

2V0-13.25 Actual Lab Questions & 2V0-13.25 Certification Training & 2V0-13.25 Pass Ratio

2026 Latest Pass4sureCert 2V0-13.25 PDF Dumps and 2V0-13.25 Exam Engine Free Share: <https://drive.google.com/open?id=1woSRBaCJRMmFuNeeRW9HBIVWyQ90HwIf>

Comparing to other training classes, our 2V0-13.25 dumps pdf can not only save you lots of time and money, but also guarantee you pass exam 100% in your first attempt. Our test engine enjoys great popularity among the dumps vendors because it allows you practice our 2V0-13.25 Real Questions like the formal test anytime. We will offer you one-year free update 2V0-13.25 braindumps after one-year.

VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.
Topic 2	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.
Topic 3	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.
Topic 4	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.
Topic 5	<ul style="list-style-type: none"> • VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.

Top-Selling 2V0-13.25 Realistic Practice Exams

Pass4sureCert provides updated and valid VMware Exam Questions because we are aware of the absolute importance of updates, keeping in mind the dynamic VMware Cloud Foundation 9.0 Architect exam syllabus. We provide you update checks for 1 year after purchase for absolutely no cost. We also give a 30% discount on all VMware 2V0-13.25 Dumps.

VMware Cloud Foundation 9.0 Architect Sample Questions (Q19-Q24):

NEW QUESTION # 19

An architect is designing a new VMware Cloud Foundation (VCF) solution. They are meeting with the key stakeholders and subject matter experts (SMEs) for the first time as part of the requirements gathering process. The following information has been shared with the architect prior to the meeting:

* Names and job titles of the attendees

* Project timelines and budget

What step should the architect perform as part of this initial requirements gathering workshop?

- A. Open the meeting with a diagram of the VCF topology that must meet the customer requirements in order to start a discussion.
- **B. Ask questions to start a discussion on the business objectives and desired outcomes.**
- C. Ask questions to agree on the key product features the SMEs want from the design.
- D. Open the meeting with a list of the VCF design decisions from the public documentation to agree on any required changes.

Answer: B

Explanation:

The first workshop focuses on understanding business drivers, objectives, and outcomes before diving into design specifics. VMware design methodology stresses that architects should start with business requirements and then move toward conceptual, logical, and physical designs.

* A and Care premature - topology and design decisions should not be presented before business outcomes are captured.

* B focuses on product features, which is technical and should come later.

* Dis correct because identifying business objectives ensures the architecture aligns with customer goals.

NEW QUESTION # 20

Which VMware Cloud Foundation tools support automated scaling of cloud resources?

- **A. VMware vRealize Automation**
- B. VMware vSAN
- **C. VMware vSphere DRS**
- D. VMware NSX

Answer: A,C

Explanation:

VMware vRealize Automation and vSphere DRS help automate scaling in VMware Cloud Foundation.

NEW QUESTION # 21

What is the primary role of VMware vSphere in the Broadcom VMware Cloud Foundation integration?

- A. Manages cloud billing and cost optimization
- B. Handles networking and security
- C. Manages data storage
- **D. Provides compute virtualization**

Answer: D

Explanation:

VMware vSphere plays a critical role in managing and virtualizing computing resources in VMware Cloud Foundation.

NEW QUESTION # 22

In a VMware environment using Broadcom hardware, which components contribute most to improving network performance and scalability?

- **A. Broadcom 25GbE Ethernet Adapter**
- **B. vSphere DRS**
- C. Broadcom RAID Controller
- D. Broadcom Fibre Channel HBA

Answer: A,B

Explanation:

Broadcom 25GbE Ethernet Adapters and vSphere DRS are key for network performance and scalability in VMware environments.

NEW QUESTION # 23

Which actions should be taken when VMware vSAN performance is degrading with Broadcom storage solutions?

- **A. Check vSAN disk health**
- **B. Add additional vSAN nodes**
- C. Disable storage deduplication
