Pass Guaranteed 2026 MD-102: Reliable Endpoint Administrator New Study Questions

Unlike other MD-102 study materials, there is only one version and it is not easy to carry. Our MD-102 exam questions mainly have three versions which are PDF, Software and APP online, and for their different advantages, you can learn anywhere at any time. And the prices of our MD-102 training engine are reasonable for even students to afford and according to the version that you want to buy.

Microsoft Endpoint Administrator Sample Questions (Q143-Q148):

NEW QUESTION # 143

You have a Microsoft Entra tenant that contains the devices shown in the following table.

☐ The tenant contains the groups shown in the following table.

☐ You create a Windows Autopilot deployment profile as shown in the Deployment Profile exhibit (Click the Deployment Profile tab.)

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

NEW QUESTION # 144

You have a Microsoft 365 tenant that uses Microsoft Intune to manage personal and corporate devices. The tenant contains three Windows 10 devices as shown in the following exhibit.

☐ How will Intune classify each device after the devices are enrolled in Intune automatically? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

<https://docs.microsoft.com/en-us/azure/active-directory/devices/concept-azure-ad-register>

NEW QUESTION # 145

You have the on-premises servers shown in the following table.

☐ You have a Microsoft 365 E5 subscription that contains Android and iOS devices. All the devices are managed by using Microsoft Intune.

You need to implement Microsoft Tunnel for Intune. The solution must minimize the number of open firewall ports.

To which server can you deploy a Tunnel Gateway server, and which inbound ports should be allowed on the server to support Microsoft Tunnel connections? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

□ Explanation:

Box 1: Server4

Microsoft Tunnel is a VPN gateway solution for Microsoft Intune that runs in a container on Linux and allows access to on-premises resources from iOS/iPadOS and Android Enterprise devices using modern authentication and Conditional Access.

Box 2: TCP 443 and UDP 443 only

Some traffic goes to your public facing IP address for the Tunnel. The VPN channel will use TCP, TLS, UDP, and DTLS over port 443.

By default, port 443 is used for both TCP and UDP, but this can be customized via the Intune Saerver Configuration - Server port setting. If changing the default port (443) ensure your inbound firewall rules are adjusted to the custom port.

Incorrect:

TCP 1723 is not used.

NEW QUESTION # 146

You have an Azure AD tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

□ Which devices can be configured by using Windows Autopilot self-deploying mode?

- A. Device3 only
- B. Device2 only
- C. Device 1, Device2, and Device3
- D. Device2 and Devnce3 only

Answer: D

Explanation:

Windows Autopilot self-deploying mode requires devices that have a firmware-embedded activation key for Windows 10 Pro or Windows 11 Pro. This feature allows devices to automatically activate Windows Enterprise edition using the subscription license assigned to the user. Device1 does not have a firmware-embedded activation key, so it cannot use self-deploying mode. Device2 and Device3 have firmware-embedded activation keys for Windows 10 Pro, so they can use self-deploying mode. Reference: Windows Autopilot self-deploying mode (Public Preview), Deploy Windows Enterprise licenses

NEW QUESTION # 147

You have a Microsoft 365 E5 subscription. All devices are enrolled in Microsoft Intune.

You create a Conditional Access policy named Policy1 that requires multifactor authentication (MFA).

You need to ensure that Policy1 only applies to devices marked as noncompliant. Which settings of Policy1 should you configure?

- A. Device platforms under Conditions
- B. Filter for devices under Conditions
- C. Grant
- D. Target resources
- E. Session

Answer: B

NEW QUESTION # 148

.....

Our MD-102 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our MD-102 study materials.
