Salesforce Certified Sharing and Visibility Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37

A sales rep (John) at Universal Containers (UC) requested to update information in an account record where he has READ only access. John requested the EDIT access permission from the owner of the record (Paul). Paul manually shared the record with John. Assuming the OWD of the Account object is Public Read-Only, what is the impact in the system?

- A. New AccountShare record is created. Row Cause is "Owner" and Access Level is "Full".
- **B. Existing AccountShare record is updated. Row Cause is "Owner" and User/Group is "John".**
- C. Existing AccountShare record is updated. Row Cause is "Manual" and Access Level is "Read/Write".
- D. New AccountShare record is created. Row Cause is "Manual" and Access Level is "Read/Write".

Answer: B

NEW QUESTION # 38

Universal Containers would like to control access to records and objects according to the following business requirements: Sales users can view all account records but only edit their own records. Sales managers can view all account records but only edit records of their team. Service users can view all account records that are not marked with a RecordType of Prospect. Which organization-wide default configuration should an architect recommend to fulfill these requirements?

- A. Public Read/Transfer
- B. Public Read Write
- **C. Private**

Answer: C

NEW QUESTION # 39

Besides their own team accounts, sales managers at Universal Containers need to have READ access to all accounts of the same segment in other countries. Role hierarchy was implemented accordingly (based on countries), but a sales manager in the US is complaining that he cannot view account records of the same segment in Canada. What should be done to grant access in a proper way?

- A. Owner-Based Sharing Rules An owner-based sharing rule opens access to records owned by certain users. For example, a
- **B. Create an owner-based sharing rule to grant access to account records that have the same segment to all sales manager roles.**
- C. Create a public group and include all accounts of the same segment and grant access through a permission set.
- D. Create criteria-based sharing rules to grant access to account records that have the same segment to all sales manager

roles.

- E. Change the role hierarchy and put all of the sales managers in the US and Canada in the same role.

Answer: B

Explanation:

company's sales managers need to see opportunities owned by sales managers in a different region. The U.S. sales manager could give the APAC sales manager access to the opportunities owned by the U.S. team using owner-based sharing.

NEW QUESTION # 40

A company intends bring work from anywhere culture in a bid to improve productivity. Their sellers use wide variety of devices with different form factors. The company currently uses one page layout to display opportunity record details to the sellers. The Regional Vice President of Sales is complaining about incorrect alignment of data in opportunity records, making it difficult for some sellers.

Which steps are recommended to rectify this?

- A. Use a visualforce override for Opportunity view action, identify the form factor onLoad action and display relevant layouts based on form factors.
- **B. Use Dynamic Form to define different field sections applicable for different form factors of devices.**
- C. Use a custom LWC override for Opportunity view action, identify form factor onLoad action and display relevant layouts based on form factors.

Answer: B

NEW QUESTION # 41

Universal Containers (UC) has a custom object to track the internal net promoter score (NPS) for all ..

How can UC ensure that NPS records cannot be accessed by an individual employee's manager?

- A. Create a criteria-based sharing rule to remove access to Manager role and above in the Role ..
- B. Use Apex Sharing to remove NPS object share records for Manager profiles.
- C. Remove Create, Read, Edit and Delete from Manager Profiles and Permission sets.
- **D. Set organization wide default to Private and uncheck the Access Using Hierarchies option for the NPS object**

Answer: D
