

You have created an approval rule as follows:

Rule 1: If the invoice amount > \$1000, route it to User 1.

Rule 2: If the invoice amount < \$1000, auto-approve it.

What will happen if a user creates an invoice for \$1000 and routes it for approval?

- A. Invoice will be sent to User 1 for approval.
- **B. The workflow will fail once approval is initiated, and the invoice will not get processed.**
- C. Invoice will be auto-approved.
- D. The initiate option is greyed out for the invoice.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Payables, when configuring invoice approval rules, it's crucial to ensure that all possible scenarios are accounted for to prevent workflow errors. In the given setup:

Rule 1: Invoices with an amount greater than \$1000 are routed to User 1 for approval.

Rule 2: Invoices with an amount less than \$1000 are auto-approved.

However, there is no rule defined for invoices equal to \$1000. This omission creates a gap in the approval process. When an invoice for exactly \$1000 is submitted, the system doesn't find a matching rule to apply, leading to a workflow failure. As a result, the approval process cannot proceed, and the invoice remains unprocessed.

Best Practice: To avoid such issues, it's essential to define comprehensive and inclusive approval rules that cover all possible scenarios. In this case, modifying the rules to include invoices equal to \$1000 would resolve the problem. For example:

Revised Rule 1: If the invoice amount \geq \$1000, route it to User 1.

Revised Rule 2: If the invoice amount < \$1000, auto-approve it.

This adjustment ensures that invoices with an amount of exactly \$1000 are routed appropriately, preventing workflow failures.

NEW QUESTION # 47

You are testing the Payables to General Ledger Reconciliation report at the ledger level for your UK Ledger. You have run and selected the extract for the report but the request returned the message: "No data to display".

What is the reason for this?

- A. The reconciliation flag has not been enabled for your liability accounts.
- **B. The financial category of Accounts Payable is not assigned to the liability accounts.**
- C. You did not select the business units associated to the UK Ledger.
- D. You did not specify the range of liability accounts to include in the extract.

Answer: B

NEW QUESTION # 48

As a Workflow Administrator, you are tasked with configuring certain invoice approval rules to align with your company's policy. You decide to make use of the purchase order additional attributes and descriptive flexfields to appropriately configure invoice approval rules and route workflow notifications to approvers.

Which two are NOT purchase order additional attributes that workflow administrators can use to configure invoice approval workflow rules?

- **A. Purchase Order Schedule**
- **B. Purchase Order Pending Fulfillment**
- C. Purchase Basis
- D. Freight Terms
- E. Purchase Order Destination Type Lookup Code

Answer: A,B

NEW QUESTION # 49

Which three are valid reasons why you cannot close your Payables period?

- **A. Incomplete payment files**
- B. Suppliers on payment holds
- **C. Bills payable requiring maturity**
- **D. Unaccounted invoices and payments**
- E. Unapplied prepayments

Answer: A,C,D

Explanation:

Comprehensive and Detailed In-Depth

Closing a Payables period in Oracle Financials Cloud requires that all transactions for the period are fully processed and accounted for. The system enforces certain checks to ensure data integrity and accurate financial reporting. The following are valid reasons that can prevent the closure of a Payables period:

Incomplete Payment Files (Option B):

Payment files that have been initiated but not completed will prevent period closure. All payment processes must be finalized to ensure that all disbursements are accurately recorded.

Reference:

Bills Payable Requiring Maturity (Option C):

Bills payable that have not yet reached their maturity date or have not been accounted for will block the period from closing. It's essential to update the status of all bills payable to reflect their maturity and ensure they are accounted for in the correct period.

Unaccounted Invoices and Payments (Option D):

Invoices and payments that have been entered but not yet accounted for will prevent period closure. All such transactions must be fully processed and posted to the general ledger to ensure financial statements are accurate and complete.

Options A and E are not valid reasons for preventing period closure:

Unapplied Prepayments (Option A):

While unapplied prepayments represent amounts paid in advance that have not yet been matched to invoices, they do not prevent the closure of a Payables period. These can remain unapplied across periods and do not impact the period close process.

Suppliers on Payment Holds (Option E):

Suppliers placed on payment holds indicate that payments to these suppliers are temporarily suspended. This status does not affect the ability to close a Payables period, as it pertains to future payments rather than existing transactions within the period.

In summary, to successfully close a Payables period, ensure that all payment files are complete, bills payable are matured and accounted for, and all invoices and payments are fully processed and posted.

NEW QUESTION # 50

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work area. a. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent. Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- A. The analyst was not given the Procurement Administrator role.
- **B. The analyst was not given the Supplier Manager role.**
- C. The analyst was not given the Supplier Administrator role.
- D. The analyst was not given the Procurement Requester role.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.

A . The analyst was not given the Procurement Administrator role.

The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.

B . The analyst was not given the Supplier Manager role.

The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.

support.oracle.com

C . The analyst was not given the Supplier Administrator role.

While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.

D . The analyst was not given the Procurement Requester role.

The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.

In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.

NEW QUESTION # 51

.....

The Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) Exam Questions offered by Pass4sures provide you with a good idea of what you can expect in the 1Z0-1055-25 exam from Oracle. All the 1Z0-1055-25 exam topics and objectives are well covered by our product. Thus, Pass4sures Oracle 1Z0-1055-25 Practice Questions are considered a very good resource that will help you in your practicing by focusing on your weak points and strengthening them to easily pass the 1Z0-1055-25 exam.
