## Huawei HCSA-Presales-IP Network V4.0 Sample Questions (Q101-Q106):

### NEW QUESTION # 101

Which of the following statements is false about the WAC + Fit AP networking solution?

- A. A Fit AP encrypts and decrypts 802.11 packets, provides 802.11 physical layer functions, and collects air interface statistics.
- B. The WAC controls and manages Fit APs.
- C. The WAC is responsible for WLAN access control, traffic forwarding and statistics collection, AP configuration monitoring, and roaming management.
- D. The AC and Fit APs communicate through SNMP.

**Answer: D**

Explanation:

In aWAC (Wireless Access Controller) + Fit AP architecture:

A, B, and C are accurate descriptions.

D is false: The AC (WAC) and Fit APs do not use SNMP for communication. Instead, they communicate using CAPWAP (Control And Provisioning of Wireless Access Points) protocol, which supports control, management, and data encapsulation between ACs and APs.

SNMP is used for network management and monitoring but is not the protocol for AC-to-AP communication in WLAN scenarios.

#### NEW QUESTION # 103

What are the characteristics of Segment Routing?

- **A. It introduces the source routing mechanism conforming to SDN.**
- **B. It reduces the number of protocols and extends IGP/BGP to support label distribution without depending on LDP or RSVP.**
- C. Its deployment is dependent on the controller.
- D. Its deployment is dependent on LDP and RSVP.

**Answer: A,B**

Explanation:

Segment Routing (SR) introduces a source routing model where the source node defines the path that packets take through the network by imposing a list of segments (instructions).

SR is aligned with SDN principles - the network is programmable and flexible.

SR does NOT depend on LDP or RSVP. Instead, SR uses extensions to IGP (OSPF or IS-IS) or BGP to distribute segment information.

SR simplifies the control plane by reducing the number of protocols needed for label distribution.

SR can work with or without a controller - the controller enhances path computation but is not mandatory for basic SR operation.
