NEW QUESTION # 25

In Avaya Aura System Manager, how is Avaya Aura Messaging (AAM) added to the list of Managed Elements?

- A. It is automatically added using `initTM -f` command on the Command Line Interface of AAM.
- B. It is automatically added during the enrollment process.
- C. It is added when you configure the AAM SIP Entity in SMGR.
- D. It can only be manually added.

Answer: A

Explanation:

In System Manager, element installation sets up the trust between System Manager and its managed elements. . Similarly, UCM has a trust management process to set up the trust between UCM and its managed elements. To enable managed elements of UCM to be in the same trust domain as the System Manager managed elements, you must import the UCM Certificate Authority (CA) certificate to the System Manager managed element's trusted certificate list.

Note: To force a re-initialization of trust management

1. Ensure the enrollment password in the System Manager Security -> Enrollment Password screen is valid and set. Make note of this password as it will be needed when running the trust management initialization command.
2. Log into the Session Manager virtual machine IP address with an ssh client as the craft or customer account login
3. Execute the following shell command once at the shell prompt:

```
$ initTM -f
```

This will prompt you for the enrollment password and then initialize trust management and the database replication service of the Session Manager.
